Subject: KSIS Notification: Release Campus.1537.5 Scheduled for October 14

KSIS Contact,

Please be advised that KDE has confirmed the scheduled release of **Campus.1537.5** to all Kentucky Infinite Campus production and sandbox environments to start **Wednesday, October 14 at 7:00 p.m. (Central)/8:00 p.m. (Eastern)**. Infinite Campus will be temporarily unavailable during the update process. Please contact me if you have any questions or concerns about the update schedule.

The chart below summarizes highlights of the release. The Kentucky Release Notes are attached. For the full manifest of changes in this release, click here (Campus ID required). Infinite Campus University has provided a recorded WebEx training session for the release: LL 98230: E.1537 New Release Enhancements Lunch and Learn-20150917 1513-1 (50 min). Click here to register and play the recording.

Please share this information with individuals in your district or office as appropriate.

Thank you!

Infinite Campus Release Highlights – Campus.1533.2	
Kentucky Specific	
KEES	• GPA logic on the KEES Report has been updated to consider the Dual Credit course difficulty level indicator.
Safe Schools	• The Incident Time field and all references to Incident Time in validation reports within the Safe Schools Extract have been updated to now pull data from BehaviorIncident.timeStamp instead of BehaviorEvent.timeStamp. • Also, all Event Type references in validation reports within the Safe Schools Extract have been updated to now pull data from BehaviorEvent.name to BehaviorType.name.
TEDS	• Logic for the Grade Level element of the TEDS Enrollment Record Extract has been updated to now report the grade level from the student's most recent enrollment record during the date range entered on the report editor.
Title 1	• The Title 1 Report has been removed from both State and District Editions of Campus
Core Product	
Behavior	• A new behavior preference has been added to require a behavior incident include a resolution before that incident can be marked complete. This allows behavior and attendance data to remain in sync.
Campus Instruction	• A Template tool has been added that allows districts to create assignment templates to be used by teachers

(Requires additional tool rights to be assigned)	• The assignment editor has been updated with new fields.
	• A new print option was added to assignments.
	• Updates have been made to the Planner to support more in-depth instructional planning:
	  ○ A 'Library' option has been added to the heading of each section, which allows teachers to search the library of existing assignments created by teachers in their district and add them to the section.
	  ○ A 'List' option has also been added to the section heading, which opens the Assignment List for that section.
	• An additional view has been added to the Planner that allows teachers to view Other Curriculum, which displays other teachers' planners below.
	• A new Curriculum Report has been added which provides details about each item in the planner.

Census	• Legal name (last name, first name, middle name, suffix) and legal gender fields have been added to the Demographics and Identities tab. These fields have been added to differentiate between legal name and gender (that which appears on legal documents) and preferred name and gender (that which the individual would like to be called).
	• The following tools have been modified with this change:
	  ○ Demographics tab
	  ○ Identities tab
	  ○ Census Verification Report
	  ○ Student Locator
	• The legal name and gender fields are also available in the Ad hoc Filter Designer. When the legal name and gender fields are not populated in the interface, the values entered in the preferred name and gender fields return in ad hoc reports.
	• These fields are also available in the Campus Fields option when using WYSIWYG editors throughout the product.

Health	• ICD-10 Condition Codes are now available. These codes are updated versions of ICD-9 codes plus new sub-categories for specific codes. (See full release notes for additional details.)
Help	• Campus Help is now available via a question mark icon in the upper right-hand corner of Campus.
Report Card Preferences	• A Report Display Name field has been added to the Report Card Preferences list for both Conventional and Standards-Based Report Cards.

	When this field is populated, the text in the field overwrites the hard-coded value of Report Card that prints below the student's name. If the field is not populated, the hard-coded value of Report Card prints.
