Subject: New Communicable Disease Tab goes live in Infinite Campus

KDE has developed a new communicable disease tab that allows school nurses to document each time the local health department or other medical providers are notified of a reportable communicable disease in the school. Having this documentation in a specific location will allow nurses to easily track reported illnesses.

To access the new Communicable Disease Tab, users must be granted access by your district system administrator.

More details as well as instructions are included.
