

CENTER FOR EDUCATION LEADERSHIP

Developing a Growth Mindset in Our Struggling Students *A learning opportunity of deep thinking and strategy building*

Mindset is a simple idea discovered by world-renowned Stanford University psychologist Carol S. Dweck, Ph.D. in decades of research on achievement and success. Mindsets are beliefs – beliefs about yourself and your most basic qualities. The growth mindset, the understanding of intelligence and abilities as qualities we can develop, has been shown repeatedly to have powerful ramifications on student motivation and learning, and school success. When teachers and students focus on improvement rather than being smart, kids learn a lot more.

Participants in this session will learn:

- About developing a growth mindset for academic success and the dramatic role it plays in student achievement
- How data analytics can help leaders develop a strategic and successful transition plan
- Why brains and talent don't bring success, and how they can stand in the way of it
- Why praising brains and talent doesn't foster self-esteem and accomplishment, but jeopardizes them
- How teaching a simple idea about the brain raises grades and productivity

Presenter:

David Dockterman, Ed.D., a Carol Dweck associate, is a nationally recognized pioneer in the development and implementation of technology for classroom instruction. A former classroom teacher, David is now a lecturer on education at the Harvard Graduate School of Education.

DATES & LOCATIONS

- November 1, 2016
KEDC Office, Lexington
- November 2, 2016
Christian Co. Middle School, Hopkinsville

TIME

9 a.m. - 3 p.m. (local time)

COST

\$99 KASA Members/\$159 Nonmembers
*If registering a team of 5 or more from same district - 5th registrant is free!

EILA CREDIT:

Six hours EILA Credit Available
