Schoolnet Emergency Maintenance Window - 2/6/2014

Dear Schoolnet customer:

Today we discovered that hotfixes applied to Schoolnet sites last night have caused problems in creating tests in the Assessment Admin module. Because this is a crucial issue for many clients we will need to roll the sites back to the state they were in prior to the hotfix application. This will happen tonight, Feb 6, 2014, starting at 8 PM EST. Unfortunately this will mean that the issues addressed by the hotfixes will no longer be fixed. We are working on repackaging the hotfixes and will update you as soon as they can again be applied to your Schoolnet site.

We apologize for the inconvenience and will do all we can to ensure that this does not occur again in the future.
