

Turning proxy off in IE7:

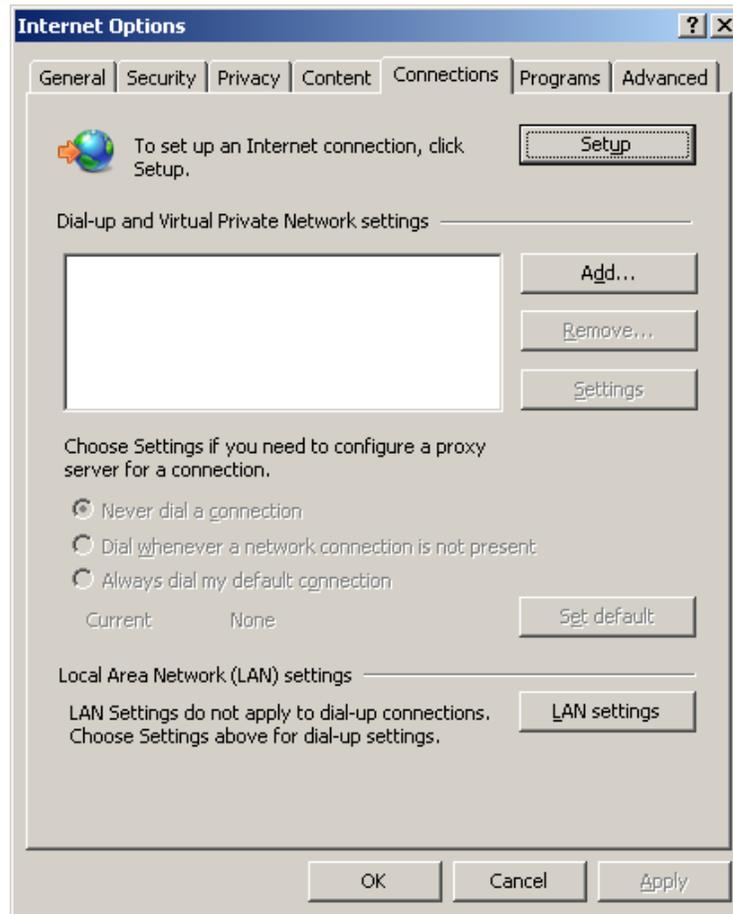

1. Open up Internet Explorer and then go to the "Tools" menu at the top, select "Internet Options...".

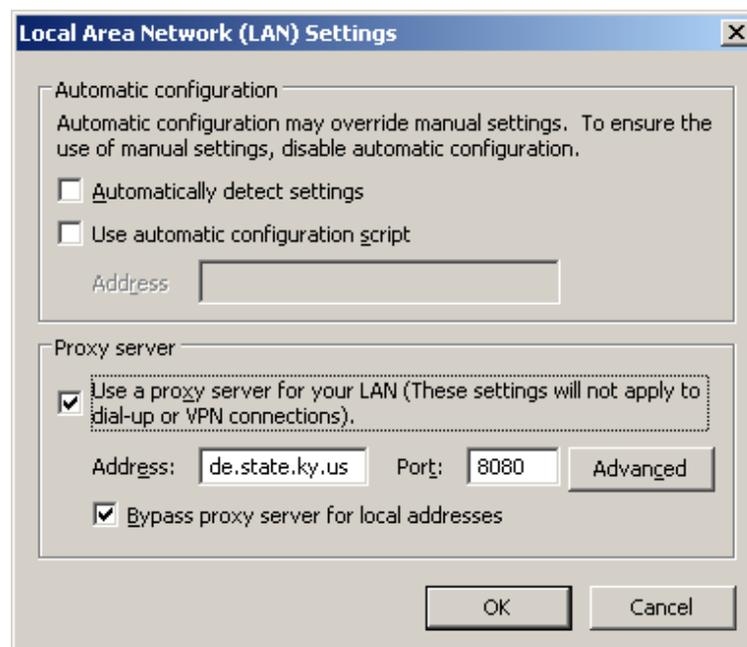

2. A new window will pop up.

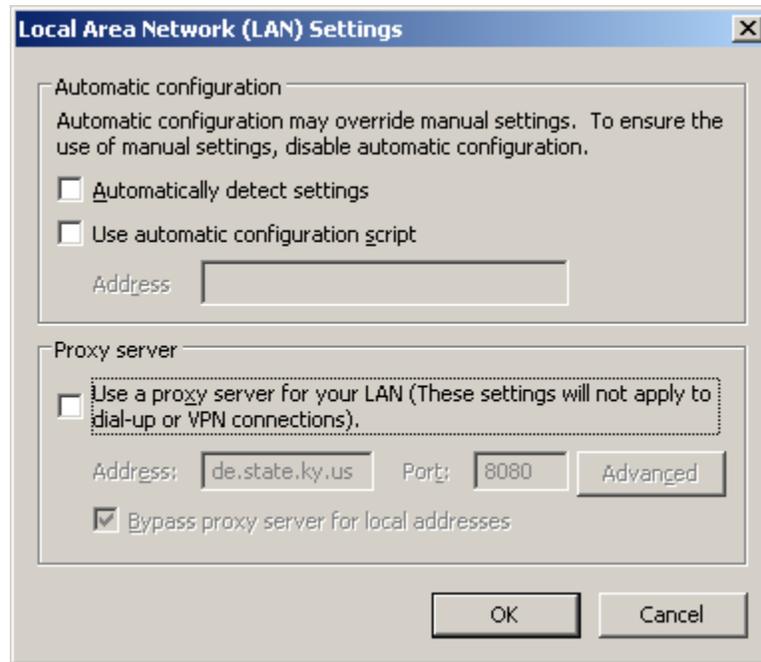

3. Click the “Connections” tab at the top of that window, and then click the “LAN Settings...” button at the bottom of that page.

4. In the new window that pops up, uncheck the checkmark in the box that says “Use a proxy server for your LAN...”

5. The window will now look like this:

6. You must remember to turn the proxy server setting on when you are either here in the tower, on a school network, or connected to the VPN service from a remote location such as your home, a hotel or at any other location that has internet access.
