

Turning proxy on in IE7:

1. Open up Internet Explorer and then go to the "Tools" menu at the top, select "Internet Options...".

2. A new window will pop up.

3. Click the “Connections” tab at the top of that window, and then click the “LAN Settings...” button at the bottom of that page.

4. In the new window that pops up, check the checkmark in the box that says “Use a proxy server for your LAN...”

5. The window will now look like this:

6. You must remember to turn the proxy server setting off when you are not connected to the KDE network either locally or over the VPN connection. Such a location might be in a hotel, a Wi-Fi hotspot in a restaurant or airport or your home network.
