**ICD-10 Codes Conversion
Questions and Answers**

Angela McDonald, Office of Office of Administration & Support
Division of District Support

1. Question: Where are the ICD codes located?

Answer: ICD codes are the numerical codes attached to specific health conditions on the student Health Conditions tab. Unless a system administrator has set them to IDC 10, the codes currently being used are IDC 9. After the conversion by IC, all districts will be set to use ICD10 codes. This should not be set back to ICD 9. All Medicaid billing and state reporting will use the ICD 10 codes following the conversion.
