Release notes provide the applicable personnel the ability to review enhancements, modifications and regulated changes prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in the product.

Questions or concerns regarding an update should be directed to Campus Support.

All 1302 Rx Packs are included in the 1306 Release Pack.

### End-of-Life Dates

End-of-life means no further development (*i.e.*, modifications, enhancements or regulated items) will be made on the identified version after the stated end-of-life date. Please plan accordingly. Infinite Campus will release a final end-of-life update for the identified version near the stated end-of-life date.

The following versions have been assigned an end-of-life date:

Version	Last Update	End of Life Date
2012M	2012M.1222	June 2012
2013M	2013M.1322	June 2013

Mandated localization changes required by State Departments of Education (DOE) and critical bug fixes will be released in supported versions through the end of life date. Please encourage your state's DOE to provide early announcements of any localization changes.

For additional information on version and platform support, see the Finding the [Infinite Campus Version](#) and [Supported Platforms](#) article.

### Update Manifest

In this table, the **E** and **M** columns indicate that the change was released in the Enhancement Line (E.1306) and/or the Maintenance Line (2013M.1306).

Click on a header to sort the table by that column.

See the [Release Pack Enhancements](#) article for a list of just enhancement release notes, or click the **Description** column header twice to sort enhancements to the top of the manifest.

## Technical Information

Users can access Technical Information [here](#).

## Attendance

### Attendance Date Validations (SIS-54142)

The following attendance tools have been updated to ensure correct date format prior to saving the record. This validation displays when dates are entered incorrectly (i.e., not in MMDDYY format).

- Daily Attendance
- Classroom Monitor
- Dialer Activity
- Positive Attendance
- Student Attendance

*Articles:* [Daily Attendance](#), [Classroom Monitor](#), [Student Attendance](#), [Dialer Activity](#), [Positive Attendance](#)

*Path:* [Attendance](#)

*Packs:* [E.1306](#)

## Behavior

### State Edition - Behavior Management (SIS-61526)

When users entered behavior information in State Edition, an error message returned when saving an incident from the Add Event/Participant Window. This has been corrected.

*Articles:* [Behavior Management Tool](#)

*Path:* [Behavior](#) > [Behavior Management](#)

*Packs:* [E.1306](#)

## Calendars

### School - School Type Field (SIS-62491)

The School Type field was incorrectly marked as a required field. This has been corrected. This field allows values up to 5 characters.

Users can still mark the field as required if necessary.

*Articles:* [School](#)

*Path:* [System Administration](#) > [Resources](#) > [School](#)

*Packs: E.1306*

## Campus UI Runtime

### Improvements to Mobile Browsing of the Standard Campus Application (SIS-45927) [Enhancement]

Modifications have been made to improve the mobile browsing experience of the standard Campus application on tablet, phone, and other handheld devices.

NOTE: Due to the numerous inconsistencies between mobile devices, operating systems, and browsers, Infinite Campus does not officially support use of the standard Campus application on any specific mobile device.

*Path: No Specific Path*

*Pack: E.1306*

## Combine Person

### Combine Person Error when Online Payments Exist (SIS-61821)

An error was returned when the Combine Person tool was used to combine two records into one and one of the records included Online Payment information. This has been corrected.

*Articles: [Combine Person](#)*

*Path: System Administration > Data Utilities > Combine Person*

*Packs: E.1306*

## Custom

### State Edition - Custom Tabs (SIS-52700) [Enhancement]

Custom tabs can be created at State Edition and published to selected districts, allowing the districts the ability to enter data that will sync to State Edition. State Edition users can collect the entered data for desired purposes.

*Articles: [Custom Tab \(State Edition\)](#), [Customizing Campus for State Editor](#)*

*Path: System Administration > Custom > Custom Tabs*

*Packs: E.1306*

**Custom Attribute Dictionary - Hide Checkbox (SIS-61086)**

Users now have the ability to hide custom attributes from the user interface. By marking the Hide checkbox on these Custom Attributes, that field will not display.

Also, three new Data Filter Options have been added to the Zones tool tab. The following describes each new option:

- **The Exclude No Show Enrollments** - If marked, enrollment records where the No Show checkbox is marked will not produce a student-based SIF object and the student will be omitted from SIF batch requests and events.
- **Exclude All State Exclude Enrollments** - If marked, enrollment records where the State Exclude

## KNOWLEDGE BASE - RELEASE PACK .1306 - JANUARY/FEBRUARY 2013

checkbox is marked will not produce a student-based SIF object and the student will be omitted from SIF batch requests and events.

- **Publish Social Security Numbers in the-** By default, Social Security Numbers are not published in the StudentPersonal or StaffPersonel objects however, users can include this information by marking the following checkboxes:
  - **StudentPersonal** - If marked, Social Security Numbers will populate the <OtherID> XML of the StudentPersonal object in both events and batch requests.
  - **StaffPersonal** - If marked, Social Security Numbers will populate the <OtherID> XML of the StaffPersonal object in both events and batch requests.

## Enrollment

### Enrollment Save Error (SIS-62315)

When user who did not have tool rights to a Homeless Enrollment field attempted to save an enrollment record, an error message was returned. This has been corrected. The following rules are used when allowing a user to save enrollment records:

- When a user makes a change to an enrollment and all required fields are populated and school and calendar match the enrollment, the enrollment saves when the user clicks the Save button.
- When an enrollment includes data from other portions of the product to populate drop-downs, text boxes, etc, and is required in the enrollment, and the user does not have tool rights specific to the other area but does have proper tool rights to save an enrollment, the user is allowed to save the enrollment record.
- The Save icon on the enrollment displays for all users who are assigned proper tool rights.

## Fees

### Fee Audit Report - Incorrect Totals for Online Payments (SIS-57023)

Incorrect totals for the Payments mode of the Fee Audit Report was printing when Online Payment records were included. This has been included. Note the following information.

The following logic applies to the calculations used when reporting fee totals in the Payments Mode.

- Any voided payments that are returned (canceled) are not included in report totals.
- Any voided payments that are converted into a deposits are included in report totals.
- Adjustments are not considered payments and are not included in report totals.
- Over-payments (deposits) are included in report totals.
- Deposits made when the student is not affiliated with any fee assignments and has a zero balance or a surplus balance are included in report totals.
- Payments made out of surplus balances are not included in report totals.

When a payment is made for multiple fees and one of those fees is voided after the payment is made:

- Generating the report for All Payments (Excluding Voids) does not include the voided payment. All other non-voided fees from the payment do still display.
- Generating the report for Voided Fee Payments displays only the voided payment. All other non-voided fees made in that same payment do not display.

### Human Resources - Adjustment Wage Record (SIS-58748)

An **Adjustment** button was added so that users can manually adjust existing wage record to account for contract/work hour changes, periods without pay, overpayments or underpayments. When users click the Adjustment button, a new Wage record window displays with additional fields for items that can be adjusted and creates a new wage record. When Campus Payroll is enabled, users can identify if they want the system to automatically distribute any salary adjustment amounts over a specified number of pay periods. Campus then creates a new record and passes the new wage amount to the Payroll module.

Missing Assignments	Missing Assignments Messenger
Teacher Messages	Teacher Messenger

School Choice Notifications via Messenger	School Choice Messenger
-------------------------------------------	-------------------------

### Text Messenger Removed from Outline

The Text Messenger has been removed from the outline. Instead of a separate tool, the option to send text messages is now available on all messaging tools for districts that use Campus Messenger with Voice.

For existing users, the following Demographic data was converted: If a person in Campus had the "Text (SMS)" tool selected, they will now have the new "Emergency" tool selected for the Text (SMS) Delivery Device. This conversion was done because Text Messenger pulled recipients using the same logic as the Emergency Messenger tool.

### Important Notice about Existing Templates

Current users who have saved Templates to a shared User Group will need to be granted Tool Rights to a new sub-tool right called **User Group Formats** after taking the update for Messenger Redesign. This new sub-tool right can be found under each messenger tool. Templates saved to User Groups will be converted but users will not see them until granted this Tool Right. This will not impact Attendance or Behavior Templates shared to User Groups because these tools already require the User Group Format as a right to share to User Groups.

### Updates Made to Messenger Tools

- Added the ability to mass update the end point URL. This automates the update process for changes to the ShoutPoint API without users or Support having to manually change.
- Each Messenger tool now displays a standard user interface that includes an updated WYSIWG editor and a consistent set of fields across tools.
- Each tool now has the option to select one of the following delivery devices: Inbox (portal), Email, Voice and Text. Voice and text messaging is add-on functionality and may not be available in all districts.
- The **Message Subject** can now be different than the Template name.
- The **User/Group** field was added to each Messenger so that users can save message templates to their user account or to a user group to which they belong.
- All email messages may now include email attachments. The option to display the field to upload email attachments in Messenger Tools is a preference set by the administrator under System Administration > Preferences > Messenger Preferences > Email Preferences.
- Added an Ad Hoc filter drop down option to further narrow criteria to the following Messenger tools: Attendance Messenger, Behavior Messenger and Emergency Messenger.
- Added a Toggle check box to the Review Recipients screen to allow users to quickly clear check boxes for all recipients on a page.
- Message Recipient Preview now includes (when part of the message): Message Subject, Message body, .wav file attachment name, email attachment name and Text Body.

### Emergency Messenger Updates

- Email is now a delivery device available for selection for both Voice and email only customers. Email only customers must update Tool Rights to view Emergency Messenger in their outline.
- A constraint was removed that checked for an endYear based on the user's Top Menu School Year selection when pulling recipients. Instead, recipients pull based on active enrollments for the current date. This is consistent with changes to how the add-on functionality of Remote Dial-in pulls recipients.

### Voice Messenger Updates

- The Delivery Device "Phone" was changed to "Voice" in each tool.
- Added the ability to send extension numbers to ShoutPoint and have the extension dialing work.
  - If a phone number contains an extension, recipients cannot confirm the call. Confirming calls to other phone numbers for the same recipient does not cancel calls to any phone numbers which contain extensions.
- If multiple recipients share a phone number but have different Delivery Devices selected for the same Messenger tool, Voice call confirmation will not cancel the Text message from going out for the other recipient.
- Added the following to be said after each Voice message when a live voice is detected, "To confirm the delivery of this message, press 0. To repeat this message, press 9."
- Messages are now Recipient based so that calls can be confirmed by pressing 0 and results in the cancellation of additional calls for the same recipient (excludes phone numbers shared with other recipients in Campus and numbers with extensions).
- Added the ability to send extension numbers to ShoutPoint that will work in the following manner: ShoutPoint will call the base phone number. When the call connects there will be a 2 second delay. The extension will then be dialed and the message will play after a 15 second delay to allow for pick up time. Messages delivered to extensions cannot be confirmed and will show a status of "Pre-connect" on Sent Messages.

### Voice Messenger Log Updates

- Performance for the Voice Messenger Log was improved so that the page displays faster. If there are more than 1,000 records, a notice displays under the log window indicating the records returned exceed 1,000 and the user should narrow their search criteria. A progress indicator has also been added so that users know their request is processing.

### Census and Portal Contact Preference Changes

- A field called "Secondary Email" was added and the Messenger Preferences were updated on the Census > People > Demographics > Personal Contact Information section.
- An **Emergency** column was added to the Messenger Preferences Contact Reason.
- For existing users, the following Demographic data was converted: If a person in Campus had any current phone numbers selected for any Messenger Preferences Contact Reason, they will now have the "Emergency" tool selected for that phone number with Voice as a Delivery Device. The email field was converted in the same manner. If a person in Campus had any any Messenger Contact Preference Reason selected for their Email field, they will now have the "Emergency" tool selected for the Email Delivery Device. These conversions were done because previously Emergency Messenger would pull recipients based on the presence of a checkbox for any phone number under any Messenger Contact Preference Reason.

### Batch Set Contact Preferences Wizard Updates

- The wizard was updated to include the new **Secondary Email** field.

### Remote Dial-In Updates

- Campus system administrators for districts that have purchased Remote Dial-in may now set up and manage the data export task for sending a contact data file to Shoutpoint.

## KNOWLEDGE BASE - RELEASE PACK .1306 - JANUARY/FEBRUARY 2013

- Recipients now pull in the same manner as Emergency Messenger. Parent/Guardian must have a Messenger Relationship (this is current functionality) and Parent/Guardian must have Emergency selected for Voice on the specific phone they want to receive Emergency messages on under Census > Demographics > Personal Contact Information > Messenger Preferences. Staff must have an active District Employment or District Assignment record and also have Emergency selected for Voice on the specific phone they want to receive Emergency message on under Census > Demographics > Personal Contact Information > Messenger Preferences.
- A fix was put in to enable the Remote Dial-In extract to pull correctly when a comma was present in any recipient's Last Name, First Name or in any School Name.

**Sent Messages Updates**

- The Sent Messages report Message section will detail the name of any .wav file (Audio File), email attachment file along with Message Body and Text body of messages sent.
- Sent Messages report will show a status of "Preconnect" for any phone dialed that includes an extension.
- The Delivery Detail information for Phone/Email column now displays phone numbers dialed for the campaign with the trunk code (long distance in North America) of "1" included preceding the recipient phone number.
- Shared Recipient phone numbers for any Delivery Devices attempted will display for each recipient, even if a specific recipient does not have both Delivery Devices selected on their own Demographics Tab. For example, Recipient 1 (R1) has Voice checked for a shared phone number. Recipient 2 (R2) has Text checked for the same phone number. When a message goes out, the Sent Messages report lists both a Voice and Text message attempted for both R1 and R2. The duplicate phone number will have an icon indicating the number is duplicated under Phone/Email column.

**Other bug fixes/enhancements**

- The Campus Insert Fields for "CourseName" and "TeacherDisplay" were added to Instruction > Messenger tools. Teachers can now insert these fields into the Message body or Text body when sending messages.
- The message body will now allow the characters of > and < without errors. However, these will not be read by TTS in a Voice call nor can these characters be delivered via Text (SMS).
- Hyphens contained within email addresses will now display properly in the Sent Messages report.
- Message Template Names are now limited to 50 characters. Users will be unable to enter more than 50.
- If a Dial Window of less than 30 minutes is entered on a template in any tool, an error message will display.
- Inactive Preferred Languages will appear in the dropdown list with asterisks across Messenger Tools where the "Limit delivery to contacts that speak" field appears.
- CallerID settings are no longer required to be entered for email only customers wanting to use any Messenger Scheduler tools like Attendance Messenger Scheduler, Behavior Messenger Scheduler, or Missing or Failing Assignment Schedulers.
- Message Builder is fixed so that when two or more filters are selected with Intersect and One Message Limit, students meeting the criteria in the household are pulled accurately.

## Point of Sale

### Point of Sale - Multiple Updates to Campus and Portal Journal Formats (SIS-32798) [Enhancement]

The following changes were made to Campus and Portal Journal formats to ensure Family Accounts print consistently.

- Multi-patron Family Accounts will only print one report per Mailing Address with all patrons listed, based on criteria selected.
- Journals printed from the Campus Portal include the following updates:
  - District information is formatted as left justified.
  - "Food Service Account Statement for Patron Name" was added to the header for individual accounts. If an account contains more than one patron, the header states, "Food Service Account Statement for Family Account."
  - The number of pages for each Account Statement will report in the header right justified; e.g., Page 1 of X.
  - The font size has been increased.
  - The section Headers for "Patron(s) on account #xxxx," the Transaction Summary section, the Transaction Summary title column row, the Transaction Detail section, and the Transaction Detail title column row are now bold.
  - The address now fits in a standard size 10 window envelope.
  - Journals now print with the list "Patron(s) on account:" that includes "Student Number" from the Point of Sale > Account Maintenance > Account > Journal.
- Transaction Details printed on statements now list the patron on the transaction. The POS will only print once per transaction. This is a change from the old format where the POS Name repeated for every item on the transaction.
- Changes to the way the Deposit (Point of Sale > Account > Maintenance > Account > Journal) include the following.
  - Deposit information no longer repeats the date of the deposit in parentheses.
  - Deposit information now closely matches the language and formatting used on the portal.
- Online Payment changes include the following:

## KNOWLEDGE BASE - RELEASE PACK .1306 - JANUARY/FEBRUARY 2013

- Transaction Details on Online Credit Card deposits changed from "\*Deposit (date) Credit Card (Auth#1234)" to "\*Deposit" listed on the first line Category and under Item "CC #1234, (Amount: \$12.34)" is listed. A second line under Category now lists the type of credit card used or lists "Online Credit Card."
- Transaction Details on Online Checking account deposits changed from "\*Deposit (date) Check# XXXX" on one line under Category to "\*Deposit" listed on the first line Category and under Item "(Amount \$XX.XX)" is listed. A second line under Category lists "Online Checking."
- Transaction Details for Online Savings account deposits changed from "\*Deposit (date) Check# XXXX" to "\*Deposit" listed on the first line Category and under Item "(Amount \$XX.XX)" is listed. A second line under Category lists "Online Savings."
- Deposits made in Campus using the Food Service deposit include the following changes:
- Deposits designated as Credit/DebitCard payments, the Transaction Detail changed from "\*Deposit (date) Credit Card (Auth#1234)" on one line under Category to "\*Deposit" listed on the first line Category, and under Item will list "CC #1234."
- Deposits designated as Check/eCheck payments, the Transaction Detail changed from "\*Deposit (date) Check# 1234 (Amount: \$12.34)" under Category to only "\*Deposit" listing under Category, the repeating date information was removed and Item now lists "Check# 1234 (Amount: \$12.34)."
- Deposits designated as Cash payments, the Transaction Detail changed from "\*Deposit (date) Cash (Amount: \$12.34)" on one line under Category to "\*Deposit" listing on the first line Category and under Item "Cash (Amount: \$12.34)" displays.
- Deposits made from the Point of Sale Terminal include the following changes:
  - The name of the point of sale on which the deposit was made now displays in the POS column of the statement.
  - Deposits made via the Point of Sale Terminals Quick Deposit button, now match the format for Check and Cash based deposits made using the Campus Food Service Deposit.
  - The Category column now states "\*Deposit" with the asterisk that appears on the Portal Food Service Account Statement.
  - The Item column now states the type of payment made, any reference # and the total amount of the deposit.

### Point of Sale - Error Message Improvements (SIS-58775) [Enhancement]

The following changes were made to improve error messaging:

- Unnecessary error messages were removed.
- New error messages were added to the POS Configuration to alert the user if scripts are not able to run correctly. For example, an error message will display if the database doesn't get dropped.
- General improvements were also made to improve error messages that display on the POS so they are more useful.

## Search Engine

### Search Results (SIS-61940)

A staff person was incorrectly returned as being inactive in the search results when that staff person was a former student. This has been corrected. The following logic applies to search results:

- The All People Search correctly identifies a person in the search results as active when the person is an active student.
- The All Person Search correctly identifies a person in the search results as inactive when a person is no longer a student (has no active enrollment).
- The All Person Search correctly identifies a person in the search results when a person is a current staff who was a former student (indicating the active staff and not the student data).
- The Staff Person Search correctly identifies staff members, regardless of whether or not they were former students.
- The Staff Person Search correctly identifies staff members as inactive when the staff member's district assignment is no longer active/valid.

### Course/Section Search Results (SIS-62266)

Course/Section search results have been returned to behavior that existed prior to the E.1250 release. The following logic applies to searches:

- A Course/Section search with no criteria entered returns results, beginning with the first available course in the calendar/school/district based on standard search logic (alpha-numeric or courseID or whatever that is).
- A Course/Section search with criteria returns results specific to the criteria entered, unless no results match the criteria.
- A Course/Section search with criteria returns a 0 when no match is found.
- An "All People" search requests the user to input at least one criteria/value/character when no criteria is entered in the search.
- An "Address" search requests a user to input at least one criteria/value/character when no criteria is entered in the search.
- A "Household" search requests a user to input at least one criteria/value/character when no criteria is entered in the search.

### Additional Campus Security Roles Added (SIS-60592) [Enhancement]

In an effort to provide additional flexibility for user security access within Campus, two new security roles have been added.

The "Student Information System – Group Assignment" security role provides non-security users the ability to assign User Groups to other users without being given the security and system access granted with other product security roles.

The "Student Information System - Login as User" security role allows users to access the Login as User feature on the User Account tab without having the security and system access granted with other product security roles. Users assigned this role are allowed to work within Campus to the extent of their tool rights and can only log in as other users who have equal to or less than tool rights.

### Iowa – 2012-2013 SIF Updates (SIS-54166)

The Institution Providing Section field has been added to the Course editor. This field provides the default value for the Institution Providing Section field on each section created for the course. Users can manually modify the Institution Providing Section value on the section from the default value inserted from the course. The SRI Data Collects Report will continue to pull the Institution Providing Section value field on the section.

The following extended elements have been removed from the SIF StudentSchoolEnrollment object:

- CharterSchool
- SWVPPHours
- SWVPPPparentPaidTuition
- SWVPPEmpowerTuitionAssist
- PKProgram
- PKProgramStandards

The following updates were made to the SIF SchoolCourseInfo object:

- The StateCourseCode core element now reports the value in the SCED Course Code field on the Course Editor.
- The SectionProvider extended element has been created. This element reports data from the Institution Providing Section field on the Course editor.
- The SCEDCode extended element has been removed.

The SectionInfo.CourseOrigination extended element has been created. This element reports data from the Course Origination field on the Section editor.

The following elements have been localized for Iowa within the StudentDemographicRecord, StudentPersonal and StudentSnapshot objects, each matching the associated SRI field:

- Migrant
- Homeless
- IDEA

The following modifications were made to DisciplineIncident object extended elements:

- The Duration extended element has been changed to RemovalDuration.
- The WeaponType extended element has been changed to RemovalWeaponCode.

The StudentAcademicRecord.CourseOrigination element has been changed to report data from the Course Origination field on the Section editor.

The Delivery Method field has been added to the Course editor. This field provides the default value for the Delivery Method field on each section created for the course. Users can manually modify the Delivery Method value on the section from the default value inserted from the course.

The Medium of Instruction field has been removed from the Section editor.

## Nevada

### Nevada – Application of Campus Attribute Standard (SIS-49026) [Enhancement]

The Campus Attribute Standard has been applied to all local databases on the Enhancement Branch throughout Nevada. The Campus Attribute Standard is a core set of attribute and dictionary values which were applied to the local database to add, replace, rename and correct inconsistencies found throughout existing attribute and dictionary values.

The goal of the Campus Attribute Standard is to reduce the negative effect incorrect attributes and dictionaries have on local database items, reporting and overall product functionality.
