Conversion of Medicaid Billing Codes in Infinite Campus

Infinite Campus will be converting ALL student health conditions from ICD-9 to ICD-10 codes on March 18, 2016. The Kentucky Department of Education has provided Infinite Campus a crosswalk with the most commonly used ICD-9 codes. However, due to the large number of ICD-10 codes, Infinite Campus was not able to convert all existing ICD-9 codes. Therefore, there will be a small number of codes in each district that will need to be converted manually.

In order to prevent the loss of student health condition data, KDE has developed a state published ad hoc ([Student Health Codes with ICD-9 Code Set](#)) to identify all student health conditions in your district. This ad hoc should be run and saved BEFORE the conversion on March 18th. You will use the list on this report after the conversion, to determine if there are student health conditions that will need to be manually converted to ICD-10.

Once the conversion to ICD-10 is complete, KDE will be providing technical assistance on manually converting the remaining ICD-9 health condition code by providing regional trainings to assist districts. To register for one of the regional trainings, click [here](#).

If you have any questions, contact Angie McDonald at angela.mcdonald@education.ky.gov or by phone at (502) 564-5279 Ext. 4430.
