Subject: KSIS Notification: MSGP now available

The Median Student Growth Percentile (MSGP) scores are now available to principals and teachers in CIITS. You may get questions regarding Infinite Campus setup and reports. Hyperlinks to resources below should be helpful.

- Information on how teachers and principals access scores in CIITS and how the scores are displayed were included in the February [KSIS Newsletter](#) (last 2 pages).
- Mid-year training included a session on this; PowerPoint and video available [here](#) (Session 1.5).
- The [Median Student Growth Percentile](#) webpage includes more information.

Reminder: if there are issues with course codes or alignment of teachers and students, prior year data should not be changed. However, being aware of issues can help with determining what needs to be changed for current year 2014-15 and forward. With the next release of Campus, February 11th, there will be a new course code report that can be used as a tool to view teachers in grade 4-8, local and state course codes, and whether the courses qualify for the MSGP. More information will be sent out on this new report at the time of the release.

You can direct questions to the MSGP program contact [Jeffrey Coles](#).
