KSIS Contacts,

Please see the announcement below from Infinite Campus CEO and Founder Charlie Kratsch.

Happy New Year! The past year has been very good for us as we now have 1,700 districts with 6.5 million students using Infinite Campus. Just as our company continues to grow, so has our product. For 2014 we are proud to announce an updated user interface.

This new interface changes the look of the system without changing any functionality. The search, help, folder tabs, tool outline and tools themselves all function as they have in the past. All we have done is enhanced the system's usability with a more modern look. Here is a sample screen showing some of the changes we have made:

As part of the update, we have extensively tested this interface across 16 OS/browser combinations to ensure compatibility with all supported platforms. This interface will be included in the 1402 release which will be generally available Wednesday, January 8<sup>th</sup>. More information on the user interface changes can be found in the 1402 release notes in the Campus Community.

I look forward to this and many more enhancements to come and thank you for your continued use of Infinite Campus.

Charlie Kratsch | CEO & Founder | Infinite Campus
