Release notes provide the applicable personnel the ability to review enhancements, modifications and regulated changes prior to accepting an update. It is advised that users review the release notes carefully and alert appropriate district staff to changes in the product.

Questions or concerns regarding an update should be directed to Campus Support.

All 1310 Rx Packs are included in the 1314 Release Pack.

### End-of-Life Dates

End-of-life means no further development (*i.e.*, modifications, enhancements or regulated items) will be made on the identified version after the stated end-of-life date. Please plan accordingly. Infinite Campus will release a final end-of-life update for the identified version near the stated end-of-life date.

The following versions have been assigned an end-of-life date:

Version	Last Update	End of Life Date
2012M	2012M.1222	June 2012
2013M	2013M.1322	June 2013
2014M	2014M.1322	June 2014

Mandated localization changes required by State Departments of Education (DOE) and critical bug fixes will be released in supported versions through the end of life date. Please encourage your state's DOE to provide early announcements of any localization changes.

For additional information on version and platform support, see the Finding the [Infinite Campus Version](#) and [Supported Platforms](#) article.

### Update Manifest

In this table, the **E** and **M** columns indicate that the change was released in the Enhancement Line (E.1314), and/or the Maintenance Line (2013M.1314 and 2014M.1314).

Click on a header to sort the table by that column.

See the [Release Pack Enhancements](#) article for a list of just enhancement release notes, or click the **Description** column header twice to sort enhancements to the top of the manifest.

## Attendance

### Classroom Monitor Enhancements (SIS-49355)

The Classroom Monitor has been updated to increase performance. In addition, the user interface has been modified for the following:

- Additional padding has been added about the Teacher's name on the summary grid.
- The column headers of the summary grid display in gray background color (existing format). All other information on the interface now have a background color of white for easier viewing.
- The print icon has been renamed to be Incomplete Teacher Attendance. The printed report only includes course sections where teachers have not recorded attendance for the entered date.
- A bold line displays after every third name for readability.
- The Last Refreshed timestamp is updated when the page was last fully refreshed (browser refresh option, the Refresh button is selected or Primary Teachers Only checkbox is selected).
- When entering attendance for a teacher, the attendance roster displays within the Classroom Monitor view. Users can enter attendance and save to return to the main view of the Monitor or click the Close button which will also return to the main view of the Monitor.

causing performance issues. These issues have been corrected.

*Article: N/A*

*Path: Ad hoc Reporting*

*Packs: 2014M.1314, E.1314*

#### Attendance Letters Timing Out (SIS-62023)

Attendance letters were reported to be timing out and schools were not able to generate attendance letters. This has been corrected.

*Packs: 2014M.1314, E.1314*

#### Period Count Report (SIS-63427)

The following changes have been made to the Period Count Report:

- A Report Type option has been added to the report, with the options of Total Count or Count by Period.
  - Total Count (default selection) evaluates the Having at least/at most parameters against the student's total attendance marks over the date range.
    - If a student falls within the total count range specified by the Having at least/at most parameters, all of the periods will display attendance mark counts.
    - If a student does not fall within the total count range by the Having at least/at most parameters, the student's attendance information will not be included on the report.
  - Count By Period evaluates the Having at least/at most parameters against each period of the student's attendance marks over the date range.
    - If a student has a period that falls within the Having at least/at most range, the student and each period that falls within the least/most range prints.
    - If a student has periods that fall within the range but other periods do not, the student name prints but no period information prints if the period does not meet the least/most range requirements.
    - If a student does not meet the least/most range requirements on any period, the student is not included on the report.
- Validation for Having at least/at most
  - Negative values cannot be entered.
  - The At Least value cannot be greater than the At Most value.
  - When using the Count By Period option, the Having At Most field requires a value that is not zero (0).
- If one of the having at least or having at most fields is left blank but the other field is populated, the report displays greater than or less than symbols in the header.

## KNOWLEDGE BASE - RELEASE PACK .1314 - MARCH/APRIL 2013

- The Report Editor note has been updated to include these changes.

To find students who do not have any attendance marks in any period (Perfect Attendance), use the Total Count option and enter zero (0) in both of the Having at least/at most fields. Only students who have zero absence attendance marks display.

## Graduation

### State Graduation Record (SIS-56835) [Enhancement]

A State level Graduation Record is now available. This record displays the earliest ninth grade enrollment information and the earliest NCLB cohort information for students as entered by districts. Data displays on this state graduation record only after it has been synced from the district.

A one time resync of all graduation data will be performed to create the first state grade record for all installations.

Changes to graduation records will not be seen by state-linked district edition users until graduation records have been published.

A Lock State Graduation Records System Preference determines how student graduation records at the state level behave for district-linked installations.

- When set to Yes, existing graduation records will not be auto-updated by new graduation records synced from districts.
- When set to No (default setting), existing state graduation records will be auto-updated with new graduation records synced from districts on a regular basis.

State graduation fields are available in Ad hoc Reporting.

Grade Book (Beta) Updates in Preparation for Open Beta (SIS-62920) [Enhancement]

- ✓ With this release, the Grade Book (Beta) is available to all users for an Open Beta testing period. Access to the Grade Book (Beta) is determined by tool rights. Users can have rights to both the original, java-based Grade Book and the new Grade Book (Beta) at the same time and can switch between as desired.

The following updates have been made to the Grade Book (Beta):

- An additional expansion option was added for Assignments in the form of a blue expansion button that appears in the score cell when a score is selected. Clicking the chevron will expand the assignment to use flag and fill options and view attendance information.
- Header spacing issues with long Category names corrected.
- Error corrected where unsaved scores were lost when an assignment was created or edited or the grid was reordered using the Settings.
- Various bugs associated with sorting columns corrected.
- Additional Proficiency Estimate options were added, which are chosen in the Edit Grade Calculation are of the Assignments tool. These new options are to report the Highest rubric score, the Mode of 3, and Mode of 5, which report the most common score from the last 3 or 5 scores, respectively.
- Students can now be sorted alphabetically, ascending or descending, using the pair of arrows at the top of the Student column.
- Box and Whisker diagrams that appear when a student is expanded have been updated:
  - Quartile color coding has been removed.
  - A green line was added indicating a passing score.
  - The student's score is indicated with a yellow dot.
  - Other students' outliers are indicated with an x.
  - A score scale was added to the left side indicating performance by percentage.
- The Grid Color option for color coding by quartile was removed from Settings and replaced with Pass/Fail Color Coding options for Grade Totals and Scores.
- Warning logic for Posting grades with unsaved data was updated; clicking Continue from the warning message will save grades.
- The Grade Totals pane will default to expanded when changing the context of the Grade Book.
- Grade Totals, Expanded Student and score frame lines were updated for improved readability.
- Proficiency Estimate calculations in specific scenarios was updated.
- A Save Alert preference was added to the Settings menu allowing users to indicate whether they want to be notified when the Grade Book has been saved.
- A Grades summary link has been added to the expanded student information. To filter the student list to only the expanded student, a **Hide Others** button has been added below the Comments box. When filtered to a single student, buttons to move to **Previous**, **Next**, and to **Show All** have been added.
- Hovers have been added to the Sparkline graphs indicating that the blue Points/Marks graph displays based on score percentage and the Rubric bar graph based on proficiency.
- Users can now use arrow keys within a Comment box.
- When a comment has been entered for a score, a red icon will appear in the score cell and the

[Error in SIF Student Demographics Object \(SIS-64006\)](#)

StudentDemographicRecord SIF results were producing a SQL error. This has been corrected.

Birth Country code 2470: Kosovo has been added for Virginia Editions of Campus. Each Country Code has been mapped to an associated SIF code. The following describes SIF reporting logic for the Birth Country field:

- Report the SIF code mapped to the Birth Country value selected.
- When Birth Country = null and there is a valid Default Value, report the SIF code mapped to the attribute default value.
- When Birth Country = null and there is not a valid attribute Default Value, a value of US is reported.

The SIF CountryOfBirth element in both StudentPersonal (2.0r1 and higher) and StudentDemographicRecord (2.4 and higher) has been corrected and mapped to SIF codes based on the selection in the Birth Country field.

### California - CALPADS End of Year Reporting Changes (SIS-60298)

CALPADS Extracts have been updated for end of year reporting.

- The file names for CALPADS extracts have been updated to be Record Type.txt for the state format and Record Type.csv for the CSV format.
- Extract editor notes have been updated.
- CALPADS Student Waivers - the reporting population has been modified to report a record for Waiver Type 3: CAHSEE Exemption only if the Outcome is 1: Granted.
- CALPADS Course Section - Field 15, Academic Term logic has been updated to correctly calculate the term for a six-term calendar.
- CALPADS Student Course Section - Field 15, Academic Term logic has been updated to correctly calculate the term for a six-term calendar.
- CALPADS Student Course Section - Field 20, Marking Period logic has been updated to report H6 when the Transcript Course Record has an Actual Term of 6 and Calender Term of 6.
- NCLB Code attribute is no longer used. Values are still available in ad hoc for historical purposes.
- Behavior Event Code 403 has been corrected for a spelling issue.
- EL Instructional Type Code 1 has been updated to clarify meaning (Primary Language and ELD and/or SDAIE).
- Diploma Type has a new code - 105: Special Ed Certificate of Completion.
- Receiver School - the field has been changed to a numeric option up to 14 digits.

**California - Class Size Penalty Report (SIS-62198)**

The Class Size Penalty Report has been updated for the following:

- The report's editor note has been updated.
- A Course Name column has been added to all versions of the report, listing the name of each course.
- The Grade K-3 fractional version reports any course that has at least one student on the roster on the last instructional day of a school month within the P2.
- The Teacher Name for the K-3 versions reports the name of the most recent Primary Teacher for the section relative to the last instructional day of the P2. The teacher name only reports blank when there is no primary teacher at all or if the only primary teacher has a Staff Section History Start Date after the last instructional day in the P2.
- The Teacher Name for the 4-8 version reports the name of the most recent Primary Teacher for the section relative to the last instructional day of School Month 6. ### California - CALPADS Student Program - Program 101 Eligibility Start Date (SIS-63570)

The following logic has been updated on the CALPADS Student Program Report:

- Field 15, Membership Start Date for Program 101 reports the earlier of the Start Date or Eligibility Start Date. If only the Eligibility Start Date is populated, that date reports. When the report is generated for a Date Range, the collection choice does not matter.
- Field 16, Membership End Date:
  - For Programs 101, 127, 135 or 144: The later date of the Flag End Date or the Flag Eligibility End Date reports. If the student's enrollment from the Reporting Date/Date Range time period has an End Status other than 440 or E490 or blank, the Enrollment End Date reports if it is before the Flag End Date or Eligibility End Date.
  - For Programs 181 or 182, the Eligibility End Date reports for Free or Reduced settings. If the student's enrollment from the Reporting Date/Date Range time period has an End Status other than 440 or E490 or blank, the Enrollment End Date reports if it is before the FRAM Eligibility End Date. If the Exit Status is 440 or E490 or blank, the FRAM Eligibility End Date reports.
  - For Program 181, the Provision Status reports the June 30 date of the calendar end year. If the student's enrollment from the Reporting Date/Date Range time period has an End Status other than 440 or E490 or blank, the Enrollment End Date reports if it is before the June 30 date. If the exit status is 440 or E490, the June 30 date reports.
  - For Programs 108, 113, 122-NN, 162, 164, 171, 172, 173, 174 or 180, the Flag End Date reports if populated. An End Date after the Reporting Date is allowed.
    - If the student's enrollment from the Reporting Date/Date Range time period has an End Status other than 440 or E490 or blank, the Enrollment End Date reports if it is before the Flag End Date. If the Exit Status is 440 or E490 or blank, the Flag End Date Reports.
    - If the student's enrollment from the Reporting Date/Date range time period has an End Status other than 440 or E490 or blank, the Enrollment End Date reports if the Flag End Date is blank. If the Exist Status is 440 or E490, no value reports when the Flag End Date is blank.

New York - Effective Date Selector added to SIRS Staff Student Course Editor (SIS-61836)

Future-dated information was reporting in the NY SIRS Staff Student Course extract when it should have been excluded. To fix this problem, a new option called "Effective Date" was added to the extract editor. The Effective Date ensures future-dated records do not report.

- Student records do not report if the Section Start Date into which the student is rostered has a beginning date that is after the Effective Date.
- Student records do not report if the student's Roster Start Date is after the Effective Date.
- Teacher records do not report if the teacher's start date is after the Effective Date.
- In situations where a course/section's Primary Teacher was end-dated and replaced with a new Primary Teacher, the extract was correctly reporting the second Primary Teacher in the Section Staff History. However, a second erroneous row was also reporting for the new Primary Teacher. This second row back-dated to the start of the course. This problem has been fixed.

## Virginia

### Virginia – LEP Functionality Added (SIS-38473) [Enhancement]

LEP functionality has been added to the Program Participation section of the Student Information module. LEP functionality includes the LEP tab which provides a central location for managing LEP information such as the date the student was identified as LEP, when the student entered/exited an LEP program, when the student is expected to leave an LEP program and First Year/ Second Year Monitoring data.

The LEP Assessment tab provides a read-only view of a student's LEP assessments and scores.

The LEP Services tab allows users to keep track of services a student receives while participating in an LEP program.

The LEP Accommodations tab allows users to track and manage LEP accommodations provided to a student throughout a school year and throughout a student's school career.

For detailed information about how existing LEP data was converted, modifications made to Ad hoc in support of new LEP functionality and updates made to state reporting logic, see the [Virginia LEP Modifications](#) article.

## Vermont

### Vermont - Updates to CIRS Reports (SIS-52559)

The following report logic was updated to ensure accurate reporting.

- All reports now follow exclude logic; i.e., State Exclude, No Show, Grade Exclude, and Calendar Exclude.
- The **Incident\_type** field on the Incidents Report was updated to only report the State Event Code if selected.
- The **Action\_type** field on the Resolutions Report was updated to only report the State Resolution Code if selected.
- Logic on the following reports was updated to remove the check for students that are marked as Active. Now, the report logic checks for a Primary Enrollment then checks for Secondary enrollment. The logic also checks for and reports any person, including non students, with a behavior event with the following conditions:
  - A State Resolution Code (Resolutions Report)
  - A Role Code of V1, V2, V3, V4, or V5. (Victims Report)
  - A State Event Code (Incidents Report)
  - A Role Code of O1, O2, O3, O4, or O5. (Offenders Report)
- The following fields on the Offenders Report were updated to only report from the Special Ed module or PLP.
  - Offender IEP (Field 12)
  - Disabilities (Field 15)
- The Perp\_Grade field on the Offenders Report was updated to report the state grade code. Previously, it was reporting the grade definition.
- The Susp\_Length field on the Actions Report was updated to calculate based on a distinct date per calendar.
- The Actions and Victims reports were updated to look for an enrollment that was active on the Event Date.
- The Resolutions and Victims reports were updated so that calendars with two structures that have grades with the same name do not report duplicate records.

## Wisconsin

### Wisconsin – Application of Campus Attribute Standard (SIS-49051) [Enhancement]

The Campus Attribute Standard has been applied to all local databases on the Enhancement Branch throughout Wisconsin. The Campus Attribute Standard is a core set of attribute and dictionary values which were applied to the local database to add, replace, rename and correct inconsistencies found throughout existing attribute and dictionary values.

The goal of the Campus Attribute Standard is to reduce the negative effect incorrect attributes and dictionaries have on local database items, reporting and overall product functionality.

For more information, see the [Wisconsin Campus Attribute Standard Notification](#) article in the Knowledge Base of the Campus Community.
