

**Data Verification Report**  
 Marion County Public Schools  
 Issued March 23, 2012

<b>General Information</b>	
<b>Type of Report:</b>	<b>Consolidated Monitoring Visit – Individuals with Disabilities Education Act (Part B)</b>
<b>Focus Areas Reviewed:</b>	<ul style="list-style-type: none"> <li>• Evaluation / Eligibility</li> <li>• Least Restrictive Environment</li> </ul>
<b>Data Sources:</b>	<ul style="list-style-type: none"> <li>• Review of Student Due Process Files</li> </ul>
<b>DLS Review Team Members</b>	<ul style="list-style-type: none"> <li>• Robin Linton, IDEA Team Leader</li> <li>• Denise Bailey, Branch Manager</li> <li>• Roger Lacy, Consultant</li> <li>• Stephanie Sterling, Consultant</li> </ul>

**Onsite Visit Methodology**

The Kentucky Department of Education (KDE), Division of Learning Services (DLS) has recently conducted a focused monitoring visit in your district. The focus areas for this review include priorities established by the Kentucky Department of Education. For this monitoring cycle, DLS established the following monitoring priorities:

- Eligibility for students identified for special education and related services
- Least restrictive environment (LRE) documentation.

Your district is one of 14 districts that received an onsite visit during the 2011-12 school year through the KDE Consolidated Monitoring Process.

The IDEA portion of the review was conducted by a team assembled by DLS as specified in the General Information section of this report. In order to complete the compliance review, the team reviewed individual student records.

Districts were directed to make available the pertinent student records randomly selected by the DLS team leader in order to determine the district’s compliance status related to the focus areas stated above.

This report contains a section for each priority area reviewed for your district. It also contains “coded” student-specific noncompliance that must be corrected by the district. Individual student names are not provided in the report, due to confidentiality concerns. A separate list with codes and student names will be made available to the Director of Special Education after the issue of this report.

Even though eligibility and LRE are the focus of this report, the team may have noted other concerns when reviewing the student files. KDE is required under its general supervision responsibility to cite districts for IDEA noncompliance that it discovers during the course of monitoring.

**Eligibility and Least Restrictive Environment**

Records for eligibility were reviewed based upon the requirements outlined in 707 KAR 1:300 (Child find, evaluation and reevaluation), 707 KAR 1:310 (Determination of eligibility) and 707 KAR 1:350, Section1 (Placement decisions).

The following information outlines specific areas the review team investigated in order to determine compliance with eligibility and LRE requirements.

**Data Verification Report**  
Marion County Public Schools  
Issued March 23, 2012

**Referral and Classroom Interventions**

The review team assessed the district's compliance with 707 KAR 1:300 Section 3 as it pertains to ensuring that each child has been provided appropriate instruction and intervention services prior, or as a part of the referral process. The instruction and intervention services must include:

- Relevant research-based instruction and intervention services in regular education settings, with the instruction provided by qualified personnel;
- Data-based documentation of repeated assessments of achievement or measures of behavior which are collected and evaluated at reasonable intervals, reflecting systematic assessment of student progress during instruction; and
- Results having been provided to the child's parents.

**Adverse Effect**

For all disability categories, the Kentucky IDEA regulations require the ARC to document discussion of the adverse effect of the disability on the child's educational performance. Adverse effect means that the progress of the child is impeded by the disability to the extent that the child's educational performance is significantly and consistently below the level of similar aged peers. 707 KAR 1:002, Section 1(2).

**Autism**

Autism as defined by 707 KAR 1:002, means a developmental disability significantly affecting and nonverbal communication and social interaction, generally evident before age three (3) that adversely affects a child's educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences. The term shall not apply if a child's educational performance is adversely affected primarily because the child has an emotional-behavior disability.

**Developmental Delay (DD)**

Developmental Delay as defined by 707 KAR 1:002, means that a child within the ages of three and eight has not acquired skills, or achieved commensurate with recognized performance expectations for his age in one or more of the following developmental areas: cognition, communication, motor development, social-emotional development, or self-help-adaptive behavior. Developmental Delay includes a child who demonstrates a measurable, verifiable discrepancy between expected performance for the child's chronological age and current level of performance. The discrepancy shall be documented by:

- Scores of two standard deviations or more below the mean in one of the areas listed above as obtained using norm-referenced instruments and procedures;
- Scores of one and one-half standard deviations below the mean in two or more of the areas listed above using norm-referenced instruments and procedures; or
- The professional judgment of the ARC that there is a significant atypical or pattern of development. Professional judgment shall only be used where normal scores are inconclusive and the ARC documents in a written report the reasons for concluding that a child has a developmental delay.

**Data Verification Report**  
Marion County Public Schools  
Issued March 23, 2012

**Emotional – Behavioral Disability (EBD)**

Emotional – behavior disability as defined by 707 KAR 1:002, means that a child, when provided with interventions to meet instructional and social-emotional needs, continues to exhibit one (1) or more of the following, when compared to the child’s peer and cultural reference groups, across settings, over a long period of time and to a marked degree:

- Severe deficits in social competence or appropriate behavior which cause an inability to build or maintain satisfactory interpersonal relationships with adults or peers;
- Severe deficits in academic performance which are not commensurate with the student’s ability level and are not solely a result of intellectual, sensory, or other health factors but are related to the child’s social-emotional problem;
- A general pervasive mood of unhappiness or depression; or
- A tendency to develop physical symptoms or fears associated with personal or school problems.

This term does not apply to children who display isolated (not necessarily one (1)) inappropriate behaviors that are the result of willful, intentional, or wanton actions unless it is determined through the evaluations process that the child does have an emotional-behavioral disability.

**Functional Mental Disabilities**

Per 707 KAR 1:002 Section 1, (37) in order for a child to be eligible under the functional mental disability (FMD) category the following criteria must exist:

- Cognitive functioning is at least three (3) or more standard deviations below the mean;
- Adaptive behavior deficit is at least three (3) or more standard deviations below the mean;
- A severe deficit exists in overall academic performance including acquisition, retention and application of knowledge; and
- Manifestation is typically during the developmental period

**Hearing Impairment**

As defined by 707 KAR1:002 Section 1 (29), a hearing impairment is defined as a hearing loss that:

- May be mild to profound, unilateral or bilateral, permanent or fluctuating, and is determine by:
  - An average pure-tone unilateral hearing loss in the speech range (500Hz, 1000Hz, and 2000Hz) of at least 25dB in the better ear; or
  - An average pure-tone hearing loss in the high-frequency range (2000Hz, 4000 Hz, and 6000 Hz) of at least 45dB in the better ear; or
  - An average pure-tone unilateral hearing loss in the speech range (500Hz, 1000Hz, and 2000Hz) of at least 60dB in the impaired ear;
- Results in difficulty identifying linguistic information through hearing; and
- Has an adverse effect on the child’s educational performance.

**Data Verification Report**  
Marion County Public Schools  
Issued March 23, 2012

**Mild Mental Disabilities**

Per 707 KAR 1:002 Section 1, (37) in order for a child to be eligible under the mild mental disability (MMD) category the following criteria must exist:

- Cognitive functioning is at least two (2) but no more than three (3) standard deviations below the mean;
- Adaptive behavior deficit is at least two (2) standard deviations below the mean;
- A severe deficit exists in overall academic performance including acquisition, retention and application of knowledge; and
- Manifestation is typically during the developmental period.

**Multiple Disabilities**

According to 707 KAR 1:002, Section 1 (39), multiple disabilities (MD) means “concomitant impairments that have an adverse effect on the child’s educational performance, the combination of which causes severe educational needs that cannot be accommodated in special education programs solely for one (1) of the impairments. Examples of MD include mental disability-blindness, and mental disability-orthopedic impairment. Multiple Disabilities does not mean deaf-blindness nor does it mean a speech or language impairment in combination with another category of disability.”

Based upon the requirement that the impairments must cause “severe educational needs” that cannot be accommodated in special education programs solely for one of the impairments, the DLS team must verify the student met eligibility requirements for all disability areas constituting the multiple disability. DLS must also look for verification that the student’s educational needs could not be met solely in a special education program for one of the impairments.

Examples of disability combinations that triggered increased scrutiny include OHI (ADHD)/EBD, OHI/MMD and OHI/SLD. In addition, some disability categories contain exclusionary factors which would ordinarily preclude some disability combinations. This includes combinations such as MMD/FMD, MMD/SLD and EBD/SLD.

Each file was considered by the review team on a case by case basis considering all data available to the team.

**Other Health Impairment**

Other Health Impairment (OHI), as defined by 707 KAR 1:002, Section 1 (42) means having limited strength, vitality or alertness, including a heightened alertness to environmental stimuli, that results in limited alertness with respect to the educational environment that:

- Is due to a chronic or acute health problem and
- Adversely effects a child’s educational performance

The review team paid particular attention to ARC discussions of how the identified health impairment affects the child’s educational performance. In cases where this is not documented by the ARC as required by the regulations, the DLS Review Team found the district to be out of compliance with IDEA.

**Data Verification Report**  
Marion County Public Schools  
Issued March 23, 2012

**Specific Learning Disability**

Specific Learning Disability (SLD) is defined by 707 KAR 1:002 Section 1 (59) as a disorder that adversely effects the ability to acquire, comprehend, or apply reading, mathematical, writing, reasoning, listening, or speaking skills to the extent that specially designed instruction is required to benefit from education. The term does not include deficits that are the result of other primary determinant or disabling factors such as:

- Vision;
- Hearing;
- Motor impairment;
- Mental disability;
- Emotional-behavioral disability;
- Environmental or economic disadvantaged;
- Cultural factors;
- Limited English proficiency; or
- Lack of relevant research-based instruction in the deficit area

The review team also considered the requirements of 707 KAR 3:10 Section 2 in evaluating compliance for eligibility under the SLD category. Examples of required documentation include:

- Appropriate instruction provided in regular education settings;
- Repeated assessments of achievement at reasonable levels reflecting formal assessment of student progress during instruction;
- Relevant behavior noted during observation(s) and relationship of that behavior to the child's academic functioning (Note: 707 KAR 1:310 Section 1(i) states "behavioral observations" meaning more than one);
- Educationally relevant medical findings, if any; or
- Whether the child does not achieve commensurate with the child's age and ability

**Speech and Language Impairment**

Speech and Language Impairment (SLI) is defined by 707 KAR 1:280 Section 1 (60) as a communication disorder, including stuttering, impaired articulation, a language impairment, delayed acquisition of language or an absence of language that adversely effects a child's educational performance.

The DLS Monitoring Team used the guidelines included in the Kentucky Eligibility Guidelines – Revised (KEG-R) document as an outline for determining compliance with eligibility for special education services under the SLI category.

Although the KEG-R is no longer referenced in the Kentucky Administrative Regulations (KAR), the KEG provides a systematic method for ensuring that all Kentucky Administrative Regulations pertinent to eligibility have been met and that there is consistency across the state.

Whether or not the district uses the KEG-R document, the district must ensure that all eligibility requirements have been met.

**Data Verification Report**  
Marion County Public Schools  
Issued March 23, 2012

**Visual Impairment**

Per 707 KAR 1:002 Section 1 (65), a visual impairment means a vision loss, even with correction that:

- Requires specialized materials, instruction in orientation and mobility, Braille, visual efficiency, or tactile exploration;
- Has an adverse effect on the child's educational performance; and
- Meets the following:
  - The child has visual acuity with prescribed lenses that is 20/70 or worse in the better eye; or
  - The child has visual acuity that is better than 20/70 and the child has one of the following conditions:
    - Medically-diagnosed progressive loss of vision;
    - A visual field of twenty (20) degrees or worse;
    - A medically-diagnosed condition of cortical blindness; or
    - A functional vision loss

**Least Restrictive Environment**

As outlined in 707 KAR 1:350, Section 1, the DLS Review Team verified documentation by reviewing documentation of Least Restrictive Environment (LRE) considerations by the ARC. In making the determination of the setting in which a student's IEP is to be implemented, the district must ensure:

- Special classes, separate schooling, or other removal from the regular education environment occurs only if education in the regular education environment with the use of supplementary aids and services cannot be satisfactorily achieved due to the nature or severity of the disability.
- A continuum of alternative placements is available to meet the needs of children with disabilities for special education and related services
- A child with a disability is not removed from education in age-appropriate regular classrooms solely because of needed modifications in the general curriculum.

**Summary of KDE Team's Findings and District Compliance Status**

The team reviewed current conference summaries and IEPs to ensure these regulatory requirements were met. Any concerns noted in this area are specified in the student-specific feedback below.

Table 1 on the following pages displays the results from the individual *Compliance Record Review Documents* used by the KDE Review Team to determine the status of the student records reviewed. See Appendix A at the end this report for a list of the items reviewed. Under separate cover the Director of Special Education will receive the names of each student in order to match the code used in the table with the student record.

**Data Verification Report**  
 Marion County Public Schools  
 Issued March 23, 2012

**Table 2 – Student Specific Feedback**

<b>Student Specific Feedback</b>	
Student 1	Student file is not in compliance due to lack of specific documentation on least restrictive environment as to why student's needs cannot be met in the general education setting.
Student 2	Student file is not in compliance with evaluation/eligibility requirements. Student was determined eligible in Mild Mental Disability, but he did not have a cognitive or adaptive score two standard deviations below the mean.
Student 3	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 4	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 5	Student file is not in compliance with evaluation/eligibility and LRE requirements. Student was a transfer from CA. District did not have an ARC to determine if KY eligibility had been met.
Student 6	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 7	Student file is not in compliance with eligibility requirements for Multiple Disabilities.
Student 8	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 9	Student file is not in compliance due to lack of progress data on interventions to document whether student made progress or did not make progress.
Student 10	Student file is not in compliance due to insufficient information to support documented disability. Information/data does not support EBD.
Student 11	Student file is not in compliance due to lack of specific documentation on least restrictive environment as to why student's needs cannot be met in the general education setting and documentation of only one observation during reevaluation.
Student 12	Student file is not in compliance due to only one observation being documented during reevaluation.
Student 13	Student file is not in compliance due to lack of specific documentation on least restrictive environment as to why student's needs cannot be met in the general education setting. Documentation of only one observation during reevaluation. Student does not meet eligibility requirements for MMD due to scoring a 74 on Wechsler Intelligence Scale for Children-III in 2005. In 2008, the Full Scale on the Wechsler Intelligence Scale for Children-VI, the Total Score on the Woodcock Johnson-Test of Achievement and the Adaptive Behavior Composite seem to be lower in relation to the scores on the subtests.
Student 14	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 15	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 16	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 17	Student file is in compliance with evaluation, eligibility and LRE requirements.
Student 18	Student file is not in compliance due to lack of specific documentation on least restrictive environment as to why student's needs could not be met in a general education setting.
Student 19	Student file is in compliance with evaluation, eligibility and LRE requirements.

**Data Verification Report**  
Marion County Public Schools  
Issued March 23, 2012

<b>Student Specific Feedback</b>	
Student 20	Student file is not in compliance due to lack of specific documentation on least restrictive environment as to why student's needs could not be met in the general education setting and documentation of only one observation during reevaluation.

**The district is cited** relative to student-specific violations related to placement decisions/LRE (707 KAR 1:350)

**The district is cited** relative to student-specific violations related to evaluation/reevaluation (707 KAR 1:300).

**The district is cited** relative to student-specific violations related to determination of eligibility (707 KAR 1:310).

**Corrective Action Plan Requirements**

707 KAR 1:380 specifies that, after an off-site or on-site review, KDE must issue a written report. Deficiencies (instances of noncompliance) specified in the report shall be the basis for the district to develop a Corrective Action Plan (CAP) for review and approval by KDE. The district has the opportunity to submit additional information or to verify or clarify issues related to the report (prior to the development of the CAP).

Each CAP must be monitored and enforced by KDE.

The district must submit its CAP to KDE no later than 30 business days after the district receives the report. Business day means Monday through Friday except for federal and state holidays as defined by 707 KAR 1:002 (6).

The CAP must include:

- A statement of the matter to be corrected
- The steps the LEA shall take to correct the problem and document compliance

DLS will send a CAP template to the Director of Special Education for development of the district's CAP.

Within 30 business days of receiving the CAP, KDE must notify the district of the status of the CAP. If KDE rejects the CAP, the district has up to 15 business days to submit a new CAP. A CAP, once approved by KDE must be monitored and is an official document requiring the district to meet the specified activities.

KDE will not initiate further sanctions during the time period specified in the CAP unless requested by the district. Any noncompliance found during monitoring must be corrected within one year. The U.S. Department of Education's Office of Special Education Programs (OSEP) specifies the one-year timeline runs from the date KDE notifies the district in writing of the noncompliance until KDE notifies the district in writing that the noncompliance has been corrected.

**Data Verification Report**  
 Marion County Public Schools  
 Issued March 23, 2012

**Student Level and Systemic Noncompliance**

KDE tracks findings of noncompliance and requires correction at the individual student level as required by OSEP. KDE also looks for compliance at a systemic level. For the purposes of KDE monitoring, *systemic* means findings of noncompliance where related issue(s) are occurring more than once. Examples might include:

- Noncompliance across disability categories where documentation of interventions and appropriate research-based instruction did not occur prior to referral.
- The use of only one classroom behavior observation (subsequent to September 7, 2010).

In cases where systemic noncompliance is noted, the district must not only correct the individual student files as necessary, but must also determine the cause(es) for the noncompliance and take steps in the CAP to correct these issues.

Table 3 below includes any student-specific issues that must be addressed through the CAP process. Table 4 includes any systemic issues that must also be addressed.

The district shall be required to submit corrective action plan status reports using the space provided in the electronic CAP template on a quarterly basis to the DLS Team Leader. It is strongly recommended that the district submit copies of student-specific corrections as they occur in order for the team leader to review and provide timely feedback to the district.

**Table 3 – Student Specific Corrective Action Plan (If Applicable)**

<b>Required Student-Specific Corrective Action, if Applicable</b>	
Student 1	The ARC must convene to determine the least restrictive environment of the students based on supports and services that are provided to the student and documentation of why services cannot be provided in the general education setting.
Student 2	The ARC must convene to review all documentation including: recent evaluations, classroom work samples/observations, teacher input, and progress monitoring to determine if the student's disability has an adverse effect on the educational performance.
Student 3	No corrective action is required.
Student 4	No corrective action is required.
Student 5	The ARC must convene to determine the least restrictive environment of the students based on supports and services that are provided to the student.
Student 6	No corrective action is required
Student 7	The ARC must convene to review documentation of interventions provided in new areas of eligibility to determine if intervention data is sufficient based on KARs and KDE eligibility policy letter or if more interventions need to occur prior to determining eligibility.
Student 8	No corrective action is required.

**Table 4 – Corrective Action Plan to Address Systemic Noncompliance** *(If Applicable)*

<b>Required Corrective Action Steps to Address Systemic Noncompliance, if Applicable</b>
<p>Prior to the correction of individual student files, the district must obtain KDE-approved training for all ARC chairpersons, evaluation personnel, special education teachers, and related service providers to cover the following areas:</p> <ul style="list-style-type: none"><li>• Requirements, Consideration, and Documentation of Least Restrictive Environment (LRE)</li><li>• Evaluation and Eligibility Requirements including:<ul style="list-style-type: none"><li>○ Adverse Effect</li><li>○ Documenting research-based interventions</li></ul></li></ul> <p>The training(s) must be conducted and evidence provided to KDE no later than September 28, 2012.</p>
<p>The district must develop and implement a system to ensure ARCs are considering and documenting Evaluation and Eligibility requirements including LRE, adverse effect and interventions appropriately. A summary of the system must be submitted to KDE no later than October 29, 2012.</p> <p>The district must conduct random record reviews of no less than 10% of the special education enrollment. A summary of record reviews and corrections of noncompliance must be provided to KDE quarterly until the CAP has been deemed as completed by KDE.</p>
