Grade 7 Reading

Kentucky Academic Standards Purpose: [KY Standards.Org](http://KYStandards.Org)

The *Kentucky Academic Standards (KAS)* Grades Primary-12 help ensure that all students across the commonwealth are focusing on a common set of standards and have opportunities to learn at a high level. This site provides administrators, teachers, parents, and other stakeholders in local districts with a basis for establishing and/or revising their curricula (for additional guidance, see [Kentucky Model Curriculum Framework](#)).

The instructional program should emphasize the development of students’ abilities to acquire and apply the standards and assure appropriate accommodations are made for the diverse populations of students found within Kentucky schools. The resources found in this site specifies only the content for the required credits for high school graduation (program completion) and primary, intermediate, and middle-level programs leading up to these requirements. Schools and school districts are charged with identifying the content for elective courses and designing instructional programs for all areas.

The purpose of the Kentucky Academic Standards is to outline the minimum content knowledge required for all students before graduating or exiting Kentucky public high schools. Kentucky schools and districts are responsible for coordinating curricula across grade levels and among schools within districts. A coordinated curricular approach ensures that all students have opportunities to achieve Kentucky’s Learning Goals and Academic Expectations.

Multidimensionality:

The Reading, Composition and Language Standards consist of multiple dimensions or layers. The skills and content provide the “what” to help students access concrete and abstract “thinking” needed to practice the “doing” of reading and composing within the discipline. The previous literacy standards document lacked a focused dimensional approach; as a result, the perceived depth of a standard may have been limited to comprehension due to interpretation or deconstruction of opaque wording. By specifying the 3 dimensions separately, this standards document better communicates the intent of each standard so that local instruction and assessment will align to the intended depth. In planning and instruction, teachers will need to know when to utilize the interdependence of a text’s level of comprehension and analysis to develop the students’ skills and knowledge to become independent and proficient thinkers.

Alternate Assessment Targets: (not a standard)

An Alternate Assessment Target represents limits to a selected Kentucky Academic Standard. An Alternate Assessment Target may reduce parts of the standard with specific guidance to what an assessment item could represent. Not all Kentucky Academic Standards selected for assessments will have an Alternate Assessment Target and may display the language: *“No limitations. All parts of the Kentucky Academic Standard are eligible to be included as an assessment item.”* This would mean that the entire standard in its original form is reduced in depth and breadth and is eligible in its entirety to be used in the development of assessment items.
