December 5, 2018

School Report Card – Education Opportunity domain now open for verification and validation

One additional domain has been opened today (Education Opportunity).

In total, there are 4 domains available for district review.

- (1) School Accountability – only DACs, Principals and Superintendents have access
- (2) Transition Readiness
- (3) School Safety - although reviewed in August, the precautionary measures entered by schools are now viewable within the secure School Report Card site.
- (4) Education Opportunity – does still contain one known issue.

NOTE: There is a minor bug present within the Educational Opportunity domain. The issue occurs in the "Industry Certification" data chart and results in only partial data displaying for certain school organizations. BrightBytes is working to resolve the bug as soon as possible so that users can confidently verify their "Industry Certification" data.

BrightBytes and KDE cohosted a webcast on Tuesday, December 4th, a link to that webcast is available online - <https://mediaportal.education.ky.gov/featured/2018/12/student-report-card-district-release/>.

Schools and districts should now be reviewing data; the review period ends for all domains on December 21st. Active confirmation of approval through the validation tool is required this year. A decision can be made locally whether schools must verify independently or not; at a minimum district level approvals are expected. District level approvals are considered by KDE as approval of both school and district level data.

Additional tools that can help ready schools and districts for review are available below.

School Report Card Contacts (SRCC) and DACs will continue to be notified as the other domains are opened for school and district review.

As a reminder, the timeframe for completion of the collection items (Community, Safety Precautionary Measures, Technology and School Profile Programs) has been extended to December 10. BrightBytes has informed KDE that the School Profile Report (SPR) issue that was impacting printing of some school reports has been resolved. All schools should be able to complete the School Profile Report, get signatures and maintain a copy on file at the district board office. BrightBytes will include a link to the unsigned SPR in the SRC.
