

Special DAC Email #2

September 19, 2019

Thank you for your attentiveness at this morning's Quality Control (QC) Day Two webcast.

Multiple questions arose on the indicator cut scores, five star ratings and the overall cuts for bottom 5% for CSI identification. Please see the [cut scores table](#) to assist with identification of ratings on the cut scores.

The overall cut scores for identification of CSI of bottom 5% for middle and high were transposed in today's PowerPoint and will be updated.

Please use the cut scores document for your review.
