Commonwealth of Kentucky
Revised Consolidated State Plan Under
The Every Student Succeeds Act

Using the Revised State Template
Issued: March 2017

OMB Number: 1810-0576
Expiration Date: September 30, 2017

Kentucky Department of Education

Jason E. Glass, Ed.D. Commissioner of Education

May 9, 2022
Introduction

Section 8302 of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), requires the Secretary to establish procedures and criteria under which, after consultation with the Governor, a State educational agency (SEA) may submit a consolidated State plan designed to simplify the application requirements and reduce burden for SEAs. ESEA section 8302 also requires the Secretary to establish the descriptions, information, assurances, and other material required to be included in a consolidated State plan. Even though an SEA submits only the required information in its consolidated State plan, an SEA must still meet all ESEA requirements for each included program. In its consolidated State plan, each SEA may, but is not required to, include supplemental information such as its overall vision for improving outcomes for all students and its efforts to consult with and engage stakeholders when developing its consolidated State plan.

Completing and Submitting a Consolidated State Plan

Each SEA must address all the requirements identified below for the programs that it chooses to include in its consolidated State plan. A SEA must use this template or a format that includes the required elements and that the State has developed working with the Council of Chief State School Officers (CCSSO).

- April 3, 2017; or
- September 18, 2019

Any plan that is received after April 3, but on or before September 18, 2017, will be considered to be submitted on September 18, 2017. In order to ensure transparency consistent with ESEA section 1111(a)(5), the Department intends to post each State plan on the Department’s website.

Alternate Template

If a SEA does not use this template, it must:

1) Include the information on the Cover Sheet;
2) Include a table of contents or guide that clearly indicates where the SEA has addressed each requirement in its consolidated State plan;
3) Indicate that the SEA worked through CCSSO in developing its own template; and
4) Include the required information regarding equitable access to, and participation in, the programs included in its consolidated State plan as required by section 427 of the General Education Provisions Act. See Appendix B.

Individual Program State Plan

A SEA may submit an individual program State plan that meets all applicable statutory and regulatory requirements for any program that it chooses not to include in a consolidated State plan. If a SEA intends to submit an individual program plan for any program, the SEA must submit the individual program plan by one of the dates above, in concert with its consolidated State plan, if applicable.

---

1 Unless otherwise indicated, citations to the ESEA refer to ESEA, as amended by ESSA.
Consultation
Under ESEA section 8540, each SEA must consult in a timely and meaningful manner with the Governor, or appropriate officials from the Governor’s office, including during the development and prior to submission of its consolidated State plan to the Department. A Governor shall have 30 days prior to the SEA submitting the consolidated State plan to the Secretary to sign the consolidated State plan. If the Governor has not signed the plan within 30 days of delivery by the SEA, the SEA shall submit the plan to the Department without such signature.

Assurances
In order to receive fiscal year (FY) 2017 ESEA funds on July 1, 2017, for the programs that may be included in a consolidated State plan, and consistent with ESEA section 8302, each SEA must also submit a comprehensive set of assurances to the Department at a date and time established by the Secretary. In the near future, the Department will publish an information collection request that details these assurances.

For Further Information: If you have any questions, please contact your Program Officer at OSS.[State]@ed.gov (e.g., OSS.Alabama@ed.gov).

By signing this document, I assure that:

To the best of my knowledge and belief, all information and data included in this plan are true and correct.

The SEA will submit a comprehensive set of assurances at a date and time established by the Secretary, including the assurances in ESEA section 8304.

Consistent with ESEA section 8302(b)(3), the SEA will meet the requirements of ESEA sections 1117 and 8501 regarding the participation of private school children and teachers.
Programs Included in the Consolidated State Plan

Instructions: Indicate below by checking the appropriate box(es) which programs the SEA included in its consolidated State plan. If an SEA elected not to include one or more of the programs below in its consolidated State plan, but is eligible and wishes to receive funds under the program(s), it must submit individual program plans for those programs that meet all statutory and regulatory requirements with its consolidated State plan in a single submission.

☒ Check this box if the SEA has included all of the following programs in its consolidated State plan.

or

If all programs are not included, check each program listed below that the SEA includes in its consolidated State plan:

☐ Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies
☐ Title I, Part C: Education of Migratory Children
☐ Title I, Part D: Prevention and Intervention Programs for Children and Youth Who Are Neglected, Delinquent, or At-Risk
☐ Title II, Part A: Supporting Effective Instruction
☐ Title III, Part A: English Language Acquisition, Language Enhancement, and Academic Achievement
☐ Title IV, Part A: Student Support and Academic Enrichment Grants
☐ Title IV, Part B: 21st Century Community Learning Centers
☐ Title V, Part B, Subpart 2: Rural and Low-Income School Program
☐ Title VII, Subpart B of the McKinney-Vento Homeless Assistance Act: Education for Homeless Children and Youth Program (McKinney-Vento Act)

Instructions

Each SEA must provide descriptions and other information that address each requirement listed below for the programs included in its consolidated State plan. Consistent with ESEA section 8302, the Secretary has determined that the following requirements are absolutely necessary for consideration of a consolidated State plan. An SEA may add descriptions or other information, but may not omit any of the required descriptions or information for each included program.

Plan Introduction

In December 2015, the Every Student Succeeds Act (ESSA) replaced the No Child Left Behind (NCLB) Act as federal education law and reauthorized the 50-year-old Elementary and Secondary Education Act (ESEA).

The new law has a clear goal of ensuring our education system prepares every child to graduate from high school ready to thrive in college and careers. ESSA includes some provisions that promote equitable access to educational opportunity, including holding all students to high academic standards and ensuring meaningful action is taken to improve the lowest-performing schools and schools with underperforming student groups.
Kentucky’s Approach to ESSA
From the days of the Kentucky Education Reform Act in 1990, Kentucky has a long history of taking action in the best interest of our children. We do not believe in doing what is easy. We believe in doing what is right. In 2017, the Kentucky General Assembly passed, and the Governor signed sweeping education legislation (Senate Bill 1) that addresses standards, assessments, accountability and school improvement in concert with the requirements of ESSA. Also, in 2017, the General Assembly authorized charter schools (HB 520), creating additional educational opportunities for Kentucky’s students.

During the 2019 legislative session, the Kentucky General Assembly passed and the Governor signed Senate Bill 175 to further refine Kentucky’s implementation of ESSA, particularly as it relates to the development of standards and assessments, postsecondary readiness, and the identification of schools for targeted support and improvement.

Most recently, during the 2020 legislative session, the Kentucky General Assembly passed and the Governor signed Senate Bill 158 (SB 158) that introduced significant changes to the state accountability system and identification of the lowest performing schools, while remaining in alignment with ESSA. Kentucky’s 2021 Consolidated State Plan incorporates changes mandated in SB 158 and aligned regulations that apply to the 2021-2022 school year.

Kentucky will submit a revised Consolidated State Plan in the next review cycle that will incorporate additional significant changes in accountability required by state statute starting with the 2022-2023 school year. Chief among these are the requirement in SB 158 that school accountability for the 2021-2022 school year be based on Status only, and that Change (improvement over time) be included starting next year when sufficient data are available.

Accordingly, this Consolidated State Plan submission focuses on how the ESSA requirements will be met to rate school and student group performance, and identify schools for support and improvement will be done using Status performance on the state’s ESSA indicators.

ESSA and these state laws present an opportunity for Kentucky to renew its commitment to provide a world-class education for all students regardless of the color of their skin, their heritage, the language they speak, their family income, where they live, or whether they have a disability.

These laws have empowered Kentuckians with the freedom to plan, innovate, design and implement a quality education system that is unique to Kentucky, based on Kentucky ideals and values and will ensure opportunity and promote success for all Kentucky students. Kentucky also will provide equitable services to non-public students as required by ESSA for the various federal programs.

As Kentuckians engaged in the development of an accountability system under ESSA and Senate Bill 1 (2017), the Kentucky Department of Education (KDE) simultaneously engaged in a comprehensive strategic planning process designed to bring the department’s work into alignment with ESSA and state laws.

The board’s vision that each and every learner will become a productive, engaged citizen, prepared for school, work and a happy life; the department’s mission, to partner with districts (also referred to as LEAs in the accountability regulation, 703 KAR 5:270), schools, and education stakeholders to provide service, support and leadership to ensure success for each and every student; and the department’s underlying values of equity, achievement,
collaboration, and integrity, provide coherence with the state’s accountability system and Consolidated State Plan which reflect these beliefs and values.

In Kentucky:

- **We value equity** so that all of our students will have the opportunity to graduate from high school with the education and skills they need to go to college or start a career of their choice.
- **We value high achievement** in academics and selection of the careers of students’ choice as well as a well-rounded education for every student.
- **We value integrity** – being open, honest and transparent. We base decisions on multiple, accurate and applicable sources of evidence. We exhibit leadership, service and support in the programs and systems that promote excellence in teaching and learning in meeting the goal of every student being prepared for the next step. **We value collaboration** that promotes mutual learning, maximizing resources, improving programs and services and increasing opportunities and outcomes for all students.

The Kentucky Department of Education’s Strategic Plan includes state-level goals of student readiness and agency goals that support Kentucky’s State Plan by cultivating conditions for all schools and districts to achieve equitable and comprehensive success for all students and promoting a culture of collaboration and continuous improvement.

Kentucky’s Consolidated State Plan is built on a foundation of rigorous standards across all academic areas and high expectations for all students. We take an intentional focus on improving low-performing students and closing the achievement gap between student groups. All indicators in our accountability system will be included in accountability results, disaggregated and reported by student group. Public reporting within the School Report Card will continue to disaggregate and report by student group if the group size is ten or above as long as there are not reporting issues associated with the Family Education Rights and Privacy Act (FERPA). Kentucky’s plan for closing gaps is to move all children up, but to do so faster for those at the lowest performance levels. Through the State Plan, we will make changes to close and eliminate gaps whenever possible.

Our Consolidated State Plan ensures that:

- resources are allocated to support the learning of all students;
- all students have access to rigorous academic standards, coursework and aligned assessments;
- the accountability system moves away from a system of competition among schools and districts, and away from a mentality of compliance in favor of a mindset that promotes continuous improvement;
- the school report card provides a more complete (with academic and non-academic indicators) and transparent view of each school’s and district’s strengths and weaknesses; and
- support is provided to schools with low performance and very low-performing student groups.

**A Focus on the Future of Kentucky**
Kentucky’s State Plan reinforces the Commonwealth’s overall strategy to grow the state’s economy and improve workforce development. Former Governor Matt Bevin, lawmakers and state agency leaders have made it a priority that Kentucky be able to attract new employers and successfully fill jobs statewide with well-educated and skilled individuals from Kentucky. Kentucky’s current Governor, Andy Beshear, upon his election, stated education would be a top priority of his administration.

Kentucky’s Consolidated State Plan spotlights career and technical education (CTE) as a viable means to a high school diploma and preparation for postsecondary education and a career.

Kentucky’s approach continues to blend the lines between traditional academics and career and technical education without sacrificing the quality of either. The state’s effective career pathway system includes opportunities for students to obtain a strong academic foundation along with career and technical content that is provided through seamless programs of study at the high school and postsecondary levels that lead to certifications, credentials and advanced degrees.

Special emphasis has been placed on the ability to prepare students for the state’s five highest demand industry sectors:

- Advanced Manufacturing
- Business and IT Services
- Construction and Trades
- Healthcare and Social Assistance
- Transportation, Distribution and Logistics

A job-needs analysis has defined these sectors and the corresponding career pathways that support them for each region of the state and our schools are aligning programs and offerings to equip graduates to meet the demand.

The state’s accountability system recognizes options for a student to pursue an industry certification, especially in the state’s high-demand industries; engage in an approved registered apprenticeship; or earn dual and/or articulated credit in approved career and technical education courses while still in high school. Opportunities such as the Dual Credit Scholarship and the Work Ready Kentucky Scholarship have made it possible for high school students to earn multiple college credits at no cost +before even completing high school.

**Kentucky’s Accountability System Overview**

At the heart of Kentucky’s State Plan is the state’s redesigned accountability system. The system has students at its center – ensuring they are well-rounded, postsecondary-ready, and empowered and equipped to successfully pursue the pathway of their choice after graduating from high school. The indicators of the multi-dimensional system work together to support several important concepts that promote a valuable educational experience for all of Kentucky’s students:

- Stimulate higher levels of student learning and achievement;
- Report achievement gaps and ensure equity;
- Build a culture of high expectations and continuous improvement;
- Support the quality of school climate and safety; and
- Communicate a clear and honest understanding of the strengths and opportunities for improvement in Kentucky’s schools and districts.
The system uses multiple academic and school quality measures, not a single test or indicator. An overall rating is determined by setting standards for performance on the following exclusive state indicators: State Assessment Results in Reading and Mathematics, State Assessment Results in Science, Social Studies, and Writing, English Learner Progress, Postsecondary Readiness, Graduation Rate, and Quality of School Climate and Safety. Each state indicator evaluates status (current year performance). Performance on these indicators will contribute to a school’s/district’s overall performance rating. Academics will count significantly more than school quality factors. Additional information will be publicly reported to provide a complete picture of education in Kentucky.

KDE staff consulted with the KBE as the accountability system was developed (February 7, 2017, Item III. and April 11, 2017 meeting, Item III.) and brought the regulation that provides the specifics of the system before the board (June 7, 2017 meeting, Item XXI.) for a first reading. Feedback was gathered from board members on potential edits to the regulation and the revised regulation came back to the KBE (August 2, 2017 meeting, Item III) for a second reading. A third reading and approval of 703 KAR 5:270, Kentucky’s accountability system, occurred during a special called meeting on August 23, 2017 (Item VI.A.).

In spring 2018, 703 KAR 5:270, Kentucky’s accountability system, was reviewed and accepted by the Legislative Research Commission’s legislative committees. Based on the approved regulation, 2017-2018 results were reported to the KBE (October 2, 2018 meeting, Item XI).

Following the results presentation, the KBE (October 3, 2018 meeting, Item V) discussed for a first read amendments to the Transition Readiness Indicator in Kentucky’s Accountability Regulation, 703 KAR 5:270. During the discussion, Former Commissioner Lewis directed Associate Commissioner Sims to convene a workgroup to discuss the growth indicator and bring back recommendations.

In December 2018, the KBE discussed the recommendations from the growth indicator workgroup (December 5, 2018 meeting, Item XIII) and had a second read (December 5, 2018 meeting, Item XIV) of the accountability regulation. The board approved the recommendations and the regulation was filed for public comment. The regulation was approved by the KBE at its February 6, 2019 meeting.

After the February 2019 board meeting, the regulation was filed with the Legislative Research Commission to move through the legislative review committees. During this time, the Kentucky General Assembly was in session and passed state legislation that required an amendment to Kentucky’s accountability regulation. Senate Bill 175 (2019) changed the requirements for post-secondary readiness under our Transition Readiness Indicator. The KBE amended the regulation at its April 10, 2019 meeting (Item XII.A.2.) to align the regulation to state law. The amended regulation was refiled with an amendment to the Legislative Research Commission and then finished to move through the regulatory process and became effective May 31, 2019.

In September 2019, staff at the KDE were informed by the United States Department of Education that the calculation for the Transition Readiness Indicator in the accountability system needed to include all grade 12 students, not just those who graduate. The accountability regulation included a detailed explanation of how transition readiness shall be calculated, and it did not include all grade 12 students. After receiving feedback that all grade 12 students must be included, the accountability regulation was
presented back to the Board at its [December 4, 2019 meeting](#) (Item XIX.A.1.) for an amendment to the Transition Readiness Indicator. The Board approved the amendment and agreed to waive the second reading of the regulation so that the regulation would move through the regulatory process quicker and become effective with the federally required changes.

A sixty-day public comment period followed ending February 29, 2020 as is required by state statute. After comments were received, the department responded to comments and presented a Statement of Consideration to the board at its April 9, 2020 meeting that the Board approved. The regulation was filed with the Legislative Research Commission and moved through the legislative committees and became effective July 31, 2020.

Simultaneously, Senate Bill 158 was passed by the 2020 Kentucky General Assembly and Governor Andy Beshear signed it into law on April 24, 2020. SB 158 significantly modifies components of the statewide accountability system. The law stipulates implementation dates of the accountability system provisions and revised the criteria for determining Targeted Support and Improvement (TSI) and Additional Targeted Support and Improvement (ATSI). The KBE held discussions on SB 158 at its August 6, 2020, October 7, 2020, November 6, 2020 meetings and had the first read of the regulation on December 2, 2020. The second read and final approval of the regulation occurred on February 3, 2021.

The amended regulation was filed with the Legislative Research Commission, moved through the legislative committees and became effective November 30, 2021.

Below is a high-level summary of the complete accountability system. Indicators that align to ESSA requirements will be used in 2021-2022 public reporting to identify low performing schools. See Tables A and B below for explanation of alignment to ESSA.

</table>
| adjusted cohort in accountability (weighted equally), which recognizes the persistence of students and educators in completing the requirements for a Kentucky high school diploma.  
- Schools with a graduation rate of less than 80% based on the 4-year adjusted cohort rate will be identified for Comprehensive Support and Improvement. | |
| **Postsecondary Readiness** *Attainment of the knowledge, skills, and dispositions for a student to successfully transition to the next level of his or her education career.* |  
- Schools earn credit when grade 12 students achieve academic readiness or career readiness (additional credit on industry certifications for those in high-demand sectors). |
| **Progress Toward English Language Proficiency (ELP)** |  
- English learners earn credit as they make progress toward achieving English proficiency. Kentucky’s long-term goal increases the proportion of proficient English language learner (EL) students making significant progress toward becoming proficient in the English language. |
| **Quality of School Climate and Safety** *Provides insight into the school environment.* |  
- Measures include perception data from surveys that offer an awareness of the school atmosphere. |

### The Overall Accountability Performance Rating

Each school and district (LEA) will be assigned an overall performance rating, which will be calculated as a weighted average of the school’s or district’s performance on the set of indicators. A color-coded system will be used to communicate performance of schools, districts, state, and student demographic groups. Performance of schools, LEAs and state will be reported by level (elementary, middle, and high) based on a composite score. Federal designations of Comprehensive Support and Improvement (CSI), Targeted Support and Improvement (TSI) and Additional Targeted Support and Improvement (ATSI) will be assigned to each school meeting the criteria.

The tables below demonstrate the alignment of Kentucky’s accountability indicators to the Every Student Succeeds Act (ESSA). All indicators will be used to assign schools an overall performance rating and to identify schools for CSI, TSI, and ATSI.

The following table demonstrates the alignment of state indicators to required components of ESSA.

### Accountability System Highlights

- The accountability system fully complies with ESSA requirements, based on measures in each of the required ESSA indicators and identification of schools for Comprehensive and Additional Targeted Support and Improvement.
- For 2021-2022, overall performance ratings include current year performance (status).
- Equity and excellence are at the center of the system with other components designed to report the achievement gaps.
- While reading and mathematics are academic achievement measures, as required by ESSA, writing, science, and social studies are included, where appropriate, to promote a well-rounded educational experience and the opportunity for students to demonstrate math and reading skills in other content areas.
- The School Quality/Student Success Indicator in high school includes measures of “postsecondary readiness” that reflect Kentucky’s long-standing work to develop strong measures for both indicators and gives students choice by offering academic readiness and career readiness options.
- Special attention has been given to ensure the system is fair, reliable, minimizes “gaming” and reduces other unintended consequences.
- The accountability system is intended to be flexible so it can adapt without requiring extensive modifications as new assessments are implemented and/or additional measures for the system are developed.
- Using a basic color-coded scheme, reporting by indicator will provide insight into school and student performance.

### Accountability Reporting

School and district accountability performance was last reported in fall 2019 and will continue to be reported in an online report card. The report for each school or district contains graphics displaying the overall identification blue, green, orange, yellow and red (with blue being the highest and red the lowest) federal designations (i.e., CSI, TSI and ATSI), the combined color-coded performance on indicators.
Kentucky’s accountability system includes indicators that contribute to a formal accountability rating. Other educational factors are reported on the School Report Card in a school profile report to provide a broader view of performance through information that is clear, accurate, evaluated and actionable.

The disaggregation of individual student group data is accessible at the click of a mouse or keyboard stroke, as are the reported-only factors.

Long-term and interim goals were developed based on performance in the 2018-2019 school year. Progress toward these goals will be reported annually.

Parents and guardians will still receive individual reports for their students’ performance on state assessments.

Below is an example of the graphics used to display data within Kentucky’s 2018-2019 School Report Card. The reporting will be adapted in the future as additional measures are developed.
Closing Achievement Gap is Central Focus
Throughout the accountability system is an intentional focus on improving the performance of students that are low performing and closing the gap between the performances of student groups. All indicators in the system are disaggregated and reported by student group, if the group size is ten or above. Through the collection of Quality of School Climate and Safety survey data, schools will receive valuable information on school climate, students’ relationships to their teachers and other students and how safe the school is perceived to be. These are potentially powerful new catalysts for school improvement and student achievement. The theory of action is that Kentucky will see the gap between student group performances decrease, if all students are engaged, held to high expectations and feel protected. A key principle is to hold all students to the same rigorous standards for proficient performance and postsecondary readiness. In the State Assessment Results in Reading and Mathematics Indicator, weighting increases as students move from the student performance levels of apprentice to distinguished. No credit in the indicator is earned for the lowest level of novice.

Identifying and publicly reporting achievement gaps within a school, district or state is the most direct communication method to raise awareness of existing gaps. The state is very transparent relative to this measure. Reporting includes each student group with a minimum number of ten in reading and mathematics performance.

Note: The graphic below shows graduation rate reported. The design will be developed annually based on measures for the reporting year.
School Improvement and Support

Kentucky has been recognized nationally for its success in the area of school improvement. (See the study by Mass Insight). Looking forward and considering the freedoms permitted in ESSA, Kentucky seeks to expand upon its successes to continue serving its struggling schools.

In accordance with the provisions of the Every Student Succeeds Act and Kentucky’s Senate Bill 1 (2017), Senate Bill 175 (2019), and Senate Bill 158 (2020). Title I and non-Title I schools with low accountability performance and ratings will be identified for Targeted Support and Improvement as well as Comprehensive Support and Improvement. Kentucky has chosen to identify both Title I and non-Title I schools in an effort to provide equitable support for all of the state’s students.

Targeted Support and Improvement –

☑ Targeted Support and Improvement – Schools where one or more of the same subgroups are performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle, or high school) based on school performance, for three consecutive years (identified annually, beginning school year 2021-2022).

Additional Targeted Support and Improvement –

☑ In the fall of 2019, schools that included one or more subgroups performing as poorly as all students in any lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle, or high school) based on school performance.

☑ Beginning in the fall of 2022 and every three years thereafter, schools identified for Targeted Support and Improvement in the immediately preceding year that include one or more subgroups performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle, or high school) based on school performance.

Comprehensive Support and Improvement – Identified annually in 2018 and 2019. Kentucky will not identify CSI schools in 2020 or 2021; however, beginning in the fall of 2022, schools will be identified once every three years if they are:
• Bottom 5% of Title I or non-Title I schools (by level – elementary, middle, or high school); OR
• A high school with less than an 80% graduation rate, based on the 4-year adjusted graduation rate; OR
• A Title I or non-Title I school that was previously identified for Additional Targeted Support and Improvement for at least three years and has not exited.
• The support provided by the state will be differentiated depending on school need, state capacity and other relevant factors.

The state regulation governing School Improvement and Support under ESSA and Senate Bill 1 became effective on August 6, 2018. These regulations are located at 703 KAR 5:225 and 703 KAR 5:280. 703 KAR 5:280 is currently in the legislative regulatory approval process to align with this revised Consolidated State Plan, as approved.

Content Standards Revision
Kentucky has begun a standards development/revision and adoption process as specified in state statute per Kentucky KRS 158.6453 to include Kentucky educators, business and industry professionals and representatives from higher education. This process will allow for a thorough consideration by stakeholders to ensure the standards meet the needs of Kentucky’s students.

Advisory Panels and a Standards and Assessment Review Committee for each content area will conduct the revision process. Stakeholder feedback is being gathered at the onset of the standards development process as well as during a public review/comment period as to allow all Kentuckians an opportunity to participate.

A Standards and Assessment Process Review Committee will review the entire process that was used for revision/replacement to ensure that stakeholders had an adequate opportunity for input and if this committee finds that the process was sufficient, the recommended standards will go to the KBE for approval.

Once the Kentucky Board of Education approves the revised standards, they will proceed through the regulatory review process, including a public hearing and review by the Legislative Research Commission’s legislative committees. Standards will be implemented in all Kentucky public schools no later than the second academic year following the revision process. As specified in KRS 158.6453, the current Kentucky Academic Standards (KAS) will remain in place until the revision process is completed and the new standards are adopted by the KBE. Revisions to assessments, in order to align with the new standards, will lag behind the standards revisions by at least one year. The accountability system will adjust in the future to accommodate new content standards and assessments.

Reading and writing, mathematics, social studies, health education, physical education, computer science and career studies standards were revised during 2017 and are now formally adopted. Following these, world languages, technology, and library/media standards have been revised. Revision of science standards will occur in 2020-2021, and revision of visual and performing arts standards in 2021-2022 will follow. Thereafter, revisions will occur on a rotating cycle every six years.

State Plan Goals
Goals provide concrete, measurable indicators of aspirations and benchmarks against which to measure progress. The goals are based on improvement of performance for a class of students starting in kindergarten for the first year of the plan and graduating in the year 2030. Intermediate goals were also established in three-year intervals from a 2018-2019 baseline to 2030.
In general, Kentucky’s goals are to:

- Increase academic achievement significantly for all students in the state;
- Decrease the achievement gap to 100% proficiency of all students and each student group by 50%;
- Significantly increase the cohort graduation rate to 95% (four-year rate) and 96% (five-year extended rate) for all students and each student group through reducing by 50% the gap between the baseline and graduation rate and the end goals of 95% and 96%; and
- Increase the proportion of proficient English language learner (EL) students making significant progress toward becoming proficient in the English language.

Specific goals are set for each student group based on where it starts and the desired outcome. These are very ambitious goals. This rate of improvement has never been seen in Kentucky or any state in the nation. (See specific goals in Appendix A.)

**Improvement Over Previous Elementary and Secondary Education Act (ESEA) Plan and System of Accountability**

Kentucky’s Consolidated State Plan under ESSA transcends the previous system under its federal predecessor, NCLB, and provides real promise of finally closing achievement gaps and success for all students.

The theory of action is that Kentucky will see the gap between student group performances decrease if all students and student groups are held to the same high expectations.

Under NCLB, accountability became solely about test results, school performance and a narrowing of the curriculum. It created competition among schools and decision making that often served to support the best interest of adults rather than students. Kentucky’s amended accountability system places the focus back on the student.

The system provides an emphasis on strong, standards-based instruction and new assessments that are aligned with rigorous standards. It includes a broader view of student proficiency with the inclusion of science and social studies state assessment results, rather than just math and reading. A key principle is to hold all students to high expectations and the same rigorous standards for proficient performance and postsecondary readiness.

While Kentucky’s accountability system under ESSA does rely heavily on the results of state assessments for many of its indicators, it gets away from solely relying on “high-stakes testing” of the past by also incorporating measures of school climate and safety. Educators may benefit from survey data that provide actionable information on climate for learning, relationships between students, teachers and possibly parents, and approaches to teaching that are student centered.

Furthermore, the individual choices that are offered under the postsecondary readiness indicator at the high school level provide students with real options for graduating from high school and either pursuing a career or going to college or a combination thereof.

**Community Engagement and State Plan Development**

KDE recognizes that ongoing and meaningful stakeholder engagement is essential to the effective development and successful implementation of Kentucky’s State ESSA Plan.

Thus, the plan and more specifically its centerpiece, an accountability system, has been developed through a very transparent and inclusive process, with the input of thousands of Kentuckians.
In spring 2016, Former Commissioner of Education Stephen Pruitt and Associate Commissioner from the Office of Assessment and Accountability Rhonda Sims embarked upon a series of 10 face-to-face Town Hall meetings held across Kentucky and one conducted virtually. The Town Halls were publicized widely including on social media, by partner organizations, through the commissioner’s weekly email to superintendents and principals, in the commissioner’s blog and in Kentucky Teacher, the department’s online publication for teachers. Participants told KDE what they valued in their schools and how they defined school success. There was strong media coverage of the actual events and an online survey provided additional opportunities for feedback. More than 3,000 people participated with KDE using the comments to shape the work that led to the development of the accountability system and ultimately to the state plan.

All during the process, department staff have been intentional in making sure representation from all stakeholder groups were at the table – on the Accountability Steering Committee and work groups – as a public education system was built under ESSA that would promote quality programs, school improvement, educational access and create more opportunities for all students. In summer 2016, KDE assembled nearly 200 diverse individuals and assigned them to work groups to examine the issues based on the system’s goals and make recommendations on a accountability system that would be a catalyst for school improvement and every child succeeding.

Five work groups conducted the detailed work in these areas: Educational Innovations, Opportunity and Access, College and Career Readiness, Assessment and School Improvement. Each work group consisted of approximately 10-30 persons selected for their expertise and diversity of perspective and experience.

Additionally, a Systems Integration work group was charged with integrating the work of the five work groups into a coherent set of recommendations that would specify the key design features of the accountability system. The Consequential Review work group would check for possible unintended consequences of the recommended system; and the Regulatory Review work group would check for possible legal issues, including whether the recommendations met federal and state requirements, whether any recommendations conflicted with federal and state requirements, and whether the recommendations implied any recommendations for requests for changes in state law.

See Appendix C for a list of Steering Committee and Work Group meetings.
Developing Kentucky’s Accountability System

As the accountability system developed, the department sought input through meetings with the commissioner’s existing advisory groups which included teachers, principals, superintendents, local school board members, parents, students and representatives from career and technical education, exceptional children, gifted and talented children and the School Curriculum, Assessment and Accountability Council as well as partner groups and legislators.

In March 2017, with the basic tenants of a system in place, the department embarked on a series of Town Hall meetings across the state and posted online resources as well as an additional online opportunity for feedback. Again, the meetings were publicized widely including on social media, by partner organizations, through the commissioner’s weekly email to superintendents and principals, in the department’s Parent Info newsletter and in Kentucky Teacher. This time, more than 2,000 people participated and even more received the message about the configuration of the system through blogs and media coverage. The department developed a summary of comments that was further used to refine the accountability model.

Additional community engagement opportunities included the commissioner’s advisory councils and a wide array of speaking engagements Former Commissioner Pruitt made (listed on p.28).

In addition, each year the commissioner presents a State of Kentucky Education Report that documents current school performance, areas of excellence and identifies areas for improvement. The 2017 State of Kentucky Education Report included an original research study, A Focus on Equity for All Students, which highlighted the achievement gap, disparity in expectations and the lack of opportunity and access for various student groups, which informed the accountability system and Kentucky’s Consolidated State Plan.

Finally, as the accountability system and State Plan were completed, the department sent out a notice of public comment on Wednesday, August 16, 2017, through a variety of communication channels. A final public comment period was provided from August 16-September 5, 2017 with comments accepted through email, mail, and an online survey. Changes were made to the plan as a result of reviewing the comments.

Every Student Succeeds Act (ESSA)

Published: 10/19/2019 3:48 PM

The Every Student Succeeds Act (ESSA) was signed by President Obama on December 10, 2015. ESSA includes provisions that will help to ensure success for students and schools across the country, including Kentucky. According to the U.S. Department of Education, ESSA:

- Advances equity by expanding protections for America’s disadvantaged and high-needs students.
- Requires—for the first time—that all students in America be taught to high academic standards that will prepare them to succeed in college and careers.
- Ensures that valid information is provided to educators, families, students, and communities through annual statewide assessments that measure students’ progress toward those standards.
- Helps to support and grow local innovations—including evidence-based and place-based interventions developed by local leaders and educators—consistent with our Investing in Innovation and Promise Neighborhoods.
- Maintains an expectation that there will be accountability and action to effect positive change in our lowest-performing schools, where groups of students are not making progress, and where graduation rates are low over extended periods of time.

Under the federal Every Student Succeeds Act (ESSA), state education agencies, including the Kentucky Department of Education, are required to submit a plan detailing the implementation of the law and how federal education dollars will be spent. The latest version of Kentucky’s Consolidated State Plan was most recently approved by the U.S. Department of Education in September 2019.

ESSA provided an opportunity for Kentucky to create a new accountability system that will be used as the basis to better our schools and celebrate their educational progress. The goal is to produce a system that will improve the education and readiness of all Kentucky students and is fair, reliable and valid. The Kentucky General Assembly provided further direction how the accountability system should work when it passed Senate Bill 1 (2017).

The following table illustrates many of the stakeholder engagement opportunities that Kentucky residents had to provide input on the accountability system during its development and refinement.

When the 2017-2018 school accountability results were publicly reported, additional feedback was provided. Adjustments to the system and the need to revise the regulation became apparent. Additional feedback was solicited on the revisions of the accountability system regulation 703 KAR 5:270. The following table demonstrates opportunities that Kentucky educators had to provide input on the refinement of the regulation.

In fall 2019, state accountability results in Kentucky’s 5-star accountability system were reported for the first time, and accountability results for the federal school identifications were reported.

Senate Bill 175 (2019) required that the KDE convene a committee to analyze assessment results and the expected impacts and unintended consequences of the state’s accountability system, and report the results of these analyses to the Interim Joint Committee on Education (IJCE) by December 2019 and again by December 2020. Note: As a result of the March 27, 2020, USED-approved waiver of the assessment, accountability and reporting requirements for the 2019-2020 school year, the December 2020 analysis report could not be generated or provided to the IJCE.

In compliance with this requirement, the KDE established a committee of 28 members drawn from a wide range of responsibilities throughout the state. In compliance with the statute, the committee included school superintendents, school administrators, district assessment coordinators, a member of the Council.
A report and presentation on the committee meeting were presented to the IJCE on November 20, 2019. A few highlights from the meeting include,

- The main results were that the accountability system was calculated and reported as expected.
- The assessment and accountability systems were reported as negotiated via Kentucky’s Every Student Succeeds Act (ESSA) state plan.
- Administration and reporting were completed well without any major incidents.
- Schools’ performance on multiple measures were reported, and overall performance reported in a simple 5-star rating. There was a range of scores, with most in the middle (3-star).
- Schools and districts received detailed data to help them identify areas of strength and where they could improve.
  - Lower-performing schools were identified to receive state and district support.
  - Statewide analysis showed that in general:
    - Some schools performed well, even with challenging circumstances.
    - Achievement is lower than desired and has not improved much on most indicators.
    - There are large achievement gaps between groups.

Senate Bill 158, passed during the 2020 General Assembly session, aimed to overhaul the state’s school accountability system and align the identification of the lowest performing schools to ESSA. The bill defined and exclusively listed components to hold schools accountable for student performance. During the summer and fall of 2020, feedback and input from multiple groups was gathered to amend the system. The following chart shows groups that provided feedback.

Section A. Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies (LEAs)

1. Challenging State Academic Standards and Assessments
(ESEA section 1111(b)(1) and (2) and 34 CFR §§ 200.1–200.8)\(^2\)

The Kentucky Academic Standards (KAS), grades kindergarten -12, help ensure that all students across the state are focusing on a common set of standards and have opportunities to learn at a high level. The documents, which are incorporated by reference into state regulation 704 KAR 3:303, Required Academic Standards, and 704 KAR Chapter 8 Academic Standards provide administrators, teachers, parents and other stakeholders in local districts with a basis for establishing and/or revising their curricula. Kentucky is committed to standards that focus on critical knowledge, skills and capacities needed for postsecondary readiness and success in the global economy.

The KAS specifies the content for the required credits for high school graduation as well as primary, intermediate, and middle level programs leading up to these requirements. Schools and school districts are charged with identifying the content for elective courses and designing instructional programs for all areas.

Schools and school districts also are responsible for coordinating curricula across grade levels and among schools within districts. A coordinated curricular approach ensures that all students have opportunities to experience success with Kentucky’s learning goals and academic expectations.

The KDE aligned course codes to the KAS to ensure equitable access to rigorous courses for ALL students. The course codes support the importance of providing students the opportunity to enroll in courses in all subject areas and improve the quality education experience and exposure throughout their education career.

Kentucky is in the standards development/revision and adoption process as required by KRS 158.6453 to include Kentucky educators, business and industry professionals and representatives from higher education. This process will allow for a thorough consideration of how much change is needed to ensure the standards meet the needs of Kentucky’s students. Advisory Panels, review committees and a Standards and Assessment Process Review Committee for each content area will conduct the revision process and decide how much revision/replacement of existing standards is needed.

Stakeholder feedback is gathered at the onset of the standards development process as well as during a public review/comment period to allow all Kentuckians an opportunity to participate.

A Standards and Assessments Process Review Committee will review the entire process that was used for revision/replacement to ensure that stakeholders had an adequate opportunity for input and if this committee finds that the process was sufficient, the recommended standards will go to the KBE for approval. Once the state board approves the revised standards, they will proceed through the regulatory review process, including a public hearing and review by the Legislative Research Commission’s legislative committees. Standards will be implemented in all Kentucky public schools no later than the second academic year following the revision process. As specified in KRS 158.6453, the current KAS will remain in place until the revision process is completed and the new standards are adopted by the

\(^2\) The Secretary anticipates collecting relevant information consistent with the assessment peer review process in 34 CFR § 200.2(d). An SEA need not submit any information regarding challenging State academic standards and assessments at this time.
KBE. Revisions to assessments, in order to align these with the new standards, will lag behind the standards revisions by at least one year.

Reading and writing, mathematics, social studies, health education, physical education, computer science and career studies standards were the first content areas to undergo the revision process during 2017-2018. Following these, world languages, technology, and library/media standards have been revised. Then, revision of science standards began in 2020-2021 and revision of visual and performing arts standards in 2021-2022 will follow. Thereafter, revisions will occur on a rotating cycle every six years.

As well as establishing the requirement for standards described above, KRS 158.6453 established the requirement for Kentucky-developed assessments. It also outlines processes to ensure the alignment between the state’s standards and its assessments. The law defines the state testing requirements and provides broad parameters for the Commonwealth’s accountability system. With the exception of a college admissions exam at grades 10 and 11, summative assessments must involve Kentucky educators in the development process.

KRS 158.6453 requires assessments in reading, writing (i.e., on-demand tests and editing and mechanics) and mathematics. Consistent with ESSA, reading and mathematics are required annually in grades 3-8 and once at high school. Writing, science and social studies are required once per grade span (i.e., elementary, middle and high school). A college admissions exam is required to be administered at grades 10 and 11. Although testing is required for a grade 10 college admissions exam, funding was not allocated. Until funding is secured, Kentucky will continue to administer the college admissions exam at grade 11. Students with the most significant cognitive disabilities, approximately 1% of Kentucky’s students, participate in the alternate assessment aligned with alternate academic achievement standards (AA-AAAS). The law charges the KBE to revise the annual statewide assessment program as needed to ensure alignment between assessments and revised academic standards.

KRS 158.6453 removes previously used norm-referenced test components and requires criterion-referenced tests based on Kentucky standards. A variety of assessment types are allowable including multiple-choice, open response, competency-based and performance items. A subset of operational items will be released from the summative tests annually.

With the standards revision schedule and processes provided in KRS 158.6453, the assessment program will experience change periodically. Since standards are revised on a rotating schedule, associated assessments will also be subject to this same pattern with a delay for development and field testing. New reading, mathematics, and social studies standards will be operational in the 2021-2022 state assessments. In science, a new operational assessment began in 2017-2018. At elementary and middle school levels, Kentucky’s existing assessments are custom developed. As required by SB1, assessments are based on Kentucky standards and involve Kentucky educators in the development process.

Kentucky developed a field test for the spring of 2019 summative assessments in reading and writing and mathematics. Beginning in the 2021-2022 school year, a new grade 10 reading assessment will assess the standards aligned to the courses of English I and English II; the grade 10 mathematics assessment will assess the standards aligned to the courses of Algebra I, Geometry. A new summative social studies test has been developed based on revised standards and will be operational in Spring 2022.

The table below summarizes Kentucky’s testing plan for 2021-2022.

2. **Eighth Grade Math Exception**  
*(ESEA section 1111(b)(2)(C) and 34 CFR § 200.5(b)(4))*:

   i. Does the State administer an end-of-course mathematics assessment to meet the requirements under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA?  
      ☐ Yes ☑ No  

   ii. If a State responds “yes” to question 2(i), does the State wish to exempt an eighth-grade student who takes the high school mathematics course associated with the end-of-course assessment from the mathematics assessment typically administered in eighth grade under section 1111(b)(2)(B)(v)(I)(aa) of the ESEA and ensure that:

      a. The student instead takes the end-of-course mathematics assessment the State administers to high school students under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
      ☐ Yes ☑ No  

      b. The student’s performance on the high school assessment is used in the year in which the student takes the assessment for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA;
      ☐ Yes ☑ No  

      c. In high school:

         i. The student takes a State-administered end-of-course assessment or nationally recognized high school academic assessment as defined in 34 CFR § 200.3(d) in mathematics that is more advanced than the assessment the State administers under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
         ☐ Yes ☑ No  

         ii. The State provides for appropriate accommodations consistent with 34 CFR § 200.6(b) and (f); and  

         iii. The student’s performance on the more advanced mathematics assessment is used for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA.  
      ☐ Yes ☑ No  

   iii. If a State responds “yes” to question 2(ii), consistent with 34 CFR § 200.5(b)(4), describe, with regard to this exception, its strategies to provide all students in the State
the opportunity to be prepared for and to take advanced mathematics coursework in middle school.

3. Native Language Assessments

(ESEA section 1111(b)(2)(F) and 34 CFR § 200.6(f)(2)(ii) and (f)(4):

i. Provide its definition for “languages other than English that are present to a significant extent in the participating student population,” and identify the specific languages that meet that definition.

Spanish, is spoken by 2.63% of Kentucky’s K-12 total school population. The KDE’s definition for “languages other than English that are present to a significant extent in the participating student population” includes Kentucky’s most populous language; therefore, Kentucky’s definition is a language greater than 2.63%. Kentucky has a diverse group of English learners speaking 134 documented languages.

The table below is based on 2017-2018 data and displays Kentucky’s top 20 home language occurrences in relationship to Kentucky’s total school population.

</table>
While Kentucky has a diverse number of home languages and cultures, English learners in Kentucky are concentrated in particular districts across the Commonwealth. Approximately three-fourths (74%) of Kentucky’s English learners are enrolled in ten (10) of Kentucky’s 173 school districts.

Kentucky’s definition for languages other than English that are present to a “significant extent” was developed with Kentucky teachers and administrators who work directly with English learners (ELs). The conversation occurred during the August 1, 2017 standards setting workshop for ACCESS for ELLs, Kentucky’s English language proficiency assessment. The committee recommended that Kentucky’s “significant extent” definition be based on the percent of speakers by home language compared to the state’s total student population. The KDE accepted the committee’s recommendation that a language other than English that is present in greater than 5% of the total school population meets the threshold for “significant extent”; however, after further guidance from the U.S. Department of Education, Kentucky expanded the definition to incorporate its most populous language (Spanish).

If home language occurrence increases to 5% or greater of the total population, a committee of Kentucky educators and stakeholders would be convened to review student population data including the distribution of the population across grades and to determine whether Kentucky should develop summative content area assessments in the home language.

The Spanish home language represents over 60% of the state’s EL population. In 2016-17, at the local level, 12 LEAs in school year 2016-17 had more than 5% of their total school population identify Spanish as the home language, meeting Kentucky’s “significant extent” definition. At a state level, English learners whose home language is Spanish increased from 1.9% to 2.4% of the total student population between 2013 and 2017. The 2.4% Spanish home language for the state reflects K-12 enrollment.

An analysis by grade finds the greatest percentage of Spanish home language students at the earlier grades as illustrated in the following table.

ii. Identify any existing assessments in languages other than English and specify for which grades and content areas those assessments are available.

The home language occurrence of Spanish in some of Kentucky’s LEAs is greater than the 2.63% of the total student population seen at the state level and meets Kentucky’s definition of “significant extent” described above. While assessments in the home language are not produced by Kentucky, Kentucky’s regulation governing testing accommodations does offer a range of supports for English learners on the state summative content area assessments. Specifically, qualified English learners may receive specific accommodations of oral native language with extended time, use of word-to-word dictionaries, and scribe. Oral native language support shall be based on a student’s individual language needs as documented in the Program Service Plan (PSP). This accommodation may range from assistance with specific vocabulary to a sight translation that means rendering printed English test materials (i.e., directions, questions, prompts, situations, passages and stories as written) orally in the student’s native language. The accommodation or oral native language support shall include providing directions orally in a student’s native language. The accommodation shall also incorporate some simplification of language in the test administration directions.

iii. Indicate the languages identified in question 3(i) for which yearly student academic assessments are not available and are needed.

Although Spanish is present to a significant extent (2.63%) in the current student population, it has not met the 5% threshold to begin discussion to create an assessment in the native language.

iv. Describe how it will make every effort to develop assessments, at a minimum, in languages other than English that are present to a significant extent in the participating student population including by providing

a. The State’s plan and timeline for developing such assessments, including a description of how it met the requirements of 34 CFR § 200.6(f)(4);

b. A description of the process the State used to gather meaningful input on the need for assessments in languages other than English, collect and respond to public comment, and consult with educators; parents and families of English learners; students, as appropriate; and other stakeholders; and

c. As applicable, an explanation of the reasons the State has not been able to complete the development of such assessments despite making every effort.

- Kentucky does not currently have a need to produce an assessment in a home language. The state will continue to monitor languages other than English and will explore new supports for test takers in future online testing environments.

- Kentucky utilizes routinely two key groups in the state to discuss improvement of instruction and assessment for English Learners including the English Learner (EL) Coordinators and the District Assessment Coordinators. Both groups, comprised of LEA leaders, assist the SEA in planning and implementing supports and improvements in curriculum, instruction and assessment. As program changes are developed that impact English learners and all Kentucky students, a variety of advisory groups are consulted. Kentucky’s state consolidated plan and accountability regulation were released for public comment. No comments were received related to native language assessments.
• Kentucky is committed to the continuing support and development of our English learners. Kentucky provides a number of testing accommodations and supports for ELs. These are defined in Kentucky regulation 703 KAR 5:070, Inclusion of Special Populations in the State-Required Assessment and Accountability Programs. The accommodations and supports include reader, simplified language, extended time, oral native language with extended time, use of word-to-word dictionaries, and scribe. Details associated with providing the accommodations can be found in the KAR regulation.

Statewide Accountability System and School Support and Improvement Activities

*(ESEA section 1111(c) and (d)):

i. Subgroups

*(ESEA section 1111(c)(2)):

a. List each major racial and ethnic group the State includes as a subgroup of students, consistent with ESEA section 1111(c)(2)(B).

Student groups included in Kentucky’s accountability system include: White, African American, Hispanic or Latino, Asian, Native Hawaiian or other Pacific Islander, American Indian or other Alaska Native, two or more races, free/reduced-price meal eligible, students with disabilities who have an Individual Education Program (IEP) and English learners. Although not required in the accountability determination, Kentucky also will report performance data for the following student groups: homeless, foster care, and military dependent.

b. If applicable, describe any additional subgroups of students other than the statutorily required subgroups (i.e., economically disadvantaged students, students from major racial and ethnic groups, children with disabilities, and English learners) used in the Statewide accountability system.

Every student is included in the school and district accountability scores. Federally defined student groups are included in Kentucky’s accountability system.

c. Does the State intend to include in the English learner subgroup the results of students previously identified as English learners on the State assessments required under ESEA section 1111(b)(2)(B)(v)(I) for purposes of State accountability (ESEA section 1111(b)(3)(B))? Note that a student’s results may be included in the English learner subgroup for not more than four years after the student ceases to be identified as an English learner.

X Yes  No

d. If applicable, choose one of the following options for recently arrived English learners in the State:

☒ Applying the exception under ESEA section 1111(b)(3)(A)(i); or Applying the exception under ESEA section 1111(b)(3)(A)(ii); or
☐ Applying the exception under ESEA section 1111(b)(3)(A)(i) or under ESEA section 1111(b)(3)(A)(ii). If this option is selected, describe how the State will choose which exception applies to a recently arrived English learner.

ii. Minimum N-Size

*(ESEA section 1111(c)(3)(A)):
a. Provide the minimum number of students that the State determines are necessary to be included to carry out the requirements of any provisions under Title I, Part A of the ESEA that require disaggregation of information by each subgroup of students for accountability purposes.

The Kentucky Department of Education’s work is guided by three core principles: achievement, equity and integrity. These principles were adopted by the Commissioner’s Accountability Steering Committee (formed to guide the development of the state’s accountability system) and are embedded throughout Kentucky’s accountability system. Integrity is reflected in the honest and transparent data discussions with students, parents, educators, stakeholders and the public.

In accountability systems, fewer students’ scores yield less reliable school scores when generalizing about past and future school performance. To achieve the acceptable balance between inclusion and reliability, within what is technically possible. Kentucky will use a minimum N of 30 for each indicator per school and student demographic group. Continuing to report the minimum N at 10 operationalizes transparency and holds to Kentucky’s historical standard for reporting.

b. Describe how the minimum number of students is statistically sound.

Kentucky requires each accountable student group to be based on at least 30 students within a school or district by level, while the minimum number of students for public reporting will remain at 10. Taking into consideration the requirements of the Family Education Rights and Privacy Act (FERPA), a minimum N-count for reporting allows for transparency to the public (except when all students in a given subpopulation score at the same performance level or when student score identification is possible).

Kentucky policy is based on the assumption that the release of data on groups smaller than 10 would not be sufficient for reporting and might disclose the performance of an individual student. At the same time, the KBE balanced inclusion, reliability and simplicity with the minimum N of 30 for accountability. Kentucky has high expectations for all students and has set the minimum N policy to balance privacy and transparency. Kentucky has designed an accountability system to minimize uncertainty to levels deemed appropriate and are technically sound. The system reflects the Board’s policy values and their understanding of the inherent tradeoffs.

This minimum N criterion is reasonable considering FERPA requirements, the public’s need to examine individual student group performance, and research/statistical requirements.

c. Describe how the minimum number of students was determined by the State, including how the State collaborated with teachers, principals, other school leaders, parents, and other stakeholders when determining such minimum number.

Multiple shareholders and advisory groups including the School Curriculum, Assessment & Accountability Council (SCAAC), Local Superintendent Advisory Committee, Principals Advisory Committee (PrAC), Parents Advisory Committee (PAC), Teachers Advisory Committee (TAC), and Title I Committee of Practitioners were consulted on the minimum N. After much discourse, two requirements for minimum number of students were established, one for accountability and one for reporting.

Extensive analysis was completed prior to making the change to the minimum n-count. Thirty students per school or student group will be used accountability and federal classifications. Ten per school or student group will be used for reporting.
For all schools, the change to 30 students per school results in minor impact to the schools with accountable populations included in accountability. The largest difference is the percent of all schools that have a special education group that meets the minimum-n. The effect of minimum-n in high school is largely due to Kentucky only testing one grade in high school for federal accountability purposes. It also reflects the extent to which many of Kentucky’s high schools have relatively small overall student enrollments, and especially how few students in federally identified student groups are enrolled in these schools.

Kentucky has determined that 30 is the minimum number of students necessary to be included to carry out the requirements of any provision under Title I, Part A of the ESEA that require disaggregation of information by each subgroup of students for accountability purposes.

One goal in Kentucky is to continuously improve the way schools are identified for support and improvement. Therefore, we thoughtfully examined the rules underlying the accountability system. The minimum n was one area of analysis. Through the review, we found that while the increase of the minimum n to 30 per school level decreases the number of student groups at the high school, it creates a more equitable system across all levels.

The difference in number of students to meet minimum n by indicator for different levels in some instances led to an unbalanced school comparison. In the past system at high school, some student groups met the minimum n-size requirement for having 10 (or slightly more) students in one grade level for indicators, so their overall performance was evaluated on a small number of students. While, at the elementary and middle school levels, student groups met the minimum n-size requirement for having 10 students per grade per content for indicators, so their overall performance is evaluated on a larger number of students. This was in some instances an uneven comparison.

In the past, having the lower minimum n of 10 per grade/per content may have led to an over identification of the federal designation at the high school level. Identification of TSI and ATSI are based on student groups. Having the lower minimum n leads to more schools being included in the accountability system and therefore eligible to be identified for CSI, TSI, or ATSI. The previous approach may have disproportionally identified high schools and therefore giving a false impression that more high schools are low performing.

Additionally, raising the minimum n increases the reliability and validity of the entire system. Having the lower minimum n-size requirement may reduce the reliability and validity of reported results. A small student population could be so small that it is statistically unreliable. Plus, average scores for a small number of students could vary greatly from one year to the next which could lead to inconsistency of identification.

d. Describe how the State ensures that the minimum number is sufficient to not reveal any personally identifiable information.3

---

3 Consistent with ESEA section1111(i), information collected or disseminated under ESEA section 1111 shall be collected and disseminated in a manner that protects the privacy of individuals consistent with section 444 of the General Education Provisions Act (20 U.S.C. 1232g, commonly known as the “Family Educational Rights and Privacy Act of 1974”). When selecting a minimum n-size for reporting, States should consult the Institute for Education Sciences report “Best Practices for Determining Subgroup Size in Accountability Systems While Protecting Personally Identifiable Student Information” to identify appropriate statistical disclosure limitation strategies for protecting student privacy.
Kentucky has a policy to protect the privacy of individual students in reporting achievement results. The state requires each subpopulation on which reporting, calculations are to be based to include at least 10 students at each grade tested within a school or district. Taking into consideration requirements of the FERPA, this minimum N-count would permit the public disclosure of all data on which calculations are based (except when all students in a given subpopulation score at the same performance level). Kentucky has determined, after consultation with its National Technical Advisory Panel on Assessment and Accountability (NTAPAA) and other commissioner’s advisory groups, that using a minimum N of 10 represents a reasonable balance of FERPA requirements, the public need to examine subpopulation performance and research/statistical requirements for reliability.

e. If the State’s minimum number of students for purposes of reporting is lower than the minimum number of students for accountability purposes, provide the State’s minimum number of students for purposes of reporting.

Kentucky uses the minimum number of 30 students for accountability and the minimum number of 10 for reporting.

iii. Establishment of Long-Term Goals

(ESEA section 1111(c)(4)(A)):

a. Academic Achievement

(ESEA section 1111(c)(4)(A)(i)(I)(aa))

1. Describe the long-term goals for improved academic achievement, as measured by proficiency on the annual statewide reading/language arts and mathematics assessments, for all students and for each subgroup of students, including: (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; and (iii) how the long-term goals are ambitious.

The long-term goals have been established for improved academic achievement, as measured by proficiency (percentage of students scoring Proficient and higher on statewide reading and mathematics assessments), for all students and for each subgroup of students. The long-term goals are as follows: to reduce the percentage of students scoring lower than Proficient by 50% from 2019 by 2030. The goal is extended to all students as well as each student subgroup. The baseline of 2019 reflects the first year of the accountability system, while 2030 represents 12 school years, or one generation of students. In addition, the gap between lower-performing student groups and higher-performing reference groups evident in 2019 will be closed by at least 50% by 2030. To generate the long-term goals, the following steps were used:

Step 1: Determine the baseline for 2018-2019 for each content area, grade level (elementary, middle and high), and student group by extrapolating the statewide performance using linear regression based on available assessment data from five previous years, 2012-2016.

Step 2: Subtract the 2018-2019 baseline from the goal of 100% proficiency to find the initial gap.

Step 3: Divide the initial gap by 2 to create a 50% reduction value.

Step 4: Subtract the reduction value from 100% proficiency to establish the long-term goal for 2030.

Step 5: Divide the long-term goal across the timeline to create interim and annual targets.
The long-term goals are considered a placeholder given that revised standards and new assessments will be produced in the future. The baseline will be adjusted to reflect actual data as they become available. The baseline for 2019, long-term goals for 2030, and measurements of interim progress toward meeting the long-term goals for academic achievement in reading and mathematics are shown in tabular form in Appendix A. These long-term goals, and associated measurements of interim progress toward meeting the long-term goals, for academic achievement in reading and mathematics are very ambitious. They represent both an absolute level of achievement and a rate of improvement – especially for historically lower-performing student groups – that are unprecedented in Kentucky (except, of course, for No Child Left Behind) that mandated long-term goals be 100% proficient, but which have been recognized as so unrealistically high that they damaged confidence in the accountability system. That these long-term goals are in most cases much higher than current performance or what might be expected under current conditions – especially for most historically lower-performing student groups – can be clearly shown by depicting the historical performance in contrast with the long-term goals.

The following charts indicate Middle School Level Mathematics performance in contrast with long-term goals. The blue line represents the trend of regression from 2012-2016 as compared to the red line displaying the long-term goals for middle school mathematics.

The patterns of relationship between the current trends and long-term goals in other grade levels and content areas are similar. It should be noted that these long-term goals designed to increase the percentages of students scoring proficient or above will reflect very ambitious increases in academic performance. Kentucky’s state assessment achievement level cut scores reflect rigor similar to NAEP (where Kentucky participates at the elementary and middle school levels) and ACT (where Kentucky has participation...
of all students at the high school level). Finally, achieving the closures in gaps between student groups set forth in the long-term goals would represent a massive accomplishment, and unfinished work. No person in the Kentucky Department of Education or its stakeholders is satisfied with any gap. However, for the past many years in Kentucky, gaps have widened over time. These long-term goals embody Kentucky’s commitment to reverse that trend and usher in more rapid progress than has ever been seen before in the state.

Kentucky also assesses writing, science and social studies and will value these areas of a well-rounded education in the state’s accountability system. Long-term goals have been generated in these additional content areas where data are available and there are no immediate changes to the testing program.

2. Provide the measurements of interim progress toward meeting the long-term goals for academic achievement in Appendix A.

The long-term goals and measurements of interim progress toward meeting the long-term goals for academic achievement in reading and mathematics are shown in Appendix A for elementary, middle, and high school levels.

3. Describe how the long-term goals and measurements of interim progress toward the long-term goals for academic achievement take into account the improvement necessary to make significant progress in closing statewide proficiency gaps.

The long-term goals and measurements of interim progress toward the long-term goals for academic achievement in reading and mathematics take into account the improvement necessary to make significant progress in closing statewide proficiency gaps in two ways, both of which are critically important. First, the gap between where students are performing in the baseline year of the accountability system (2019) and the level of 100% proficiency is reduced by 50% in the long-term goals, for all students and for each student group. Second, these long-term goals also reduce the gap between student groups and result in a larger absolute reduction.

b. Graduation Rate

(ESEA section 1111(c)4)(A)(i)(I)(bb))

1. Describe the long-term goals for the four-year adjusted cohort graduation rate for all students and for each subgroup of students, including: (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; and (iii) how the long-term goals are ambitious.

The long-term goals have been established for improved graduation rates, as measured by a four-year adjusted cohort for all students and for each subgroup of students. The long-term goals require reducing the percentage of students not graduating by 50% from 2019 by 2030. This is extended to all students as well as each student subgroup. The baseline of 2019 reflects the first year of the accountability system, while 2030 represents 12 school years, or one generation of students. In addition, the gap between student groups with lower graduation rates and higher graduation rate reference groups evident in 2019 will be closed by at least 50% by 2030.

To generate the long-term goals, the following steps were used:
Step 1: Determine the baseline for 2018-2019 for graduation rates by extrapolating using linear regression the four-year graduation rate based on available graduation rate data from three previous years, 2014-2016.

Step 2: Subtract the 2018-2019 baseline from the goal of 95% for the four-year graduation rate to find the initial gap.

Step 3: Divide the initial gap by 2 to create a 50% reduction value.

Step 4: Subtract the reduction value from the 95% goal to establish the long-term goal for 2030.

Step 5: Divide the long-term goal across the timeline to create interim and annual targets.

The baseline for 2019, long-term goals for 2030, and measurements of interim progress toward meeting the long-term goals for four-year and five-year graduation rates are shown in tabular form in Appendix A.

2. If applicable, describe the long-term goals for each extended-year adjusted cohort graduation rate, including (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; (iii) how the long-term goals are ambitious; and (iv) how the long-term goals are more rigorous than the long-term goal set for the four-year adjusted cohort graduation rate.

The long-term goals have been established for improved graduation rates, as measured by an extended five-year adjusted cohort for all students and for each subgroup of students. These are to reduce the percentage of students not graduating by 50% (2019 starting point) by 2030. This is extended to all students as well as each student subgroup. The baseline of 2019 reflects the first year of the accountability system, while 2030 represents 12 school years, or one generation of students. In addition, the gap between student groups with lower graduation rates and higher graduation rate reference groups evident in 2019 will be closed by at least 50% by 2030.

To generate the long-term goals, the following steps were used:

Step 1: Determine the baseline for 2018-2019 for graduation rates by extrapolating using linear regression the extended five-year graduation rate based on available graduation rate data from three previous years, 2013-2015.

Step 2: Subtract the 2018-2019 baseline from the goal of 96% for the five-year graduation rate to find the initial gap.

Step 3: Divide the initial gap by 2 to create a 50% reduction value.

Step 4: Subtract the reduction value from the 96% goal to establish the long-term goal for 2030.

Step 5: Divide the long-term goal across the timeline to create interim and annual targets.

The baseline for 2019, long-term goals for 2030, and measurements of interim progress toward meeting the long-term goals for four-year and five-year graduation rates are shown in tabular form in Appendix A.

3. Provide the measurements of interim progress toward the long-term goals for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate in Appendix A.
The long-term goals and measurements of interim progress toward meeting the long-term goals for graduation rates are shown in Appendix A.

4. Describe how the long-term goals and measurements of interim progress for the four-year adjusted cohort graduation rate and any extended year adjusted cohort graduation rate take into account the improvement necessary to make significant progress in closing statewide graduation rate gaps.

The long-term goals and measurements of interim progress for graduation rates take into account the improvement necessary to make significant progress in closing statewide graduation rate gaps in two ways, both of which are critically important. First, the gap between where students are graduating at the baseline year of the accountability system (2019) and the level of 95% for the four-year goal and 96% for the extended five-year graduation rate goal is reduced by 50%, for all students and for each student group.

Second, these long-term goals also reduce the gaps between student groups, and result in a larger absolute reduction for gaps that started larger.

c. English Language Proficiency
(ESEA section 1111(c)(4)(A)(ii))

1. Describe the long-term goals for English learners for increases in the percentage of such students making progress in achieving English language proficiency, as measured by the statewide English language proficiency assessment including: (i) baseline data; (ii) the State-determined timeline for such students to achieve English language proficiency; and (iii) how the long-term goals are ambitious.

The long-term goals for English learners are to reduce the percentage of students who score lower than the level necessary to be declared English language proficient or who make progress less than being on track to be proficient by 50% (starting point 2019) by 2030. The baseline of 2019 was chosen due to it being the first year of the accountability system, while 2030 represents 12 school years, or one generation of students.

This measure is of student progress during the year on the statewide English language proficiency assessment. 100% would indicate that every English learner student either made enough progress to meet proficiency within that year, or made enough progress to be on track to meet English proficiency within five years, at most. Students who are at higher levels of English language proficiency have fewer years to be on-track to become English language proficient.

The baseline year of 2019 represents the first operational year of the accountability system, with 2030 being the long-term goal year, consistent with the system’s other indicators. As with the other academic indicators, the actual baseline is set by extrapolating the statewide performance based on available assessment information from several previous years, 2012-2015. Note that these data are based on a previous assessment, and the baseline will be adjusted to reflect actual data as the data are available.

The baseline for 2019, long-term goals for 2030 and measurements of interim progress toward meeting the long-term goals are shown in tabular form in Appendix A. These long-term goals and associated measurements of interim progress toward meeting the long-term goals for English language proficiency are in most cases much higher than current performance or what might be expected under current conditions. Kentucky’s English learner population has been increasing over the past several years, so meeting these goals will require districts currently serving English learners to intensify and
expand the effectiveness of their services, and will require additional districts to develop the resources to support English learners by 2030 at a level no district is currently achieving.

2. Provide the measurements of interim progress toward the long-term goal for increases in the percentage of English learners making progress in achieving English language proficiency in Appendix A.

The measurements of interim progress toward the long-term goal for increases in the percentage of English learners making progress in achieving English language proficiency is shown in Appendix A.

iv. Indicators

(ESEA section 1111(c)(4)(B))

To provide an overview of the total system, a summary of all indicators for Kentucky’s accountability system is found below:

Coherence in Kentucky’s Accountability System

The accountability system is designed to promote and hold schools and districts (Local Education Agencies) accountable for student achievement. Indicators of the accountability system work together to report a complete picture for Kentucky schools and the education students receive. The color-coded rating system emphasizes several important concepts that promote a strong educational experience for all of Kentucky’s students. These concepts include:

- intentional reporting of achievement gaps;
- readiness for the next step in education or life with the indicators of State Assessment Results in Reading and Mathematics, State Assessment Results in Science, Social Studies and Writing, Postsecondary Readiness and Graduation Rates: Progress Toward English language proficiency for English learners and Quality of School Climate and Safety to provide insight into the school’s learning environment; and
- Support to schools with very low-performing student groups.

The concepts are reflected in the measures and calculations for each indicator and overall score. For 2021-2022, indicators and the overall score will include Status (current year performance). Overall ratings and indicator performance levels will be reported on a graphic of a School Report Card color-coded dashboard. (Note: The English Learner Progress indicator varies slightly.) Standards setting will determine the specific scores that are considered each color level of each indicator and overall score and be approved by the Local Superintendent Advisory Council.

The calculation for Status of each indicator will be the sum of students’ current year performance divided by the total number of accountable students. A standard setting involving Kentucky education leaders will determine movement between performance levels of Status (very low to very high). The overall indicator performance will be reported as one of five colors (blue, green, yellow, orange and red, where blue is the highest and red is the lowest).

Classification of schools and districts in the state accountability system include the following indicators:
State assessment Results in Reading and Mathematics;
State Assessment Results in Science, Social Studies and Writing;
English Learner Progress in English Language Proficiency;
Postsecondary Readiness at high school;
Quality of School Climate and Safety;
Graduation Rate (high school only).

“State Assessment Results in Reading and Mathematics” means the measure of academic status or performance for reading and mathematics on state assessments.
“State Assessment Results in Science, Social Studies and Writing” means the measure of academic status or performance for science, social studies and writing (on-demand and editing and mechanics) on state assessments.
“English Learner Progress” means individual student growth for Status. For all other indicators, it means students currently identified and those who continue to be monitored.
“Postsecondary Readiness” means the attainment of the necessary knowledge, skills, and dispositions to successfully transition to the next level.
“Quality of School Climate and Safety” means the measures of school environment.
“Graduation Rate” means the percentage of students who enter high school and receive a diploma based on their cohort in four and five years adjusting for transfers in and out, immigrants and deceased students.

a. Academic Achievement Indicator
Describe the Academic Achievement indicator, including a description of how the indicator (i) is based on the long-term goals; (ii) is measured by proficiency on the annual Statewide reading/language arts and mathematics assessments; (iii) annually measures academic achievement for all students and separately for each subgroup of students; and (iv) at the State’s discretion, for each public high school in the State, includes a measure of student growth, as measured by the annual Statewide reading/language arts and mathematics assessments.

State Assessment Results in Reading and Mathematics is Kentucky’s Academic Achievement indicator for elementary, middle and high school. Proficiency in this indicator is the term used to describe the desired level of knowledge and skills for goals for each student group and all students for each content area (i.e., reading and mathematics) that are expressed as the percentage of students scoring at the highest two levels of student performance (proficient and distinguished). Proficiency sets a high-level academic benchmark or performance bar for each student. The expectation level is the same regardless of a student’s starting performance. Meeting rigorous expectations for what students should know and be able to do better prepares students for a variety of life choices.

State-required assessments in reading and mathematics are designed to measure how students are mastering the state’s academic content standards. Student performance on these assessments is evaluated and described with a student performance level. A standard setting process determines for each specific test, the cut score a student must earn to be described by each student performance level — Novice (N), Apprentice (A), Proficient (P) or Distinguished (D). Kentucky’s assessments recognize a level of student performance above Proficient with Distinguished. The school’s proficiency score reflects
the performance of all students. The score is a weighted index, where N=0 points, A=.5, P=1 and D=1.25. These points encourage schools to move students primarily from Novice to Apprentice, and from Apprentice to Proficient, but also give schools credit for helping get students to the high achievement level of Distinguished. These values will not allow the students above Proficient to entirely compensate for students below Proficient.

While the goal in Kentucky is for all students to achieve proficient and distinguished performance levels, the calculation for the State Assessment Results in Reading and Mathematics Indicator includes all student performance levels, with a weighted average. Each content area (reading and mathematics) is an equal weighting of 50% of the indicator. State Assessment Results for Reading and Mathematics Indicator will be rated equally in elementary, middle and high schools and in districts by awarding points as described above for Novice, Apprentice, Proficient and Distinguished scores. Calculations for Status and reporting of Overall Indicator Performance are described in Section A. 4.iv. Data for the State Assessment Results in Reading and Mathematics Indicator is disaggregated for each individual student group and all students.

b. Indicator for Public Elementary and Secondary Schools that are Not High Schools (Other Academic Indicator)
Describe the Other Academic indicator, including how it annually measures the performance for all students and separately for each subgroup of students. If the Other Academic indicator is not a measure of student growth, the description must include a demonstration that the indicator is a valid and reliable statewide academic indicator that allows for meaningful differentiation in school performance.

Kentucky state law Senate Bill 1 (2017) and an 18-month collaborative process, with over 6,000 Kentuckians providing direct input into the accountability system, revealed clearly that the Commonwealth values a broader picture of school and district success than only performance on reading and mathematics tests administered once a year. Repeatedly, the importance of a well-rounded education and opportunities and access were stated throughout the accountability development process.

The accountability system includes an additional academic indicator at elementary and middle school to meet the priorities and values of Kentuckians: State Assessment Results Indicator for Science.

State Assessment Results Indicator for Science
Science is critical to developing the skills and abilities needed in the 21st century. Science is much more than the rote memorization of theories, formulas, vocabulary and dates. These are the cornerstone of critical thinking, problem-solving and collaboration. Through observations, studies, trials and tests, students can gain critical problem-solving skills. By working together to solve real-life problems, students gain communication and collaborative skills needed in the high-demand STEM area.

The State Assessment Results Indicator for Science is the measure of academic status or performance for science on state assessments at the elementary and middle school levels.
The indicator will be used to describe the level of knowledge and skills that all students achieve on academic assessments of science. To align with ESSA requirements, a Separate Academic Indicator for Social Studies and Writing at elementary and middle school is included as one of Kentucky’s measures of ESSA School Quality/Student Success. A Separate Academic Indicator for Science, Social Studies and Writing at the high school is one of Kentucky’s measures of ESSA School Quality/Student Success.

State statute requires a criterion-referenced test in science. The assessment measures the depth and breadth of Kentucky’s academic content standards and is administered once within the elementary and middle school levels.

Similar to the State Assessment Results in Reading and Mathematics Indicator, student performance on science assessments is evaluated and described with a student performance level. A standards setting process determines for each specific test, the cut score a student must earn to be described by each student performance level — Novice (N), Apprentice (A), Proficient (P) or Distinguished (D). Kentucky’s assessments recognize a level of student performance above Proficient with Distinguished. The school’s separate other academic indicator performance reflects the performance of each student. The score is a weighted average, where N=0 points, A=.5, P=1 and D=1.25.

A weighted average will be used to create a separate other academic indicator score for science. Calculations for Status and reporting of Overall Indicator Performance are described in Section A.4.iv.

c. **Graduation Rate**

Describe the Graduation Rate indicator, including a description of (i) how the indicator is based on the long-term goals; (ii) how the indicator annually measures graduation rate for all students and separately for each subgroup of students; (iii) how the indicator is based on the four-year adjusted cohort graduation rate; (iv) if the State, at its discretion, also includes one or more extended-year adjusted cohort graduation rates, how the four-year adjusted cohort graduation rate is combined with that rate or rates within the indicator; and (v) if applicable, how the State includes in its four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rates students with the most significant cognitive disabilities assessed using an alternate assessment aligned to alternate academic achievement standards under ESEA section 1111(b)(2)(D) and awarded a State-defined alternate diploma under ESEA section 8101(23) and (25).

Graduation rate is the percentage of students completing the requirements for a Kentucky high school diploma compared to a cohort of students beginning in grade nine. Kentucky uses both a five-year and four-year adjusted cohort rate in accountability.

The five-year rate recognizes the persistence of students and educators in completing the requirements for a Kentucky high school diploma. A four-year adjusted cohort rate is produced and used, as federally required, to report the long-term goal for graduation rate. Using data from the student information system, students are identified in the cohort beginning in grade 9. Five years later, the data is extracted for students in the cohort that have been assigned a “G-code” that indicates graduation. The cohort is “adjusted” by adding any students who transfer into the cohort and by subtracting any students who transfer out of the cohort to a legitimate educational setting or situation (e.g., transfer to an out-of-state school, enroll in a private school, emigrate to another country, or student
Both the four-year and five-year adjusted cohort formula uses the number of students who graduate in four or five years divided by the number of students who form the adjusted cohort for the graduating class in four or five years, respectively. Kentucky’s graduation rate indicator averages the four- and five-year rates.

d. **Progress in Achieving English Language Proficiency (ELP) Indicator**

Describe the Progress in Achieving ELP indicator, including the State’s definition of ELP, as measured by the State ELP assessment.

Kentucky regulation, 703 KAR 5:070, Procedures for the inclusion of special populations in the state-required assessment and accountability programs, states that an English learner (previously termed Limited English Proficient) means an individual:

- who is age 3 to 21;
- who is enrolled or preparing to enroll in an elementary or secondary school;
- who was not born in the United States or whose native language is a language other than English (who is Native American or an Alaska native, or a native resident of the outlying areas and who comes from an environment where a language other than English has had a significant impact on the individual’s level of English language proficiency or who is migratory, whose native language is a language other than English, who comes from an environment where the language is other than English, and who comes from an environment where a language other than English is dominant);
- whose difficulties in listening, speaking, reading or writing the English language may be sufficient to deny the individual:
  - The ability to meet the state’s proficient level of achievement on state-required assessments;
  - The ability to successfully achieve in classrooms where the language of instruction is English; or
  - The opportunity to participate fully in society.

Kentucky’s English language proficiency assessment is the WIDA (World-class Instructional Design and Assessment) ACCESS for ELLs. A standards setting on this assessment has set 4.5 as the exit criteria in English language proficiency for Kentucky. Progress on an English language proficiency exam is included in elementary, middle and high school in the English Learner Progress Indicator. The state accountability system includes the progress English learners make toward attaining the English language. At elementary, middle and high school, EL progress on the English language proficiency (ELP) exam will be evaluated for Status/growth.

For the English Learner Progress Indicator, the definition of Status within SB 158 does not align to ESSA. Therefore to align with ESSA, unlike other indicators where status is the current year performance, for the English Learner Progress Indicator ‘Status’ will include the growth of each English learner on the ELP exam. Growth for English Learners within the English Learner Progress indicator is an individual student performance comparison from prior year to current year. Points are assigned according to a value table. Reporting of the Overall Indicator Performance is described in Section 4.A.iv. The data is based on the longitudinal performance of each English learner on the state’s annual assessment of English language proficiency.
Kentucky and 37 other states use the revised WIDA ACCESS for ELLs assessment, developed and implemented through the University of Wisconsin.

A draft growth table on English language acquisition has been updated to reflect reporting EL Progress and not embedded into other indicators. The draft Growth on English Language Acquisition Value Table is sensitive to growth at every level of language proficiency up to the level designated for reclassification. KDE is developing processes to incorporate the federal flexibility of age upon entry to U.S. schools, initial English language proficiency level, and degree of interrupted schooling. To provide more sensitivity, the ACCESS Composite Score Levels have each been divided into two sublevels, so the value table acknowledges growth between performance levels 1.0 to 1.5, 1.5 to 2.0, and so on up to 4.5. The draft English Learner Growth Table uses observed growth based on achievement on the English Language Proficiency assessment from two successive years. The more growth a student has made, the more points are credited to the school. Status for Progress in English Language Proficiency will be calculated for each school and district by summing the points from the English Language Acquisition Value Table for each student and dividing by the number of students.

e. **School Quality or Student Success Indicator(s)**

Describe each School Quality or Student Success Indicator, including, for each such indicator: (i) how it allows for meaningful differentiation in school performance; (ii) that it is valid, reliable, comparable, and statewide (for the grade span(s) to which it applies); and (iii) of how each such indicator annually measures performance for all students and separately for each subgroup of students. For any School Quality or Student Success indicator that does not apply to all grade spans, the description must include the grade spans to which it does apply.

`Postsecondary Readiness`

51
Postsecondary Readiness is the attainment of the necessary knowledge, skills and dispositions to successfully move to the next level of education, work or life. For individual students to be able to fulfill their chosen career pathway and become contributing residents of Kentucky and citizens of the United States, each must be prepared and ready to take the next steps. The productivity of individuals, the state and the nation are impacted positively when students exit from the K-12 experience postsecondary ready. However, the concept of preparation and readiness must begin at the elementary level and continue developing into middle and high school.

High School Postsecondary Readiness
At high school, postsecondary readiness is more than earning a high school diploma. It requires that students demonstrate academic or career readiness. A variety of experiences can be evidence of readiness so that students may personalize their pathway to readiness in their area of focus. The chart below includes the options for demonstrating readiness.

The indicators (as described below) are intended to signal a student’s readiness for the next step in their postsecondary plans, whether that be pursuit of college coursework and/or entry into the workforce.

<table>

<td></td>
</tr>
</tbody>
</table>

Note: Recent statutory changes reduced the number of measures to one. Legislation will become effective July 14, 2022.

Note: Students participating in the alternate assessment program will have criteria for Postsecondary Readiness based on alternate assessment requirements and employability skills attainment.

Opportunities for students with significant cognitive disabilities have sometimes been limited. Schools and districts often struggled with the transition from high school to postsecondary career opportunities for students. To demonstrate academic readiness, a Transition Attainment Record (TAR) for students in grade 11 is administered. The TAR is a checklist, which evaluates the student’s readiness in reading, mathematics and science. In 2012, the KDE and the University of Kentucky (UK) through the State Personnel Development Grant (SPDG) created a partnership to develop career pathways. The Career Work Experience Certification (CWEC) is a sequence of four courses with work experience embedded within the pathway. The CWEC is one of four components of the Kentucky Alternate Assessment. The achievement of the CWEC is a process, not an
assessment. The CWEC along with the Employability Skills Attainment Record (ESAR) is designed to provide a measure of career readiness within the Postsecondary Readiness component of Kentucky’s Accountability System.

For Status at high school, the number of high school graduates plus grade 12 non-graduates who have demonstrated postsecondary readiness is divided by the number of graduates plus grade 12 non-graduates. Calculations for reporting Overall Indicator Performance are described in Section A.4.iv.

Quality of School Climate and Safety
Beginning in the 2021-2022 school year, the Quality of School Climate and Safety indicator will be included in accountability for elementary, middle, and high schools. All students in grades 3-8, 10 and 11 will participate in the survey and be included in accountability calculations.

The Quality of School Climate and Safety indicator uses perception data from surveys that measure insight into the school environment. The Quality of School Climate and Safety survey gathers information from students statewide in grades 3-8, 10 and 11 in the two constructs of school climate and safety.

Through the collection of survey data, schools may receive valuable information on school climate, students' relationships to their teachers, and other students and how safe the school is perceived to be. These are potentially powerful new catalysts for school improvement and student achievement.

The Quality of School Climate and Safety indicator will provide information to educational and community leaders. Using this additional piece of data, school and district leaders may utilize the data from surveys toward school improvement efforts. Survey data will provide leaders insight to individual experiences of the school. Empowered with this information, policies and programs can be reviewed and assessed.

The Quality of School Climate and Safety indicator is an opportunity to gather perspective. Using surveys can help educators know how others perceive school climate and then determine whether there are differences across different student demographic groups. Surveys can help schools to know their strengths and the areas for improvement. Schools will get feedback that can help them understand the obstacles students face in school. Survey results can assist schools with development of improvement plans.

Kentucky plans to report an overall climate and safety score as well as separate climate and safety scores for each school and district. The survey results will be used, along with other indicators, to produce an overall accountability score.

School climate and safety are the two constructs included in the survey. The survey was first administered online to students in tested grades 3-8, 10 and 11 between February 24, 2020 and March 6, 2020. The survey items are available publicly for each form:

- Climate and Safety Items Grades 3 - 5
- Climate and Safety Items Grades 6 - High School

Student chose from a Likert scale of strongly disagree, disagree, agree, and strongly agree. Each will have a graphic to represent the level of agreement as follows.
The survey is modified and number of items reduced for students who participate in the Alternate Assessment program.

- Alternate Assessment Climate and Safety Items Grades 3-5
- Alternate Assessment Climate and Safety Items Grades 6-High School

Each school will receive a score for the safety construct and a score for the school climate construct (scores based on standards setting or similar procedure). Scores denote separate school-level indicators of safety and climate. The school will also receive a copy of the survey with the proportion of students responding to each response category (e.g., the percentage of students who strongly agreed, agreed, disagreed, and strongly disagreed with each item statement). Districts receive school level data, plus data aggregated at the district level (districts receive all school-level results, including a file that aggregates across the schools in the district).

For school-level accountability, each item’s response will be converted to a numerical value. Response values are 0 (strongly disagree), 33.33 (disagree), 66.66 (agree) and 100 (strongly agree). Associating the students’ responses to values allows for calculation of an index for each construct for all students and for student demographic groups.

The scores from both construct indexes are then averaged and weighted at 4% in the accountability system.

To ensure that the survey is valid and reliable to be used in accountability, KDE employed HumRRO to conduct a correlational analysis to document the association between the QSCS Survey and student achievement as measured by the Kentucky state summative assessment, at both the individual student and school levels. The primary goal of comparing correlations across student subgroups was to ensure that the overall association between QSCS scores and KSA scores was not concealing differences in associations at the subgroup level.

Kentucky intends to combine achievement and climate indicators, along with other indicators, to produce an overall accountability score. Ideally, the various indicators will relate in expected ways, demonstrating that they represent a common construct. At the same time, each indicator would ideally contribute unique information to the overall score. School-level correlations between the QSCS Survey and KSA were generally positive, but low enough in magnitude to indicate that the two sets of scores will contribute unique information to overall school accountability scores.

The study found that correlations between school-level QSCS scores and other school level climate and safety related variables are associated in expected ways, offering additional evidence that the survey measures the intended construct. It is important to note that relations among these other variables and QSCS scores were not so high as to cause concerns that the information gathered from them might be redundant.
The 2021 Quality School Climate and Safety (QSCS) survey was administered in 1,245 schools (Elementary=701; Middle=318; High=226) across the state of Kentucky. The performance distribution of scores for elementary schools on the QSCS survey ranges from 67 to 94 with most of the schools (n=101) performing at a value of 76. Also, middle schools performance distribution on the survey ranges from 57 to 82 with most schools (n=42) performing at a value of 70. Furthermore, high schools performance distribution on the survey ranges from 51 to 81 with most schools (n=113) performing at a value of 65.

The number of schools with groups of sufficient size varied across the levels (elementary, middle and high) depending on the size of population in the schools. For details on each group, see the graphics below that display the number of schools at each value to illustrate the distribution of scores.

**ELEMENTARY LEVEL**
MIDDLE LEVEL
HIGH LEVEL
**State Assessment Results Indicator for Social Studies and Writing (Elementary and Middle Schools)**

Social studies and writing are critical to developing the skills and abilities needed in the 21st century. Social studies and writing are much more than the rote memorization of vocabulary, dates, wars and battles. These are the cornerstone of critical thinking, problem-solving and collaboration. Through observations, studies, trials and tests, students can gain critical problem-solving skills. By working together to solve real-life problems, students gain communication and collaborative skills.

The state Assessment Results in Social Studies and Writing Indicator is the measure of academic status or performance for social sciences and writing on state assessments at the elementary and middle school level. The indicator will be used to describe the level of knowledge and skills that all students achieve on academic assessments of social studies and writing.

State statute requires a criterion-referenced test in social studies and writing assessments. Each assessment measures the depth and breadth of Kentucky’s academic content standards and are administered once at elementary and middle school. The state-required assessments in social studies and writing are designed to measure how students are mastering the state’s academic content standards.

Similar to the State Assessment Results in Reading and Mathematics Indicator, student performance on social studies and writing assessments is evaluated and described with a student performance level. A standard setting process determines for each specific test, the cut score a student must earn to be described by each student performance level — Novice (N), Apprentice (A), Proficient (P) or Distinguished (D). Kentucky’s assessments recognize a level of student performance above Proficient with Distinguished. The school’s separate other academic indicator performance reflects the performance of each student. The score is a weighted average, where N=0 points, A=.5, P=1 and D=1.25.

An equally weighted average will be used to create a separate other academic indicator score for social studies and writing.

**State Assessment Results in Science, Social Studies and Writing Indicator (High School)**

Science, social studies and writing are critical to developing the skills and abilities needed in the 21st century. Science, social studies and writing are much more than the rote memorization of theories, formulas, vocabulary, dates, wars and battles. These are the cornerstone of critical thinking, problem-solving and collaboration. Through observations, studies, trials and tests, students can gain critical problem-solving skills. By working together to solve real-life problems, students gain communication and collaborative skills needed in the high-demand STEM area.

The State Assessment Results in Science, Social Studies and Writing Indicator is the measure of academic status or performance for science, social sciences and writing on state assessments at the high school level. The indicator will be used to describe the level of knowledge and skills that all students achieve on academic assessments of science, social studies and writing. The State Assessment Results in Science, Social Studies and Writing Indicator at the high school is one of Kentucky’s measures of ESSA School Quality/Student Success.
State statute requires a criterion-referenced test in science and social studies and writing assessments (including on-demand writing and editing and mechanics). Each assessment measures the depth and breadth of Kentucky’s academic content standards and are administered once at high school. The state-required assessments in science, social studies and writing are designed to measure how students are achieving on the state’s academic content standards.

Similar to the State Assessment Results in Reading and Mathematics Indicator, student performance on science and social studies assessments is evaluated and described with a student performance level. A standard setting process determines for each specific test, the cut score a student must earn to be described by each student performance level — Novice (N), Apprentice (A), Proficient (P) or Distinguished (D). Kentucky’s assessments recognize a level of student performance above Proficient with Distinguished. The school’s separate other academic indicator performance reflects the performance of each student. The score is a weighted average, where N=0 points, A=.5, P=1 and D=1.25.

An equally weighted average will be used to create a separate other academic indicator score for science, social studies and writing. Calculations for Status and reporting of Overall Indicator Performance are described in Section A.4.iv.

v. Annual Meaningful Differentiation
(\textit{ESEA section 1111(c)(4)(C)})

a. Describe the State’s system of annual meaningful differentiation of all public schools in the State, consistent with the requirements of section 1111(c)(4)(C) of the ESEA, including a description of (i) how the system is based on all indicators in the State’s accountability system, (ii) for all students and for each subgroup of students. Note that each state must comply with the requirements in 1111(c)(5) of the ESEA with respect to accountability for charter schools.

For a description of Kentucky’s indicators and their alignment to ESSA indicators, reference tables in Section A.4.vi.a.

Kentucky’s color-coded performance rating system is scheduled to be operational in fall 2022.

b. Describe the weighting of each indicator in the State’s system of annual meaningful differentiation, including how the Academic Achievement, Other Academic, Graduation Rate, and Progress in ELP indicators each receive substantial weight individually and, in the aggregate, much greater weight than the School Quality or Student Success indicator(s), in the aggregate.

A standard setting will be held that includes the weighting of the indicators in the overall rating for 2021-2022. The percentages in the table below show the weight for each indicator.

When tests in reading, writing, mathematics, science and social students are administered in the 2021-2022 school year and performance is included in the overall rating, a full standard setting of the color-coded system will occur.

Each overall performance rating reflects grade span performance on the indicators and weights in the following \textit{Overall Accountability Weights} tables.
The table below are the approved weights discussed with the Kentucky Board of Education that reflect the emphasis and importance of Kentucky’s indicators within its State Accountability System.

* High school weights for ESSA Academic Indicators (State assessment results in reading and mathematics and Graduation Rate) combined will be greater than 50% of the total high school weight as required by ESSA.

These weights for each indicator will be used to produce an overall performance rating for each school, based on a weighted average across all the applicable indicators. If data cannot be calculated for an indicator, the weights shall be redistributed proportionally to remaining indicators that shall be reported for the school or LEA. In compliance with Kentucky law (Senate Bill 1, 2017), the overall score will not be used by the KDE to publicly rank schools against each other.

New performance standards (cut scores) will be established in 2021-2022 for Status. Those performance standards will be established through a formal accountability standard-setting process that will be systematic, public, and done by an appropriately selected set of standard-setting panelists.

While this approach to standard setting is the professional best practice for setting assessment proficiency level cut scores, it is still rare for setting accountability system cut scores and decision rules.

Kentucky continues to collaborate with the Center for Assessment on the design and facilitation of the standard setting process for its accountability system. Please see the following preliminary plan developed with Chris Domaleski and Brian Gong of the Center.

**Establishing Performance Standards for the Kentucky School Accountability System**
The KDE is currently working to further develop their next generation school accountability system that is compliant with requirements of the Every Student Succeeds Act (ESSA). This system incorporates multiple indicators of performance for schools and student groups. Previously, standards were established to identify schools for Comprehensive and Additional Targeted Support and Improvement. In the summer of 2022, a standard setting involving Kentucky educators will be conducted for Status on each indicator and the overall performance rating. The overall performance rating is expressed as one of five colors (blue, green, yellow, orange and red, where blue is the highest and red the lowest.

Given the central importance of indicator and color ratings, it is appropriate to require convincing evidence that the rating has a high degree of validity for the intended interpretation and uses. A substantial part of that validity argument is the design and implementation of a process for establishing performance standards that credibly reflects the state’s vision for the accountability system. The purpose of this document is to outline the process to be implemented and will be repeated during the summer of 2022 and summer 2023. When new tests in reading, writing, mathematics, and social students are administered in the 2021-2022 school year and performance is included in the overall performance rating, a full standard setting of the color-coded overall rating system will occur.

The process will be discussed with Kentucky’s technical advisory committee, the School Curriculum, Assessment and Accountability Council; Local Superintendent Advisory Council; and use accepted technical procedures and involved Kentucky school and district administrators and teachers.

**Standard Setting Process**

**Establish Policy Descriptors**

The process starts by establishing policy definitions for the overall performance categories separately for 1) elementary, 2) middle schools and 3) high schools. The state has a strong foundation for those policy definitions based on the substantial public engagement and development work implemented to date. That process culminated in a system that values equity and high-achievement and supports schools to prepare well-rounded students who are on-track to post-secondary success.

This policy vision will be clearly documented in a series of Policy Descriptors (PDs) for each performance category. The Center and KDE will develop draft PDs, which will be reviewed and revised as appropriate by education stakeholder groups.

**Develop School Performance Level Descriptors (SPLDs)**

Next, the Center and KDE will develop more specific SPLDs) for each classification. These SPLDs are based on the policy definitions and Board-approved weights, but are written at a level of detail that can be used to inform the decision of panelists in standard setting. The Center and KDE will draft proposed SPLDs reflecting the values and development decisions to date. These SPLDs will be reviewed and refined in a series of workshops with Kentucky education stakeholders.
Standard Setting Panel

Next, KDE will convene a broad-based panel of leaders and stakeholders to evaluate information and make recommendations regarding performance expectations for the accountability system. Members of the panel will include representatives from the Local Superintendent Advisory Council (LSAC) and may include: leaders from selected districts (e.g. one or two district superintendents), leaders from selected schools, representatives from critical agencies or offices (e.g. the governor’s education office, groups representing parents, business community, students with special needs, etc.). The goal is to assemble a team of leaders, experts, and stakeholders broadly representative of the state’s education policy interests.

The key activities of the standard setting meeting are as follows:

- Introduction and Training
- Discuss context, significance, and role of accountability standards
- Review and discuss the process for developing and features of existing PDs and SPLDs Operationalize SPLDs
- Panelists will work in small groups to operationalize the SPLDs by listing clarifications or elaborations necessary to help define the five color performance levels (i.e., Blue, Green, Yellow, Orange and Red).
- The full group will discuss, revise as necessary, and ultimately document overall recommended guidance to operationalize the expectations for each indicator category.

Establish Overall Ratings

- Individual panelists will review school performance profiles associated with each SPLD and recommend a cut score.
- Panelists will discuss in small groups and then overall
- Impact data reflecting the recommended group median cut scores will be presented
- Panelists will be invited to suggest any revisions to the cut scores that may be appropriate, keeping in mind that final decisions must conform with the SPLDs
- Any proposed revisions will be documented

Establish Indicator Thresholds

- Panelists will be trained on the requirements and intended use for the Indicator performance levels, i.e., evaluation of status will range from very low to very high; intended to provide schools with indication of relative strengths/areas to work on
- Panelists will work independently with an anonymized schools list representing a range of schools at each color rating level to classify performance using 1-5 for each indicator, where 1 = very low and 5 = very high.
- Following the independent ratings, a summary of the ratings will be presented (e.g. minimum, median, and maximum on each indicator). The facilitator will focus on schools and indicators where the most disagreement among panelists was observed (i.e. ‘gray areas’).
Panelists will discuss these ‘gray areas’ in small groups and then overall. The purpose is to allow panelists an opportunity to share their rationale as well as learn from multiple perspectives.

Panelists will return to the anonymized school list to produce a second round of independent ratings, focusing on the ‘gray areas.’

After the second round, results will be presented and discussed. The median value will be regarded as the panel recommendation (i.e. schools with a median rating of 4.5 and higher meet the very high threshold; schools with a median rating of 3.5 to 4.4 meet the high threshold and so forth). The group will have an opportunity to make any additional adjustments by consensus only.

**Evaluation**

Panelists will complete an evaluation of the process, which will include an opportunity to provide feedback on their confidence in the results.

**Documentation and Approval**

A technical report will be produced that describes each phase of the process, the recommended thresholds and rationale, projected impact, and a summary of the evaluation. These recommendations will be provided to the commissioner of education and the Local Superintendent Advisory Council for final review and approval.

**Estimated Timeline**

In September 2022, the KDE will meet with LSAC, to review and approve the cutscores for the school accountability system of school ratings.

The KDE will convene a standard-setting panel to establish cutscores for the school accountability system of school ratings. The panel will establish cutscores for an overall rating consisting of one of five colors, and cutscores for each Indicator (e.g., State Assessment Results in Reading and Mathematics, State Assessment Results in Science, Social Studies and Writing, English Learner Progress, Graduation Rate, Postsecondary Readiness, and Quality of School Climate and Safety) to allow reporting of school performance on each Indicator. Reporting on each indicator will include Status. Status level will range from Very Low to Very High (Very Low, Low, Medium, High, Very High).

Status will provide an indicator performance level represented by a color (i.e., blue, green, yellow, orange and red).

In the future, new assessments may yield different student performance which might warrant an adjustment in the respective Indicator’s cut scores for accountability. A new standard-setting panel might be convened to recommend such adjusted cut scores, or the changes may be fairly simple to do within the context of the prior standard setting.

c. If the States uses a different methodology or methodologies for annual meaningful differentiation than the one described in 4.v.a. above for schools for which an
accountability determination cannot be made (e.g., P-2 schools), describe the different methodology or methodologies, indicating the type(s) of schools to which it applies.

Kentucky does not use a different methodology.

Kentucky has a few very small schools that do not meet the newly established minimum n of 30. For small schools that do not have 30 students overall, a minimum of 10 per grade and content will be used. For inclusion in identification of TSI and ATSI, a minimum of 10 per grade and content will be used per individual student demographic group. The minimum n of 10 per grade/content has been used in previous accountability systems and will continue for small schools that do not meet the minimum n of 30. Schools that only include grades K-2 and don’t have their own accountability data are considered feeder schools and receive the accountability classification of the school their students feed into.

vi. Identification of Schools

(ESEA section 1111(c)(4)(D))

a. Comprehensive Support and Improvement Schools (Identifying the lowest five percent)

Describe the State’s methodology for identifying not less than the lowest-performing five percent of all schools receiving Title I, Part A funds in the State for comprehensive support and improvement, including the year in which the State will first identify such schools.

In the beginning of school year 2022-2023, based on 2021-2022 data, Kentucky will determine the lowest 5% of Title I schools, in each level (elementary, middle, and high school) by using the standard setting method reported. Beginning with the 2022-2023 school year, Kentucky will determine the bottom 5% of Title I schools, in each level (elementary, middle, and high school) using all the applicable indicators:

- Elementary and Middle Schools will be identified based on performance in Academic Achievement Indicator-State assessment results in reading and mathematics, Other Academic Indicator- State assessment results for science, English Language Progress Indicator, and School Quality/Student Success Indicator-Quality of School Climate and Safety Survey and Separate Academic Indicator for social studies and writing.

- High Schools will be identified based on performance in Academic Achievement Indicator-State assessment results in reading and mathematics, Graduation Rate, English Language Progress Indicator, and School Quality/Student Success Indicator-Quality of School Climate and Safety Survey, Postsecondary Readiness and State assessment results in science, social studies and writing.

- Kentucky’s accountability system includes schools without tested grades (i.e. K-1 and K-2 schools). These K-1 and K-2 schools feed to a higher-level school(s) which receives a federally- required accountability classification (i.e., CSI, TSI, and ATSI) and school identification. The feeder school(s) receive the classification of the higher-level school where the majority of their students enrolled. Feeder schools include K-1 and K-2 schools that feed to elementary schools and 9th grade that feed to a high school.

Additionally, Kentucky will identify any non-Title I schools that fall within that range of performance for Comprehensive Support and Improvement (CSI).

Identification of Schools for CSI/TSI
Kentucky will identify schools for CSI and TSI using the Indicators and specific measures shown in the following tables.

Elementary and Middle Schools

The general method for identifying schools for CSI is described below. Then the method for identifying schools for Targeted Support and Improvement will be described.

**Comprehensive Support and Improvement (CSI) Identification**

The ESSA requirement for CSI is to identify schools in the “bottom 5% of Title I schools on the basis of their performance on the ESSA Indicators. As “the bottom 5%” is a normative requirement, the actual performance of “the bottom 5%” of schools will vary from year to year—if the schools in general perform more strongly in 2022 than in 2023, the performance of the bottom 5% will be higher in 2022 than was the performance of the bottom 5% in 2023; if the schools in general perform more poorly, the bottom 5% will be lower. Therefore, it is not possible to set a particular score or specific level of performance that will identify the bottom 5% each year. It is possible to specify a process for evaluating schools consistently from year to year and to identify the lowest performing 5%.

Kentucky will calculate an overall performance score representing the weighted average of performance on all Indicators for each school. Schools will be rank ordered in terms of overall performance score, within elementary, middle, and high school levels. The bottom 5% of Title I schools will be identified for CSI. This is in addition to schools that are identified for CSI because of graduation rate or failure to exit from ATSI status.
Kentucky will calculate overall school performance scores and apply the performance cutscores in exactly the same ways to both Title I and non-Title I schools. By identifying criteria that identify the lowest-performing 5% of Title I schools and then applying those criteria to both Title I and non-Title I schools, Kentucky will maintain the same standards of school quality for Title I and non-Title I schools, but will identify more than 5% of the total schools for CSI, as long as some non-Title I schools perform at least as poorly as the bottom 5% of Title I schools.

**Targeted Support and Improvement (TSI) Identification**

Eligible schools were identified for Additional Targeted Support and Improvement (ATSI) in fall 2018. The methodologies for identifying schools for TSI and ATSI are described below.

b. **Comprehensive Support and Improvement Schools** (Identifying high schools failing to graduate one third or more of their students)

Describe the State’s methodology for identifying all public high schools in the State failing to graduate one third or more of their students for comprehensive support and improvement, including the year in which the State will first identify such schools.

Based on the accountability system adopted by the KBE on August 23, 2017, and revised February 6, and April 10, 2019, in school year 2018-2019, Kentucky will identify all high schools with less than an 80% graduation rate for Comprehensive Support and Improvement. The state will use the four-year adjusted cohort rate.

c. **Comprehensive Support and Improvement Schools** (Identifying schools that have not satisfied exit criteria)

Describe the methodology by which the State identifies public schools in the State receiving Title I, Part A funds that have received additional targeted support under ESEA section 1111(d)(2)(C) (based on identification as a school in which any subgroup of students, on its own, would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State’s methodology under ESEA section 1111(c)(4)(D)) and that have not satisfied the statewide exit criteria for such schools within a State-determined number of years, including the year in which the State will first identify such schools.

Based on the accountability system adopted by the Kentucky Board of Education on August 23, 2017, in school year 2023-2024, Kentucky will identify schools for Comprehensive Support and Improvement that have previously been identified for Additional Targeted Support and Improvement and have not exited that status after three years. (See the chart below that summarizes the entrance criteria for both Targeted Support and Improvement and Comprehensive Support and Improvement Schools.)
## Entrance Criteria

### Targeted Support and Improvement

Beginning in the fall of 2020 and annually thereafter, a school will be identified for Targeted Support and Improvement (TSI) if it has one or more of the same subgroups performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) based on school performance, for three consecutive years.

Beginning in the fall of 2023 and every three years thereafter, a school will be identified for ATSI if it was identified for Targeted Support and Improvement (TSI) in the immediately preceding year and has one or more subgroups performing as poorly as all students in the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) based on school performance.

### Comprehensive Support and Improvement

In 2018 and 2019, schools were identified for Comprehensive Support and Improvement (CSI) annually. Kentucky will not identify any new CSI schools in 2020; however, beginning in the fall of 2022 and every three years thereafter, a school will be identified for CSI if it meets any one of the following categories:

- **CSI I:** Bottom 5% of Title I or non-Title I schools (by level – elementary, middle or high school);

- **OR**

- **CSI II:** Less than 80% graduation rate for Title I or non-Title I high schools;

- **OR**

- **CSI III:** Title I or non-Title I schools previously identified for Additional Targeted Support for at least 3 years and have not exited (due to COVID-19 addendums, this category will be next identified in 2023, then again in 2025 and every three years thereafter).

### Frequency of Identification

Provide, for each type of school identified for comprehensive support and improvement, the frequency with which the State will, thereafter, identify such schools. Note that these schools must be identified at least once every three years.

In 2018 and 2019, Kentucky identified the lowest 5% of Title I schools and non-Title I school that fell into that range annually. Kentucky will not identify new CSI schools in 2020; however, beginning in fall of 2022, Kentucky will identify the lowest 5% of Title I schools and non-Title I schools that fall into that range once every three years. Kentucky will identify all high schools below 80% graduation rate, using the 4-year adjusted cohort graduation rate, every three years.
Beginning in 2023, Kentucky will identify Additional TSI schools for CSI after the school fails to exit that status after three years. Due to COVID-19 addendums, the next CSI identification in this category will occur in 2028.

  - ATSI cohort 1 can become CSI

- **ATSI cohort 3**
- **ATSI Cohort 4**
  - ATSI Cohort 2 can become CSI
  - ATSI Cohort 3 can become CSI

**e. Targeted Support and Improvement**
Describe the State’s methodology for annually identifying any school with one or more “consistently underperforming” subgroups of students, based on all indicators in the statewide
system of annual meaningful differentiation, including the definition used by the State to determine consistent underperformance. *(ESEA section 1111(c)(4)(C)(iii))*

Kentucky will identify a school for Targeted Support and Improvement (TSI) where the school has one or more of the same subgroups performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school), based on school performance, for three consecutive years (identified annually, beginning 2022-2023). In years in which schools are not identified for Comprehensive Support and Improvement (CSI), Kentucky will continue to determine the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) for purposes of identifying schools for TSI and for purposes of determining whether any school has met the exit criteria outlined is subsection viii. of this section.

School performance is determined by the following measures: elementary and middle schools will be identified on performance in Academic Achievement Indicator-State Assessment Results in Reading and Mathematics, Other Academic Indicator-State Assessment Results in Science, English Language Proficiency Indicator, and School Quality/Student Success Indicator- Quality of School Climate and Safety Survey and State Assessment Results in Social Studies and Writing; high schools will be identified on performance in Academic Achievement Indicator- State Assessment Results in Reading and Mathematics, Graduation Rate Indicator, English Language Proficiency Indicator, and School Quality/Student Success Indicator-State Assessment Results in Science, Social Studies and Writing, Quality of School Climate and Safety and Postsecondary Readiness.

Schools will be identified for TSI in fall 2022 using an index score that combines each of the aforementioned indicators, as was used to identify the bottom 5% of schools for CSI in 2019.

f. **Additional Targeted Support**

Describe the State’s methodology, for identifying schools in which any subgroup of students, on its own, would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State’s methodology under ESEA section 1111(c)(4)(D), including the year in which the State will first identify such schools and the frequency with which the State will, thereafter, identify such schools. *(ESEA section 1111(d)(2)(C)-(D))*

In the fall of 2018, Kentucky identified a school for Additional Targeted Support and Improvement (ATSI) where the school had one or more subgroups performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) based on school performance.

Due to the COVID-19 addendums, for the 2022-23 school year only, ATSI schools will be identified following the same criteria as for TSI schools described above.

Beginning in the Fall of 2025 and every three years thereafter, Kentucky will identify a school for ATSI where the school was identified for Targeted Support and Improvement in the immediately preceding year and has one or more subgroups performing as poorly
as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school), based on school performance.

In other words, a school will be identified for ATSI in 2025 if it was identified for TSI in 2024 and has at least one student group whose performance is as low as the all student group in a school identified as a bottom 5% Title I school. Using the procedures described above, beginning in 2025 and every three years thereafter, Kentucky will identify the 5% of schools with the lowest performance for Comprehensive Support and Improvement, and any school identified for TSI in the immediately preceding year that has a student group performing as low will be identified for ATSI.

School performance is determined by the following measures: elementary and middle schools will be identified on performance in Academic Achievement Indicator-State Assessment Results in Reading and Mathematics, Other Academic Indicator- State Assessment Results in Science, English Language Proficiency Indicator, and School Quality/Student Success Indicator- State Assessment Results in Science, Social Studies and Writing; high schools will be identified on performance in Academic Achievement Indicator- State Assessment Results in Reading and Mathematics, Graduation Rate, English Language Proficiency Indicator, and School Quality/Student Success Indicator-Quality of School Climate and Safety, State Assessment Results in Science, Social Studies and Writing and Postsecondary Readiness.

g. **Additional Statewide Categories of Schools**
   If the State chooses, at its discretion, to include additional statewide categories of schools, describe those categories.
   This question does not apply to Kentucky’s model.

vii. **Annual Measurement of Achievement**
   (ESEA section 1111(c)(4)(E)(iii))
   Describe how the State factors the requirement for 95 percent student participation in statewide mathematics and reading/language arts assessments into the statewide accountability system.
   Historically, Kentucky’s test participation rate has been very high. Opting-out of statewide testing is not an option. Although parents have the right to opt their children out of public education by choosing home school or private school, parents cannot choose the provisions of public education with which they will comply. In “Triplett vs. Livingston County Board of Education, 967 S.W.2d (Ky. App. 1997)”, the Kentucky Court of Appeals upheld the mandate of the Kentucky Board of Education that all students of public schools in the state participate in standardized assessments. Students may only be excused from the statewide assessment upon completion and approval of the Medical Nonparticipation request. Administrative regulation 703 KAR 5:240 establishes administrative procedures and guidelines for Kentucky’s assessment and accountability program. Sections 8 and 9 specifically address student participation and are provided below. To summarize, if a student does not participate (via repeated absences or refusal to enter test answers) and does not have an approved exemption, the lowest reportable score on the appropriate test shall be assigned for accountability calculations for the school and district. This means, every student enrolled
in the school and district is included in the calculation. The total number of students in the school is included in the denominator. If the student does not test, a novice (or zero points) is included in the numerator.

“Section 8. Student Participation in State Assessments. (1)(a) All students enrolled shall participate at the appropriate grade level for the state-required assessments in grades 3-12.

(b) For assessment and accountability purposes, the state shall not use the primary level designator and all students in grades 3-12 shall be assigned a single grade level. The assigned grade level shall determine the state tests to administer.

Kentucky Exceptions for testing shall be made for medical-exempted students. Based on ESEA section 1111(c)(4)(F), Kentucky Department of Education policy will monitor enrollment and testing of foreign exchange students. Students will participate in state-required testing and will be included in accountability calculations if the student meets Kentucky’s full academic year requirement.

(d) Students categorized as English learners (EL) shall follow testing guidelines set forth by the federal Every Student Succeeds Act of 2015, 20 U.S.C. Secs. 6301 et seq.

(2) For the state assessments in grades 3-12, a school shall test all students during the test window that are enrolled in each accountability grade on the first day of the school’s testing window and shall complete a roster in the electronic application provided by the Department of Education.

(3) A student retained in a grade in which state-required assessments are administered shall participate in the assessments for that grade again and shall continue to be included in all accountability calculations.

(4) A student who is suspended or expelled but continues to receive instructional services required under KRS 158.150 shall participate in the state-required assessments.

“Section 9. Students Not Participating in State-Required Assessments. (1) If a student does not participate in state-required assessments, the school at which the student was enrolled on the first day of the testing window shall include the student in the roster in the electronic application provided by the Department of Education. (2) A student who does not take the state assessments and does not qualify for approved exempted status shall be assigned the lowest reportable score on the appropriate test for accountability calculations.

(3) A student reaching the age of twenty-one (21) years of age who no longer generates state funding under Support Education Excellence in Kentucky shall not be required to participate in state-required assessments.

(4) A student who is expelled and legally not provided instructional services under the standards established in KRS 158.150 shall not be considered to be enrolled for a full academic year, and shall not be included in accountability calculations.

(5) If a student has been expelled or suspended at some point during a year and is enrolled but does not complete the state-required assessment, the student shall be included in the accountability calculation. (6)(a) If participation in the state-required assessment would jeopardize a student’s physical, mental or emotional well-being, a school or district shall submit a request for medical exemption, which shall be subject to the approval of the Department of Education and which describes the medical condition that warrants exempting a student from the assessments. (b) An identified disability
or handicapping condition alone shall not be considered sufficient reason for granting a medical exemption to state-required assessment and accountability requirements. (c) A student with an approved medical exemption shall be excluded from state-required assessments and state and federal accountability calculations. (7) If the student moves out of state or to a private school before state-required assessments can be completed in the school or district’s announced testing window, the student shall be excluded from accountability calculations.”

viii. Continued Support for School and LEA Improvement

(ESEA section 1111(d)(3)(A))

a. Exit Criteria for Comprehensive Support and Improvement Schools
Describe the statewide exit criteria, established by the State, for schools identified for comprehensive support and improvement, including the number of years (not to exceed four) over which schools are expected to meet such criteria.

A school under comprehensive support and improvement status will exit upon meeting the following:

- For Schools Identified based on Graduation Rate: The school no longer meets the criteria for identification (i.e. Graduation Rate at or above 80%).
- For Schools Identified in Bottom 5%:
  - The school no longer meets the criteria for identification; and
  - The school demonstrates progress on the overall score, which encompasses all indicators included in the accountability system.
- For Schools Identified based on Subgroups:
  - The school no longer meets the criteria for identification; and
  - The group or groups that served as the basis for identification demonstrate progress on the overall score, which encompasses all indicators included in the accountability system.

For example, a school’s data from school year 2021-22 would be used to identify the school as a CSI school in the fall of 2022. The same school’s 2022-23 data would be used to determine if they were eligible to exit CSI status in the fall of 2023.

It is possible that schools will meet more than one entrance criteria and be designated for comprehensive support and improvement. In that situation, those schools will be required to meet the exit criteria for each area that led to entry into comprehensive support and improvement status. Schools will be required to meet the exit criteria for each designation in the same year in order to exit.

For example, if a school is designated as CSI for graduation rate and bottom 5% that school would have to meet the exit criteria for both designations before completely removing CSI status.

b. Exit Criteria for Schools Receiving Additional Targeted Support
Describe the statewide exit criteria, established by the State, for schools receiving additional targeted support under ESEA section 1111(d)(2)(C), including the number of years over which schools are expected to meet such criteria.
In schools that were identified for Additional Targeted Support and Improvement (ATSI) in fall of 2018, low-performing subgroups (subgroups performing as poorly as all students in any of the lowest performing 5%) that served as the basis for identification must demonstrate continued progress on the data that served as the basis for identification.

For example, a school’s data from school year 2017-2018 was used to identify the school as an ATSI school in the fall of 2018. The same school’s 2018-2019 data will be used to determine if they are eligible to exit ATSI status in the fall of 2019.

In schools that are identified for ATSI in the fall of 2022 and beyond, low-performing subgroups (subgroups performing as poorly as all students in any of the lowest performing 5%) that served as the basis for identification must perform above all students in any of the lowest 5% of all schools and demonstrate progress on the overall score, which encompasses all indicators included in the accountability system. Upon meeting that criteria, schools will exit ATSI status. For example, if a school is identified as an ATSI school in the fall of 2022, the same school’s 2022-2023 data will be used to determine if they are eligible to exit status in the fall of 2023.

Exit Criteria

</table>

c. More Rigorous Interventions
Describe the more rigorous interventions required for schools identified for comprehensive support and improvement that fail to meet the State’s exit criteria within a State-determined number of years consistent with section 1111(d)(3)(A)(i)(I) of the ESEA.

Kentucky has been recognized nationally in the area of school improvement. (See the study by Mass Insight). Looking forward and considering the freedoms permitted in ESSA, Kentucky seeks to expand upon its successes to continue to serve its struggling schools. Senate Bill 1, passed by the Kentucky General Assembly during the 2017 legislative session, also outlines certain steps to be taken in the area of school improvement/turnaround upon initial identification. Additionally, the current state regulations specifying school improvement processes have been revised by the KDE to reflect the required criteria found in Senate Bill 1 and in ESSA. Specifically, 703 KAR 5:225 and 703 KAR 5:280 became effective on August 6, 2018.

Upon initial identification for Comprehensive Support and Improvement, CSI schools are subject to an initial comprehensive audit that will provide the following: a diagnosis of the causes of the school’s low performance, with an emphasis on underperforming subgroups of students and corresponding critical resource inequities; a determination of the leadership capacity of the principal to lead as a turnaround specialist; an assessment of the interaction and relationship among the superintendent, central office personnel and the school principal; a recommendation of the steps the school may implement to launch and sustain a turnaround process; and a recommendation to the local board of education of the turnaround principles and strategies necessary for the superintendent to assist the school with turnaround efforts. Per Senate Bill 1, districts are required to select an audit team and a turnaround team that will develop the turnaround plan for the identified CSI school. Districts have the option to select the services provided by the Kentucky Department of Education or of an outside private entity with commensurate funds provided from the KDE. Regardless of that selection, the Kentucky Department of Education will ensure the successful development and implementation of the school’s turnaround plan through the monitoring and periodic review process provided for in ESSA.

Should the school fail to exit CSI status after three years, or not make annual improvement after two years, the Kentucky Department of Education will conduct an additional state-led comprehensive audit of the school and the district as well as make a determination as to the leadership capacity of the principal to lead the turnaround efforts and the school and district’s capacity to support the turnaround process at the school level. Based upon those findings, KDE will work in partnership with the district and the school to amend the school’s Comprehensive School Improvement Plan (CSIP) and provide additional technical assistance.

The CSIP is a significant component of the continuous improvement process in Kentucky. School and district improvement efforts focus on student needs through a collaborative process involving all stakeholders to establish and address priority needs, district funding and closing achievement gaps between identified subgroups of students. Additionally, schools and districts build upon their capacity for high-quality planning by making connections between academic resources and available funding to address targeted needs. More information about the support, tools and strategies associated with
CSIPs and Comprehensive District Improvement Plans (CDIPs) can be found on the CDIPs website.

Following the state-led comprehensive audit, an additional audit will occur every two years, or as deemed necessary by the commissioner of education, until the school exits comprehensive status.

Additionally, the KDE will provide Educational Recovery (ER) Staff to all CSI schools that do not exit CSI status after three years, or a school that does not make annual improvement over two years. Educational Recovery Directors (ERDs) are responsible for supervising Educational Recovery Leaders (ERLs) and Educational Recovery Specialists (ERSs), coordinating resources (including multiple educational partners, business, civic and faith-based providers), and providing leadership to ensure success in school leadership, culture, planning, organization, compliance and support services and resources. For each school identified for CSI, an ERL and two ERSs will be placed to support the turnaround work at the school. ERLs mentor and coach school leadership to ensure schoolwide decisions are made to enhance student achievement. Additionally, ERLs place an intentional focus on building schoolwide sustainable systems that support school improvement. They work with school leadership to develop a school improvement plan, curriculum, and a school budget, and work to promote a positive school culture. ERSs model best practices and coach teachers to provide quality instruction in the classroom and the necessary interventions. ER Staff will work with CSI schools to develop and execute strategies around the school’s improvement plan.

An exception will be made for schools which are identified for comprehensive support and improvement and do not make any annual improvement, as determined by the department, for two consecutive years. These schools will receive the state led comprehensive audit after the second year rather than the third year so that the KDE can take more immediate action to support the school.

d. **Resource Allocation Review**
   Describe how the State will periodically review resource allocation to support school improvement in each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

   The KDE will periodically review resource allocation to support school improvement in each LEA serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

   For LEAs serving a significant number of CSI schools, during the comprehensive audit process outlined in Kentucky below, LEA resource allocation to support school improvement will be reviewed. KDE will address any identified inequities in resources that are having a negative impact on those schools and their students.

   For LEAs serving a significant number of TSI schools, ER staff will review LEA resources and allocations to determine if they are being used effectively for school improvement.

e. **Technical Assistance**
Describe the technical assistance the State will provide to each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

**LEAs Serving a Significant Number of CSI Schools**
For districts serving a significant number of CSI schools, KDE will conduct a comprehensive audit at the district level to analyze the systems in place to support district level school improvement efforts for identified CSI schools. Additionally, the comprehensive audit will determine if district leadership has the capacity to lead school improvement efforts for CSI schools.

ER Staff will collaborate with the LEA to develop a district improvement plan to address the needs of low-performing schools. ER Staff will monitor the implementation of this plan. Additionally, ER Staff will monitor through 30/60/90-day plans to ensure that the LEA is providing direct support and leadership to the CSI schools.

**LEAs Serving a Significant Number of TSI Schools:**
KDE will provide districts serving a significant number of TSI schools, including schools identified for ATSI, professional development opportunities for district and school personnel.

Each district will be assigned an ERL who will collaborate with the district to develop a 30/60/90-day improvement plan. The district also will receive periodic visits and assistance from an Educational Recovery Leader to ensure that the plan is being implemented.

Additionally, the KDE will connect districts serving a high number of TSI schools, including schools identified for ATSI, to Hub Schools. In 2013, the KDE identified three Hub Schools.

These schools were low-performing schools that embraced the school turnaround process and became high-performing schools. The purpose of each Hub School is to capture its own best or promising practices based on data and results and to connect with other schools in their region, with emphasis on connections with those schools that have a TSI or ATSI designation. Hub Schools will be a lab of support and “Hub” of learning activity for both students and adults. In addition, they will be knowledgeable of the promising/best practices from CSI schools to strengthen connections and address multiple needs within their geographic area.

**f. Additional Optional Action**
If applicable, describe the action the State will take to initiate additional improvement in any LEA with a significant number or percentage of schools that are consistently identified by the State for comprehensive support and improvement and are not meeting exit criteria established by the State or in any LEA with a significant number or percentage of schools implementing targeted support and improvement plans.

LEAs with a significant number of schools that are consistently identified for CSI or TSI status and do not exit could be subject to a review and potential audit regarding district governance, instructional programming, fiscal management and accountability, facilities, and transportation pursuant to the process provided in KRS 158.780, KRS 158.785 and 7. 
03 KAR 3:205. In addition to the actions taken under “More Rigorous Action” (Title I, Part A (4)(viii)), KDE will collect data (e.g., operational audits, school and district report cards) from the school districts with a significant number of schools that are consistently identified for CSI or TSI status and do not exit. That data will then be analyzed pursuant to KRS 158.785, and the commissioner of education will determine if significant deficiencies are present to warrant an onsite management review of the district. If the commissioner of education determines that the onsite management review of the district has revealed that the significant deficiencies indicate the presence of critically ineffective or inefficient management, the commissioner will order a management audit consistent with KRS 158.785. The findings of that management audit could lead to a continuum of action including, but not limited to: a corrective action plan for the district that would be monitored by the KDE; designation of the district as a state-assisted district; or designation of the district as a state-managed district.

In state-assisted districts, the local board retains authority; however, the KDE provides assistance to the district to develop and implement a plan to correct deficiencies found in the audit and monitors that development and implementation process. If the commissioner determines that the plan is being inadequately developed or implemented, he/she shall make a recommendation to the KBE to declare the district a “state-managed district.” In state-managed districts, the local board loses authority and the KDE/KBE assume supervision/operation of the district.

4. Disproportionate Rates of Access to Educators
(ESEA section 1111(g)(1)(B))
Describe how low-income and minority children enrolled in schools assisted under Title I, Part A are not served at disproportionate rates by ineffective, out-of-field, or inexperienced teachers, and the measures the SEA will use to evaluate and publicly report the progress of the SEA with respect to such description.4

The Kentucky Department of Education (KDE) focuses on promoting equitable access to effective educators for all students, including minority students, those experiencing poverty, English learners and students with disabilities. Therefore, all districts and schools are charged with ensuring equitable access to experienced and effective teachers.

The Equitable Access for Effective Educators Plan for Kentucky (Equity Plan) was written in collaboration with the Equity Plan Work Group led by the Division of Next Generation Professionals that has become the Division of Educator Recruitment and Development since the reorganization of the agency. This reorganization has brought into the division individuals from the Education Professional Standards Board agency. The Work Group who collaborated to develop the plan was comprised of members from the KDE, as well as the former Education Professional Standards Board (EPSB) and Kentucky Center for Education and Workforce Statistics (KCEWS) now known as the Kentucky Center for Statistics (KYSTATS). Extensive stakeholder comments and suggestions were collected through feedback loops including online communication to solicit comments and face-to-face meetings with advisory committees, civics groups, 

4 Consistent with ESEA section 1111(g)(1)(B), this description should not be construed as requiring a State to develop or implement a teacher, principal or other school leader evaluation system.
regional education cooperatives, and community groups. The Equity Plan was approved by the United States Department of Education (USED) September 10, 2015. The KDE’s Equity Plan outlined a process to monitor and communicate the results of improvements efforts to stakeholders, provide technical assistance for district personnel to support their efforts to implement strategies, engage in a continuous improvement process that highlights the purpose of the plan and use the results to measure success as well as determine next steps. The Equity Plan originally identified four measures used to evaluate the impact of the implemented strategies. The key components of the 2015 Equity Plan have been operationalized through the consolidated state plan and the KDE’s recruitment and retention initiative.

To assess whether students enrolled in schools assisted under Title 1, Part A were served at disproportionate rates by ineffective, out-of-field, or inexperienced teachers, the following data are collected and reported on the Kentucky School Report Card Equity Tab. The percentage of students taught by ineffective, inexperienced and out-of-field teachers is provided for each sub-population (students with disabilities, students experiencing poverty, minority students and English learners).

<table>
<thead>
<tr>
<th>Designation</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ineffective Teacher</td>
<td>An ineffective teacher receives a summative effectiveness rating of “ineffective” as determined through the local performance evaluation system that meets the requirement established by KRS 156.557. An ineffective teacher consistently fails to meet expectations as determined by a trained evaluator, in competencies identified as the performance criteria in the Kentucky Framework for Teaching.</td>
</tr>
<tr>
<td>Out-of-Field Teacher</td>
<td>An out-of-field teacher does not meet all applicable Kentucky certification requirements in the subject area or grade level in which they are teaching.</td>
</tr>
<tr>
<td>Inexperienced Teacher</td>
<td>A teacher with 0-3 years of teaching experience.</td>
</tr>
</tbody>
</table>

This data are collected from multiple data sources including the EPSB (Education Professional Standards Board) Local Educator Assignment Data (LEAD) report which identifies when educators are teaching out-of-field, the School and District Report Card dataset, and school/district MUNIS reports. Data are limited to students with primary enrollments only. If an identified teacher taught a student in a secondary enrollment, those students are not included.

The following table outlines the definition by which each student population was identified.
### Student Population

<table>
<thead>
<tr>
<th>Category</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economically Disadvantaged</td>
<td>Determined using student status for free/reduced lunch; an indication of a student’s level of eligibility to participate in the National School Lunch Program for breakfast, lunch, snack, supper, and milk programs.</td>
</tr>
<tr>
<td>Minority/Non-white Students</td>
<td>A person having origins or characteristic of a human group having racial, religious, linguistic, and certain traits in common.</td>
</tr>
<tr>
<td>Student with Disabilities</td>
<td>A person having a disability and eligible for special education and related services under the Individuals with Disabilities Education Act (IDEA) according to an Individualized Education Program (IEP), Individual Family Service Plan (IFSP) or service plan.</td>
</tr>
<tr>
<td>English Learners</td>
<td>Students in Kentucky schools whose primary language is a language other than English.</td>
</tr>
</tbody>
</table>

Students are matched to identified inexperienced and out-of-field teachers using the EPSB-assigned ID number. Historically, the EPSB ID has been a recommended field in Infinite Campus (the KDE’s student data system) but has not been required. To ensure a more encompassing representation of student/teacher proportions in subsequent reporting cycles, inclusion of EPSB ID on all Infinite Campus entries will be prioritized.

</tbody>
</table>

Note: Out-of-field teacher counts are not limited to specific course codes. If a teacher was identified as out-of-field in at least one course, students in all courses taught by identified teacher are included in out-of-field counts.
Due to the passage of Senate Bill 1 (2017), the measure and method for collecting teacher and leader effectiveness data was adjusted to fulfill the state law regarding district reporting and data collection. Percent of ineffective teachers is self-reported by each school, in aggregate, by subpopulation. Names of ineffective teachers are not provided/collection. There were no ineffective teachers reported for Non-Title I Schools and was reported as 0. This differs from the N/A data which was unavailable.

Finally, the school report card will allow districts to take a deeper dive into data and create a plan centered on student placement to help address identified gaps. Districts will address identified needs through setting goals in their Comprehensive School Improvement Plan (CSIP) and Comprehensive District Improvement Plan (CDIP), which will be reviewed annually.

Much of Kentucky’s support and monitoring activities for all schools and districts center around the development, revision and monitoring of the CSIP or CDIP. Previously, schools that were identified as Focus or Priority Schools/Districts have specific processes and content requirements for development of the CSIP/CDIP relative to their status. This

Note: Due to the passage of Senate Bill 1 (2017), the measure and method for collecting teacher and leader effectiveness data was adjusted to fulfill the state law regarding district reporting and data collection. Percent of ineffective teachers is self-reported by each school, in aggregate, by subpopulation. Names of ineffective teachers are not provided/collection. There were no ineffective teachers reported for Non-Title I Schools and was reported as 0. This differs from the N/A data which was unavailable.
will continue for schools that are identified as Comprehensive Support and Improvement (CSI) and Targeted Support and Improvement (TSI) Schools under the ESSA. All other schools and districts (including all Title I schools) are required to complete a plan, but the requirements are not as prescriptive as those for the current Focus and Priority Schools and Districts as will be the case for the new CSI and TSI schools. The CSIP/CDIP process requires a needs assessment to be completed that includes the involvement of parents, students and the community. Committees, as part of this process, analyze and use the data to determine the school’s or district’s needs. The data is then synthesized into causes and contributing factors, translated into needs and then prioritized. Research-based goals, objectives, strategies and activities are developed to address the priority needs. Additionally, the process requires a review of the previous year’s plan to evaluate its effectiveness, which is in turn used to inform the development process for the new plan and includes a plan for ongoing public communication. As a result, district plans will have strategies to address equitable access to teachers.

For the past several years, Kentucky also has been working with AdvancEd (now Cognia) to implement its electronic Adaptive System of School Improvement Support Tools (ASSIST) system statewide in order to streamline, simplify and make more transparent both the planning and reporting process for schools and districts, and the monitoring process for the KDE. Simultaneously, the KDE has been increasing the amount of resources and the expectation that schools and districts must achieve consistently higher levels of performance through a continuous improvement framework. Currently, the KDE is transitioning to a new system called eProve to perform these functions.

The purpose of ASSIST (now eProve) is to reduce the number of plans required of schools and districts, better align the state’s data collection and practices with those of the U.S. Department of Education and ensure the use of a more comprehensive plan allowing districts to track resources used and results realized from the implementation of electronic plans. It provides schools and districts with a template for their plans, the ability to upload additional compliance data and a method for monitoring completion of school and district strategies in the plan.

Connecting Title I schools to the ASSIST (now eProve) process provides a support and intervention component, as the system requires a data analysis procedure that will lead to identification of the root causes leading to low student performance among subgroups. This enables schools to create a strategic plan that directly addresses the root causes and to effectively monitor the implementation and the impact of the plan.

An additional benefit of this collaboration is the development of an electronic state education agency monitoring process that flows from the school and district planning processes. The online tools allow school districts to upload a number of compliance documents, send them electronically to the KDE and receive feedback. Further, it provides the KDE with a centralized location for all monitoring documents and activities, and it is anticipated that ASSIST (now eProve) will reduce or eliminate some monitoring activities that had in the past been performed on-site.

**Consolidated Monitoring** will identify districts through a risk-based assessment that is currently being developed by the KDE. Consolidated Monitoring provides districts an opportunity to review state (e.g., alternative programs, career and technical education,
preschool) and federal programs (e.g., Title I, Title II, Title III, Title IV, Title V, IDEA, McKinney-Vento) with an eye toward effective implementation and collaboration. Aside from individual program reports, districts are provided consolidated reports that represent an opportunity for collaboration among the programs. Program monitors note effective practices identified during the monitoring visit as well as provide recommendations and corrective action plans for addressing noted common concerns and findings of noncompliance under federal and state law. Thus, Consolidated Monitoring provides for the identification and sharing of best practices, along with the remediation of deficiencies. These reports provide opportunities for programs to collaborate, streamline implementation and increase success.

Another aspect focuses on school leadership. The KDE continues to work with the National Institute for School Leadership (NISL) to provide leadership training to school and district leaders. NISL is a thoroughly researched and fully tested program designed to assist schools and districts across the state with leadership development efforts. The intent is to build leadership capacity through distributed leadership, increase recruitment and retention of effective leaders and improve student achievement. NISL was selected for use by the KDE for the following reasons:

- NISL has a track record of success – there are several large-scale evaluations of the program that have found schools led by NISL graduates increase student learning faster than comparable schools.
- NISL is focused on helping educators to become instructional leaders by increasing their leadership skills, subject area knowledge, and ability to implement best practices.
- NISL utilizes best practices in adult learning from education, business and the military to increase participant learning including computer simulations, case studies, and job-embedded practices.
- NISL employs a train-the-trainer implementation model which allows the state to implement LEAD-Kentucky with facilitators drawn from the best local Kentucky educators and sustain the program in the future.

2. School Conditions
(ESEA section 1111(g)(1)(C)): Describe how the SEA agency will support LEAs receiving assistance under Title I, Part A to improve school conditions for student learning, including through reducing: (i) incidences of bullying and harassment; (ii) the overuse of discipline practices that remove students from the classroom; and (iii) the use of aversive behavioral interventions that compromise student health and safety.

The Kentucky Department of Education works across the agency to reduce incidences of bullying and harassment; the overuse of discipline practices that remove students from the classroom; and the use of aversive behavioral responses that compromise student health and safety. The ways in which this is accomplished are discussed below.

(i) The Division of Student Success (DSS) responds to calls from parents/guardians who have concerns about their student(s) being bullied. DSS contacts the district to facilitate communication between the parents/guardians and the school (and district, if appropriate) about addressing the concerns and keeps a log of all of these contacts. DSS staff also offer training and technical assistance in the Olweus Bullying
Prevention Program, as well as providing additional resources for parents, students, educators, and community members through the KDE’s Bullying and Harassment website.

The DSS also collaborates with the Office of Special Education and Early Learning (OSEEL) when responding to calls on bullying/harassment that involve students with IEPs. The OSEEL works with schools to assist with removing barriers to providing a free, appropriate public education for students with disabilities.

(ii) KRS 158.444 requires the KDE to establish and maintain a statewide data collection system by which districts report the following information by sex, race, and grade level:
- All incidents of violence and assault against school employees and students;
- All incidents of possession of guns or other deadly weapons on school property or at school functions;
- All incidents of the possession or use of alcohol, prescription drugs, or controlled substances on school property or at school functions;
- All incidents in which a student has been disciplined by the school for a serious incident, including the nature of the discipline, or charged criminally for conduct constituting a violation of any offense specified in KRS Chapter 508 (e.g., Assault, Wanton Endangerment); KRS 525.070, Harassment, occurring on school premises, on school-sponsored transportation, or at school functions; or KRS 525.080, Harassing Communications;
- The number of arrests, the charges, and whether civil damages were pursued by the injured party; and
- The number of suspensions, expulsions, and corporal punishments.

The DSS publishes an annual school safety statistical report on all of the behavior events and discipline resolutions, by district, pursuant to the requirement of KRS 158.444. This report includes an analysis by gender, race/ethnicity, grade, and socioeconomic status (free and reduced-priced lunch status). The latest report and information on the KDE’s data collection and technical assistance can be found on the Safe Schools Data Collection and Reporting website.

(iii) The Office of Continuous Improvement and Support (OCIS) through DSS assists schools and districts with establishing and implementing a continuum of school-wide, evidence-based practices matched to each student’s individual academic and behavioral needs. Through environments that foster effective instruction, sound interventions, and data-based decision making, opportunity and achievement gaps can be closed.

**Positive Behavioral Interventions and Supports (PBIS)** – KDE is committed to supporting schools and districts with the implementation of multi-tiered systems of support that include academic, behavioral and mental health supports. Kentucky has a long history of commitment to PBIS implementation in its local school districts. In 2001, the KDE began the initiative to promote safe and supportive learning environments for Kentucky students by launching the Kentucky Instructional Discipline and Support (K.I.D.S.) Project. Over time, this system of support has continued to grow and expand. The Kentucky
Academic and Behavioral Response to Intervention Center (KY-ABRI) has the unique ability to serve all Kentucky students through online universal support to districts, delivery of direct service and support to schools across a range of academic and behavior needs, and advocacy for evidence-based practices and data-based decision making through evaluation and dissemination of school fidelity and student outcomes data across the state.

The three pillars of KY-ABRI include:

Pillar 1: Strengthen Coordination and Collaboration among Kentucky Stakeholders to Affect Student Success

Pillar 2: Make Service and Support Available to Every Kentucky District and School

Pillar 3: Evaluate and Disseminate Effective Practices, Fidelity of Implementation, and Impact on Student Success

Kentucky also has nine regional special educational cooperatives that work with member school districts to provide professional learning related to mathematics, literacy and behavior. These centers provide a comprehensive regional support network that offers a host of services to school districts and schools directly. These centers also are funded by the KDE through IDEA Part B state set-aside funds.

Physical Restraint and Seclusion – Prior to 2013, Kentucky had no regulation governing the use of physical restraint and seclusion for the state’s population of over 675,000 school children. To promulgate regulations providing for the physical welfare and safety of children in the public schools, and related to school safety and student discipline, the KBE and KDE began work on an administrative regulation to guide school personnel in the safest use of physical restraint and seclusion. During the regulatory process, a tremendous volume of anecdotal, documentary, written and testimonial comment and feedback was received from educational partners and interested parties. After extensive, collaborative drafting, the regulation was completed and enacted on February 1, 2013.

This landmark regulation established the limitations and requirements for the use of physical restraint and seclusion in local districts, including notification to parents, law enforcement and the KDE, data collection requirements, training requirements for all school personnel and additional training requirements for a core team of individuals who may implement physical restraint or seclusion when there is imminent danger, and reporting requirements.

The KDE, with support from various partners and experts across the state, also develops annual content for the web-based option of the training required of all school personnel, pursuant to Section 6 (1) of 704 KAR 7:160, Use of Physical Restraint and Seclusion in Public Schools. The focus is on positive behavioral supports and interventions to help school personnel increase appropriate student behaviors, decrease inappropriate or dangerous student behaviors, and respond to dangerous situations.
The required annual trainings cover a broad range of information, including Introduction to PBIS, Implementing Schoolwide PBIS, Bullying Prevention and Considering Mental Health. The training includes video footage from Kentucky schools that are effectively implementing positive behavior intervention and support systems; endorsements for the use of school-wide positive behavior systems from leaders within the behavior field, administrators and other school personnel; and video examples of evidence-based practices to assist with implementation. The training also includes brief, focused, engagement activities. Over 40,000 teachers access these videos annually.

**Behavior Institute** – Every other year, the KDE partners with the Kentucky Council for Children with Behavior Disorders (KYCCBD) and other leaders to host a national Behavior Institute. The purpose of the institute is to equip educators with the tools, resources and supports needed to reduce barriers to learning. The 2021 Behavior Institute will be online with a series of virtual meetings occurring each month from February through July. KDE staff and other experts will provide training through a variety of virtual sessions focusing on supports for students and faculty around social and emotional behavioral disorders.

**Disproportionality under the Individuals with Disabilities Education Act (IDEA)** – Disproportionality is monitored under the IDEA in multiple ways. First, the IDEA’s State Performance Plan (SPP), which requires state education agencies (SEAs) to set annual targets over a six-year period, includes three (3) separate indicators (4, 9, and 10) specific to disproportionality. Under this requirement, each year the SEA must report its success in meeting the SPP targets in its Annual Performance Report (APR). Second, the IDEA also requires states to review local education agency (LEA) special education data to determine if significant disproportionality exists in any of the seven (7) federally recognized racial or ethnic groups across fourteen (14) different categories.

Indicator 4 (A and B) under the SPP/APR looks for significant discrepancy in the long-term (greater than 10 days across the school year) out-of-school removals of students with disabilities resulting from a disciplinary event. Indicator 4A is a results indicator where the state reviews the rate of these removals for all special education students regardless of race or ethnicity and compares it to the state target rate. Indicator 4B is a compliance indicator where the state reviews these removals by each of the seven (7) racial or ethnic groups individually and compares them to the same state target rate to determine if significant discrepancy exists based on the race or ethnicity of the student. This is determined for each LEA within the state.

Mathematically, an LEA must have had at least two (2) special education students (collectively for all special education students for Indicator 4A and individually for each race or ethnicity for Indicator 4B) who were subject to long term removals greater than 10 days. If the rate of such removals in any LEA is at least three (3) times, or more, greater than the state’s target rate of 0.20% (or a rate of at least 0.60%) then it has met the mathematical calculation for significant discrepancy. For Indicator 4A there must be at least 50 special
education students in the LEA who could have been subject to long-term out-of-school removals of greater than 10 days while for Indicator 4B there must be at least 10 special education students in the racial or ethnic group who could have been subject to long-term out-of-school removals greater than 10 school days.

However, to be identified with *significant discrepancy* requires the LEA not only exceed the state’s target rate for this indicator as described above, but the LEA did so because it had inappropriate policies, procedures or used inappropriate practices that resulted in the removals. LEAs with data suggesting *significant discrepancy* exists must have their policies, procedures and practices reviewed before a final determination is made. LEAs in excess of three times the state target rate and have inappropriate policies, practices or procedures have a *significant discrepancy*.

Indicators 9 and 10 of the SPP identifies *disproportionate representation* based on the identification of students as eligible for special education regardless of disability (Indicator 9) or identification in any of six (6) specific disability categories (Indicator 10). Both Indicators 9 and 10 are reviewed for *disproportionate representation* in each of the seven (7) Federal racial or ethnic groups. Each year, Kentucky identifies LEAs for these two (2) indicators by an examination of the data in addition to an examination to determine if the identifications were the result of inappropriate policies, procedures, or practices.

Kentucky uses the risk ratio methodology to determine if an LEA mathematically has *disproportionate representation* of 2.0 or more that requires a review of policies, procedures, and practices. The risk ratio method reviews and compares the rate at which students in any of the seven (7) race or ethnic groups were identified for special education (Indicator 9) or were identified in any of six specific disability categories (Indicator 10) as compared to the rate of which students not of that same race or ethnic group were identified. If any race or ethnic group is identified at least twice the rate at which students not of that race or ethnic group were identified, and there were at least 10 students identified and 50 students in that race or ethnic group who could have been identified, then the LEA’s policies, practices and procedures are reviewed to determine if the identifications were inappropriate.

LEAs that identified any race or ethnic group at least twice the rate at which other students not of that race or ethnic group were identified, due to inappropriate policies, procedures, or practices have *disproportionate representation* and are found in non-compliance requiring development of a corrective action plan.

*Significant disproportionality* is similar to Indicators 9 and 10 in its methodology and in the areas it reviews. However, in addition to annually reviewing LEA data on the identification of a student as eligible for special education and students identified in any of six (6) specific disability categories, the SEA also examines data specific to the educational setting of the student with a disability and behavioral data specific to the removals of students with disabilities due to a disciplinary event. There are 14 separate categories.
reviewed annually by the SEA for significant disproportionality and each review examines the seven (7) Federal racial or ethnic groups. However, unlike significant discrepancy and disproportionate representation described above, the existence of significant disproportionality is determined based only on a mathematical calculation and is not contingent upon a review of the LEA’s policies, procedures, or practices.

For significant disproportionality, Kentucky uses both a risk ratio and an alternate risk ratio as described in the December 2016 regulations at 34 CFR 300.646-647. In all 14 categories Kentucky has a risk ratio threshold of 3.0. Kentucky also utilizes the regulation’s suggested cell and n-sizes of 10 students identified for the reviewed outcome and 30 students who could have been subject to the outcome. The alternate risk ratio is used when the comparison group (students of all other racial or ethnic groups) in the LEA fails to meet either the cell or n-size. While the risk ratio compares the LEA’s data for the identification of its students in any racial or ethnic group to the rate it identifies any other students in the district who are not in that racial or ethnic group for the same thing, the alternate risk ratio compares the LEA’s identification data for the racial or ethnic group being examined to the statewide rate of the identification of students not in the same racial or ethnic group.

Kentucky also uses two flexibilities allowed by the December 2016 regulations. These include the use of multiple-years (3) in succession and determining if the LEA has met a reasonable progress standard (0.05) in reducing its risk ratio in each of the last two years. This means before any LEA is identified for significant disproportionality, that LEA must have exceeded the state’s threshold (3.0) for three consecutive years in the same category for the same racial or ethnic group. If the LEA is identified for three consecutive years, but reduces its risk ratio by 0.05 in each of the last two years, it will not be subject to the significant disproportionality requirement of reserving 15% of its IDEA allocations to provide Comprehensive Coordinated Early Intervening Services (CCEIS).

State Interagency Council for Services to Children with Emotional Disabilities

– The State Interagency Council (SIAC) for Services to Children with Emotional Disabilities was established through legislation written in 1990 and continues to meet each month. It is a group consisting of various state agency representatives and the parent of a child with an emotional disability that oversees coordinated policy development, comprehensive planning, and collaborative budgeting for services to children with emotional disabilities.

The SIAC oversees coordinated policy development, comprehensive planning and collaborative budgeting for services and supports to children and transition-age youth with or at risk of developing behavioral health needs and their families. The SIAC strives to design and implement a system of care that is youth- and family-driven, community-based, culturally- and linguistically-responsive, trauma-informed, and recovery-oriented. The SIAC conducts monthly meetings that are open to the public.
Kentucky AWARE (Advancing Wellness And Resilience in Education) and School Climate Transformation (SCT) – To address concerns of diagnosable childhood mental illness and suicide, the Kentucky AWARE initiative strives to improve mental health literacy among adults in school communities and to build cross-system capacity for comprehensive mental health approaches for students. In this way, children developing mental health challenges or who are in crisis are more likely to be identified early and supported with appropriate interventions.

Kentucky AWARE SCT have engaged a cross-system state leadership team to help develop critical resources, guidance and tools that can help schools and districts support student mental health most effectively and efficiently. These include a statewide model for integrating school mental health into a Multi-Tiered System of Supports (MTSS) framework that employs evidence-based interventions and collaborative, data-driven decision making practices; guidance regarding brief, regular mental health screening for all students; and development of robust, collaborative partnerships across school and community mental health providers. The AWARE/SCT initiatives are bringing a wide variety of interventions and approaches to schools, among them PBIS/Interconnected Systems Framework (ISF), professional development on trauma-informed approaches, increased on-site clinical providers, suicide and bullying prevention trainings and others. Outcomes data from implementation of these interventions will inform KDE-developed guidance for schools statewide.

7. School Transitions
(ESEA section 1111(g)(1)(D)): Describe how the State will support LEAs receiving assistance under Title I, Part A in meeting the needs of students at all levels of schooling (particularly students in the middle grades and high school), including how the State will work with such LEAs to provide effective transitions of students to middle grades and high school to decrease the risk of students dropping out.

Each public school student in Kentucky has an Individual Learning Plan (ILP), which is defined in 704 KAR 19:002 as “a comprehensive framework for advising students in grades six (6) through twelve (12) to engage in coursework and activities that will best prepare them to both realize college and career success and become contributing members of their communities.” Pursuant to 704 KAR 3:305, the ILP is updated annually, at minimum, to establish and track progress toward the student’s academic and career learning goals, while also keeping students on track to graduate and transition to college and career. The KDE supports schools and districts in creating plans and processes to incorporate the ILP into the structure of the school, in order to best help students complete and maximize their ILPs. Additional information and resources for teachers, parents, and school leadership is available at the KDE Individual Learning Plan website.

Enacted in 2000, KRS 158.146 required the establishment of a comprehensive statewide strategy to provide assistance to local districts and schools to prevent students from dropping out of school. The KDE supports an Early Warning Tool within the statewide student information system that identifies students in elementary through high school that uses data-mining to more accurately predict which students are most at risk of dropping
out or becoming off-track to graduate. Schools and districts can use this tool to identify elementary students with known dropout risk to receive additional supports as they transition to middle school. KDE has also created chronic absenteeism and student mobility reports that can be run through the statewide student information system to identify students in need of additional support. KDE staff provide training and technical assistance on these tools. KDE staff also provides training on what kinds of interventions may be appropriate to best address the risk factors identified for each student, including transition support from elementary to middle grades and middle school to high school.

The Division of Student Success (DSS) also houses a variety of Persistence to Graduation (PtG) initiatives, including a professional learning community, PtG eNews distributed via a listserv, and an annual PtG Summit, webinars, etc., to enhance LEAs’ abilities to provide effective transitions, including resources for students who transition in and out of alternative education settings, and those who decrease the risk of dropping out. (See Persistence to Graduation website for details.)

**KRS 160.380** defines “alternative education program” as a program that exists to meet the needs of students that cannot be addressed in a traditional classroom setting but through the assignment of students to alternative classrooms, centers, or campuses that are designed to remediate academic performance, improve behavior, or provide an enhanced learning experience. Alternative education programs do not include career or technical centers or departments. Pursuant to **704 KAR 19:002**, districts are required to ensure that each alternative education program:

- Aligns with college and career readiness outcomes;
- Is not limited in scope or design; and
- Includes training to build capacity of staff and administrators to deliver high-quality services and programming that conform with best practices and guide all students to college and career readiness.

**704 KAR 19:002**, also outlines the requirements for each student to have an Individual Learning Plan Addendum (ILPA), defined as “an action plan that addresses the changed educational needs of a student based upon entry into or exit from an alternative education program that includes, as appropriate, academic and behavioral needs of the student, criteria for the student’s re-entry into the traditional program, and provisions for regular review of the student’s progress throughout the school year while in an alternative education program.” DSS staff provide monitoring and support of the implementation of the ILPA for alternative education students. Effective use of the ILPA can support continuity of the education pathway once a student leaves the alternative setting. For example, a well-executed ILPA can ensure that a student attending a “day treatment” program operated by the Department of Juvenile Justice who begins work toward an industry-certified workforce credential can continue with those requirements at a traditional school upon his/her return.

DSS monitors compliance and quality in alternative education programs, including annual identification of Alternative Programs of Distinction that can be a model to other alternative education programs. These programs are recognized annually by the Kentucky Board of Education. (See Alternative Education Programs website.)

DSS also leads interagency efforts to address chronic absenteeism through a state work group that includes multiple state agencies along with both district and community
representation. The work group has identified primary and secondary priorities for the state-level work that include defining chronic absenteeism for Kentucky students; quantifying, identifying and disseminating resources to address chronic absenteeism; building buy-in at both the state and local levels; creating data visualization tools for use at the state, district and school levels; and examining the impact of other state legislation like SB 200, which aims to decrease students being referred to the court for status offenses like truancy. The work group also collaborates with the Regional Interagency Councils that are focusing their efforts on addressing chronic absence and truancy to ensure alignment with state efforts.

Additionally, the KDE’s OSEEL is focused on supporting transitions for students with disabilities. As part of the Office of Special Education Program’s (OSEP) IDEA Part B State Performance Plan and Annual Performance Report (SPP/APR), the KDE has developed a multi-phase State Systemic Improvement Plan (SSIP) to improve educational outcomes for students with disabilities. Kentucky’s SSIP focuses on building the capacity of each level of the education system (state, regions, districts) on the use of implementation science principles to create a system of support for teachers on evidence-based practices (EBPs). The State identified Measurable Result (SiMR) is to reduce novice performance and increase proficiency in mathematics for students with disabilities, specifically in grade 8. Ensuring growth in mathematics by grade 8 was essential based on the current research in dropout prevention and to allow students with disabilities to transition to high school successfully.

To support students with disabilities, including those with significant disabilities, Kentucky’s Community Work Transition Program (CWTP) focuses on supporting students to graduate high school prepared for success in postsecondary education and employment. The basis of this work continues to:

- Improve local level transition planning and implementation through active student-focused partnerships centered on the three pillars of employment, community inclusion and independent living through learning or professional learning communities;

- Build capacity at the local level in working with the LEAs to deliver effective transition services by partnering with the Kentucky Interagency Transition Council, University of Louisville and the Human Development Institute (HDI) at the University of Kentucky;

- Promote awareness about the three pillars of transition through professional conference presentations and workshops; and

- Provide resources that will be housed on the KDE transition website for dissemination and access of available resources for the schools in the districts to access.
Section B. Title I, Part C: Education of Migratory Children

1. Supporting Needs of Migratory Children

(ESEA section 1304(b)(1)): Describe how, in planning, implementing, and evaluating programs and projects assisted under Title I, Part C, the State and its local operating agencies will ensure that the unique educational needs of migratory children, including preschool migratory children and migratory children who have dropped out of school, are identified and addressed through:

The Kentucky Department of Education (KDE) participates in the four-step continuous improvement model recommended by the Office of Migrant Education: Comprehensive Needs Assessment (CNA); Service Delivery Plan (SDP); implementation of the plan; and a program evaluation of both program implementation and performance.

The KDE recently underwent a thorough comprehensive needs assessment where the agency examined the needs of all migrant students ranging from birth through age 21, which included preschool children, students enrolled in school, those out of school, and in how parents support their eligible migrant children. The KDE completed a performance evaluation and used that data in combination with parent and staff feedback via Parent Advisory Council (PAC) meetings and surveys to create the student profile.

The needs assessment committee used the profile to create concern and need statements that comprised the CNA. The committee consisted of state, regional, and local level Migrant Education Program (MEP) staff, the evaluator and continuous improvement plan committee, and experts in early childhood education, Title III, college and career readiness coach, math and reading specialists, parent involvement specialists, and consultants with the state and regional PACs. The Kentucky Department of Education will review the annual implementation evaluation, bi-annual performance evaluation, annual Out-of-School Youth (OSY) profile and services information, demographic data and Consolidated State Performance Report (CSPR) annually while reviewing the CNA to determine if the process needs to be repeated and the CNA updated.

Regional and local staff completed an educational needs assessment on all students, ages three through twelfth-grade, and a needs assessment specific to OSY and the OSY Profile, supported by the Graduation Outcomes for Success for the Out-of-School Youth (GOSOSY) Consortium, at least annually. The educational needs assessment collects data on the family as a whole and on the student based upon his/her grade level. It is completed within two weeks of a new move, within two weeks of a new school term starting, every time new grades are posted, when assessment results become available, and any other time the student has a change in need. The OSY Profile is completed either at the time of recruitment or within two weeks of the OSY being recruited into the program and is updated at least annually or when the youth has a change in need. The funded MEPs use this information to plan services for each group of students.

Completion of needs assessments and OSY Profiles are monitored on a regular basis by the SEA and regional offices using reports generated in MIS2000, the state data system for MEPs. The SEA and regional offices also monitor the assessment of student needs during annual on-site and/or desk monitoring.

i. The full range of services that are available for migratory children from appropriate local, State, and Federal educational programs;

The Kentucky Migrant Education Program (KYMEP) works closely with all possible programs at the local and state level to identify and meet the needs of all migrant students.
ages birth through 21 regardless of which school (if any) is attended. Once a student is identified as migrant, the school is notified and the advocate is assigned to the child and immediately begins collaborating with all programs within and surrounding the child’s community. The MEP staff assist families in registering for school, communicate with the Family Resource Centers, Title I Part A staff, and liaisons to homeless students to identify additional needs and once those needs have been identified, migrant children are subsequently enrolled in all applicable programs. Migrant students are categorically eligible for free lunch in every school district in Kentucky, including private schools. Free lunch extends during the summer term, as well.

Some, but not all, of the programs that MEP students participate in while enrolled in public or private schools include, but are not limited to, the following: Title I Part A, McKinney-Vento program, Title III, 21st Century, Rural Low Income, University of Kentucky Cooperative Extension programs, local health department, and university dental colleges.

The MEP staff works diligently with all available resources to identify and meet the needs of preschool age students (ages 3 through 5 not enrolled in kindergarten), as well. Upon enrolling a preschool age student in the Migrant Education Program, the staff meets with many agencies to assess the student’s needs and how to best meet his/her needs. Local school districts with preschool programs, Head Start, or Migrant Head Start are contacted and attempts are made to enroll the child into a state- or federally-funded preschool. The staff then works with that agency and the family to identify resources to meet the student’s other needs, such as the following: dental, vision, vaccines, birth certificates and other significant records. Preschool age students who do not enroll in a state or federally funded preschool are assisted with applying for childcare assistance programs or provided services in the home. The program works closely with the Hands program based out of local health departments, First Steps, and other programs to ensure that all of the students’ needs are being met by other resources before directly providing services.

Out-of-School Youth and students who have dropped out of school are assisted with identifying their needs and the program works to re-engage them in school. The MEP staff works with credit recovery programs, Adult Basic Education programs, High School Equivalency (HEP) programs, and the Community Education Program among others to re-engage students who are not enrolled in school. The MEP staff also works with various community organizations to meet the student’s other needs that may be preventing them from effectively participating in school.

Evaluation data is drawn from:

- MIS 2000, the KYMEP’s student information system that houses the definitive record of data associated with eligibility, student enrollment in schools and MEPs, and services provided to migrant students;
- KDE Assessment Data (KY School Report Card), the record of state performance targets and outcomes for statewide KPREP results, end of course (EOC) exam results, and graduation rate;
- Infinite Campus for attendance, grades, state assessment and kindergarten readiness screener (KSCREEN) results, and teacher of record;
- Migrant parent surveys, used to support the Comprehensive Needs Assessment (CNA) process and program evaluation;
• KYMEP Implementation Report, used to capture data from regional programs when not available from other sources; and
• KYMEP program monitoring conducted annually.

Kentucky was recently asked to participate in the Study of the Title I, Part C Migrant Education Program (MEP) through the U.S. Department of Education. The purpose is to study the implementation of services through the migrant education program. The KYMEP is also working with ARCC (Appalachian Regional Comprehensive Center) to research the migrant education programs in other states. This information will be used to help drive continuous improvement in the MEP.

ii. Joint planning among local, State, and Federal educational programs serving migratory children, including language instruction educational programs under Title III, Part A;

At the state level, the Kentucky Migrant Education Program works closely with many state and federal programs to raise awareness of migrant students, the program, and student needs. The KYMEP jointly plans and coordinates with Title III, McKinney-Vento and other federal, state and local programs as specified in ESSA.

Additionally, the program is collaborating with career and technical education staff to improve access of migrant students to career ready options. Through joint services planning, the KYMEP will implement innovative strategies and resources that address the specific educational needs of the migrant children. This concept creates a supportive learning experience tailored to specific needs of the migrant students and provides transient students the opportunity to remain in the school of origin, thus improving academic achievement.

The effectiveness of the joint collaborative initiatives will be determined by KYMEP staff and supporting program partners through review of the evaluation data and other measurable program data. This occurs at regional meetings, during district monitoring and regional center monitoring.

iii. The integration of services available under Title I, Part C with services provided by those other programs; and

The Kentucky Department of Education (KDE) takes a three-pronged approach to effective Identification and Recruitment (ID&R) and servicing migrant students: statewide recruitment and training; regionally-based recruitment and training; and locally-based recruitment. The KDE employs a state ID&R Coordinator/State Director who oversees all ID&R efforts, monitors quality control, and maintains the state database. The ID&R Coordinator/State Director reviews reports from MIS2000, the state data system, to ensure that the services being provided to students are accurately documented. The priority for service is students being seen at least twice a week. The second prong of the Kentucky Department of Education ID&R approach is at the regional level. The state contracts with local operating agencies and regional centers, which are responsible for the identification and recruitment and services of students in low incidence areas and local education agencies that qualify for a standalone Migrant Education Program (MEP), but have opted not to operate one. The regional service centers offer a wide variety of services to the students. Since they operate out of a school district, cooperative or university, they rely heavily on the collaboration within the district. Thereafter, efforts are made to get students into programs that the district or
community is already offering. They also will provide summer tutoring and summer camps for middle and high school students. The regional service center hires regional recruiters who serve the out-of-school youth in the non-standalone districts.

The third prong of the Kentucky Department of Education’s approach to ID&R and services occurs at the local level. Each LEA or consortia that qualify for and wish to operate a MEP must employ a recruiter/advocate; the state highly encourages that the recruiter be bilingual in the two most frequently spoken languages of the migrant population in that area. At the local level the recruiter/advocate or tutor will provide the services to students from birth through age 21. The local MEP offers a wide variety of services to meet the student’s needs including: transportation, science tutoring, social studies tutoring, math tutoring, reading/writing tutoring, credit accrual, interpreting, referrals, and health, dental and eye care.

The effectiveness of the integration of services along with opportunities for improvement is determined by performance data review, stakeholder feedback, and survey results and outside agency review of the SDP. The evaluation process with the outside agency (Arroyo/ESCORT) occurs on a cyclical basis. The results of this evaluation are used to make changes to MPOs (measurable program outcomes) in the SDP (service delivery plan).

The purpose of the Kentucky migrant education program is to provide exceptional services to migrant students to ensure they do not fall between the cracks and have the same opportunities as other students.

iv. Measurable program objectives and outcomes.

Objectives and outcomes are gleaned in the following areas: reading/writing, math, high school dropout/prevention rate, school readiness, and out-of-school youth. The following table lists Measurable program outcomes.

<table>
<thead>
<tr>
<th>Goal Area</th>
<th>Measurable Program Outcome</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading/Language Arts</td>
<td>Each year beginning in Fall 2019, 50% of PFS or at-risk migrant students who receive two or more supplemental migrant services per week will advance at least one proficiency level on the K-PREP Reading assessment.</td>
</tr>
<tr>
<td>Mathematics</td>
<td>Each year beginning in Fall 2019, 45% of PFS or at-risk migrant students who receive two or more supplemental migrant services per week will advance at least one proficiency level on the K-PREP Mathematics assessment.</td>
</tr>
<tr>
<td>High School Graduation</td>
<td>By Fall 2021, 75% of High School migrant students will be on track to graduate as indicated by the MEP CCR Checklist. By Spring 2022, increase the percentage of High School Students targeted for supplemental academic services who</td>
</tr>
</tbody>
</table>
Goal Area | Measurable Program Outcome
--- | ---
 | receive 2 or more supplemental services per week that are on track to graduate by 10 percentage points over the baseline established in 2018-2019.
School Readiness | By Spring 2022, the percent of migrant preschool age children either enrolled in preschool or receiving 10 or more in home service contacts who demonstrate kindergarten readiness on KSCREEN (Brigance) will increase to 60%.
Out-of-School Youth (OSY) | By Spring 2022, 75% of OSY who receive English language instruction will demonstrate improved language proficiency based on pre and post testing of lessons used.
OSY (dropouts) | By 2022, 4% of OSY will participate in structured education programs (GED or HS Diploma/Credit Recovery).

Several service delivery strategies will be employed and include the following:

- 1.1(1) During the school year, PFS students and those who are at risk in reading will receive supplemental support services at least twice per week.
- 1.1(2) Provide middle and high school students who are PFS and/or at-risk in reading with data-driven reading instruction at least twice per week.
- 1.2 In the summer, local projects will provide at least 25 hours of instruction that includes reading/language arts through programs.
- 1.3 Local projects will support all migrant students (not only the most at-risk) using these recommended practices:
  - tailor supplemental academic instruction to student needs;
  - review formative/interim assessment data as an early warning/progress monitoring process; and
  - use research-based reading interventions that are consistent and promote student growth.
- 1.4 Provide home visits to parents that focus on literacy development.
- 1.5 Dedicate at least one Parent Advisory Council/Parent Involvement (PAC/PI) meeting to the theme of literacy development. Tailor the topics to the ages and reading levels of the children whose parents participate.
- The mathematics target is to increase the K-PREP mathematics migrant student percent proficient to 40% by SY 2021-2022. The measurable objectives for mathematics include the following:
  - Each year beginning in Fall 2019, 45% of PFS or at-risk migrant students who receive two or more supplemental services per week will advance at least one proficiency level on the K-PREP mathematics assessment.
- 2.1 During the school year, PFS students and those who are at-risk in mathematics will receive supplemental support services in mathematics at least twice per week.
2.2 In the summer, local projects will provide at least 25 hours of instruction (including mathematics and STEM development) through programs.

2.3 Local projects will support all migrant students (not only the most at-risk) using these recommended practices:
   - tailor supplemental academic instruction to student needs,
   - review formative/interim assessment data as an early warning/progress monitoring process, and
   - use research-based mathematics interventions that are consistent and promote student growth.

2.4 Provide home visits to parents that focus on mathematics literacy development.

The state performance target for high school graduation/dropout prevention is to increase the average four-year graduation rate for migrant students to 87% by 2022.

The measurable objectives for high school graduation/dropout prevention include the following:
   - By Fall 2021, 75% of High School migrant students will be on track to graduate as indicated by MEP CCR Checklist.
   - By spring 2022, increase the percentage of high school students targeted for supplemental academic services who receive 2 or more supplemental services per week that are on track to graduate by 10 percentage points over the baseline established in 2018-2019. Several service delivery strategies will be employed and include the following:

3.1 Ensure that migrant secondary students receive essential information and resources about career choices and continuing education.

3.2 Collaborate with school-based programs to ensure equal access to college and career resources. Partner with counselors, CCR counselors, CCR resource labs (available in some districts).

3.3 Migrant students will have improved access to involvement in co-/extra-curricular activities.

3.4 Develop informational packets with graduation requirements for families that address the specific needs of students who are moving/highly mobile.

3.5 Educate migrant parents with children in grades 8-12 on high school graduation requirements.

3.6 Support parents and students in strengthening their self-advocacy skills and strategies.

3.7 Actively attend to student mental health by leveraging existing resources.

The measurable objectives for school readiness include the following:
   - Increase the overall percent of Kentucky kindergarten students demonstrating kindergarten readiness (KSCREEN) to 65% in 2021-2022. By Spring 2022, the percent of migrant preschool age children either enrolled in preschool or receiving 10 or more home service contacts who demonstrate kindergarten readiness on KSCREEN (Brigance) will increase to 60%. Several service delivery strategies will be employed and include the following:
• 4.1 Assist MEP service providers in developing plans for promoting school readiness and model activities for migrant parents.
• 4.2 Assist parents with enrolling their children in preschool programs and kindergarten.
• 4.3 Provide home-based services for those who do not attend a preschool program or Headstart.
• 4.4 Support preschool and other parents through language development and support.

The state performance targets and measurable performance objectives for out-of-school youth include the following:
• Provide and coordinate support services that meet the needs of all students’ Measurable Program Outcomes (MPO): By Spring 2022, 75% of OSY who receive English language instruction will demonstrate improved language proficiency based on pre and post testing of lessons used.
• By 2022, 4% of OSY will participate in structured education programs (GED or HS Diploma/Credit Recovery).

5.1 Regional and local programs will provide opportunities for development of basic English and life skills through lessons and resources for independent learning.
• 5.2 Local projects will support recovery youth/dropouts in articulating personal educational goals and accessing educational opportunities.

*Recovery youth are defined as OSY who indicate an interest in or are eligible to obtain a high school education, receive a GED, or participate in structured adult education and/or job training.

2. **Promote Coordination of Services**

(ESEA section 1304(b)(3)): Describe how the State will use Title I, Part C funds received under this part to promote interstate and intrastate coordination of services for migratory children, including how the State will provide for educational continuity through the timely transfer of pertinent school records, including information on health, when children move from one school to another, whether or not such move occurs during the regular school year.

The KYMEP has developed a handbook for the use of the Migrant Student Information Exchange (MSIX) system and a separate handbook for the use of the MIS2000 Web Application. The Kentucky Department of Education has held two statewide meetings where consultants informed field staff of the new regulations for MSIX and how we plan to implement the regulations. All MEP staff are required to inform parents about the MSIX system in a manner agreed upon by the local or regional Parent Advisory Councils (PAC), review the data contained in the system with the parents as suggested by the PAC (within reason), and take actions to ensure that the data contained in the system is accurate. Staff are required to use the Consolidated Student Report to assist with the proper enrollment of all students, must review the Consolidated Student Report with school staff for all students who have an enrollment in another state or country, and to send move notifications when made aware of a child moving out of the area.

The KYMEP has worked closely with data specialists from the Kentucky Department of Education and Management Services for Education Data (MS/EdD), the proprietor of MIS2000, to automate much of the process for uploading data into MSIX. The regional
data clerks upload new student enrollment records, withdrawals, and other data into the
database on a daily basis. The server then uploads this data to MSIX every night. On the
10th, 20th, and 30th of every month, the state student information system, Infinite
Campus, exports data into MIS2000. This mass import includes all course history data,
assessments, health, and most enrollment data. The import will continue to occur every
10 days year-round, making all data available in MSIX within ten days of its availability
whether the move occurs during the regular school year or not.
In addition to using MSIX, intrastate collaboration is achieved through the use of the
MIS2000 Web Application. All MEP staff have secure access to record and review data
held within the Web Application. Staff record the services that were provided, a service
start and end date, funding source, provider name and certification, and a comment
detailing what was accomplished and next steps.
Service providers update the web application on a regular basis, daily to bi-weekly,
ensuring timely transfer of data. When a student moves to another area within the state,
the new service provider can quickly and easily see what the student’s needs were in the
previous district, prior Certificates of Eligibility (COEs), test scores, services provided
and has next steps outlined. The web application has assisted the program in providing
more appropriate services, reducing the duplication of services and better tracking student
needs.

3. Use of Funds

(ESEA section 1304(b)(4)): Describe the State’s priorities for the use of Title I, Part C funds, and
how such priorities relate to the State’s assessment of needs for services in the State.
KYMEP funds support two SEA program consultants along with additional funds set
aside for tablets, recruitment sweeps, contracts, and travel.
KYMEP funds provide for four regional service centers along with additional funding
support to LEAs that generate a base of $55,500 to provide Parent Advisory Councils
(PAC) and employ recruiters, advocates and tutors.
The KYMEP is guided by the Service Delivery Plan (SDP), which is updated on an
ongoing basis to provide guidance to regional and local program initiatives. The SDP is
the primary tool for implementing the overall goals of the KYMEP.
The SDP articulates the following: needs of the migrant children on a statewide basis,
measurable assessment outcomes of the KYMEP and how the outcomes address the
states performance targets, services provided by the KYMEP and the evaluation of the
program and whether or to what degree it is implemented with fidelity.

Section C. Title I, Part D: Prevention and Intervention Programs for
Children and Youth who are Neglected, Delinquent, or At-Risk

1. Transitions between Correctional Facilities and Local Programs

(ESEA section 1414(a)(1)(B)): Provide a plan for assisting in the transition of children and youth
between correctional facilities and locally operated programs.
Transition services correspond to each student’s treatment plan and graduation plan.
Students are given the Learning and Working Styles Inventory and Career Assessment. A
behavioral and work-related inventory is administered to determine additional student needs and interests. These needs are addressed in the student’s individualized transition plan. Partnerships with Vocational Rehabilitation, Kentucky Tech (part of KDE), Job Corps, virtual learning, and availability of college correspondence courses make transition a top priority. The Department of Juvenile Justice and the Department of Corrections retain 15-30% of their allocation for transition services. Both state agencies have designated personnel to oversee transition within each facility; however, the LEAs will coordinate the transition services for students. Additionally, the Kentucky Department of Education’s (KDE) Division of Student Success staff represent the KDE on several state groups that address the transition of children and youth between correctional facilities and locally-operated programs, including the Juvenile Justice Advisory Board, Juvenile Justice Oversight Council and Kentucky Educational Collaborative for State Agency Children. Additionally, the Kentucky Department of Education (KDE) assists in the transition of youth and children with disabilities between correctional facilities and locally-operated programs by exercising its General Supervision responsibility to oversee educational programming in facilities operated by the Department of Corrections (DOC) and the Department of Juvenile Justice (DJJ) as required under Part B of the Individuals with Disabilities Education Act (IDEA). This oversight includes local education agencies (LEAs) that have one or more DJJ facilities within their boundaries that provide educational services within these facilities. This oversight includes a two-fold approach:

- compliance monitoring to ensure all IDEA-eligible students receive a free appropriate public education (FAPE).
- provision of technical assistance, including the dissemination of best practices to assist the corrections facilities in providing effective transition for students into public schools or the workplace.

2. Program Objectives and Outcomes

(ESA section 1414(a)(2)(A)): Describe the program objectives and outcomes established by the State that will be used to assess the effectiveness of the Title I, Part D program in improving the academic, career, and technical skills of children in the program.

The goal of the Title I, Part D (TIPD) program is to provide supplemental services to promote student success at meeting the state’s rigorous academic standards.

Additionally, the TIPD program looks to improve the academic, career and technical skills of children and youth who have been placed in local or state secure-care institutions who are neglected, delinquent or at risk so they might become productive members of society and reduce recidivism back to secure-care settings.

The program objectives and indicators to assess program effectiveness include:

**Objective 1:** To maintain and improve educational achievement of participants.

TIPD subgrantees will include details in the program plan for funding. TIPD programs will provide an individualized instructional experience using Individual Learning Plans.
(ILPs) or Individual Graduation Plans (IGPs) and beginning with their intake process include the identification of each student’s academic strengths and weaknesses.

- **Indicator 1.1**: Students will progress academically above their current level in math and reading.
  - TIPD programs will monitor progress through pre- and post-assessments over the course of the student’s stay in the facility. Subgrantee recipients will submit a performance report annually.
- **Indicator 1.2**: The percentage of students that pass the state-mandated tests will increase annually.
  - This indicator will be measured through state assessment data released on the School Report Card annually.

**Objective 2**: To increase the number of school credits accrued by participants that meet State requirements for grade promotion and high school graduation. TIPD programs will include details in the program plan for funding.

- **Indicator 2.1**: The percentage of students promoted from remedial classes to grade level will increase annually.
  - Academic growth will be measured using score increases in post-assessments as compared to pre-assessments used, ILPs/IGPs, classroom assessments, and grades upon entry. Subgrantee recipients will submit a Performance Report annually.

**Objective 3**: To provide participants with transition services to regular programs or other education programs operated by local education agencies. Each TIPD program will provide individualized transition or aftercare plans for students in their facility, and keep documentation of meetings for each student to include collaboration with career and technical programs and attendance by representatives of the secure-care education team and the student’s LEA to discuss academic progress, future transition to LEA, and postsecondary goals. Subgrantee recipients will submit a performance report annually and will include details in the program plan for funding.

- **Indicator 3.1**: Students who move into a school program will remain in that program until completion.
  - TIPD programs will monitor this indicator through their tracking process up to 90 days after leaving the facility, as applicable.

**Objective 4**: To assist participants in completing high school (or high school equivalency requirements) and obtaining employment or providing participants with postsecondary education and/or job training programs after leaving the correctional facility or institution for neglected or delinquent children and youth. Each TIPD program will provide individualized transition or aftercare plans for students in their facility and keep documentation of meetings for each student to include collaboration with career and technical programs and attendance by representatives of the secure-care education team and student’s LEA to discuss academic progress, future transition to LEA, and postsecondary goals. Subgrantee recipients will submit a performance report annually and will include details in the program plan for funding.
• **Indicator 4.1:** The percentage of students completing high school or GED requirements will increase annually.
  o TIPD programs will monitor this indicator through their tracking process up to 90 days after leaving the facility, as applicable.
• **Indicator 4.2:** The percentage of students entering the workforce, entering postsecondary institutions, or job training programs following release from state custody will increase annually.
  o TIPD programs will monitor this indicator through their tracking process up to 90 days after leaving the facility, as applicable.

Additionally, the Kentucky Department of Education (KDE) is in the process of implementing the [New Skills for Youth](#) initiative. This initiative is employer-led which ensures cross-institutional involvement and is designed to connect students with in-demand careers. Through dual credit and scholarship opportunities, students will receive credentials which are highly valued by business and industry. Neglected and delinquent students served through this initiative receive the academic, career readiness skills necessary to successfully transition to postsecondary or the workforce.

### Section D. Title II, Part A: Supporting Effective Instruction

The Kentucky Department of Education (KDE) utilizes Title II, Part A funds for the purpose of addressing section 2001 of ESSA, including activities to:

- increase student achievement consistent with the challenging state standards;
- improve the quality and effectiveness of teachers, principals and other school leaders;
- increase the number of teachers, principals and other school leaders who are effective in improving student academic achievement in schools; and
- provide low-income and minority students greater access to effective teachers, principals and other school leaders.

Under Title II, Part A, 95% of the state grant is sub-granted to Local Education Agencies (LEAs). Although State Education Agencies were provided the option to reserve an additional 3% of the total state allocation for 2020, the KDE chose not to reserve these funds from the LEA sub-grants due to the needs at the local level. The remaining 5% is used for administration and state-level activities. These funds are provided to states and LEAs based on a formula that considers the population and level of poverty. The KDE received a preliminary state allocation of approximately $32.7 million in Title II, Part A funds for fiscal year 2020. Of this amount, approximately $31 million will be sub-granted to the 171 LEAs. A proportional share of the state-level activities will be utilized to provide professional learning services to Kentucky’s nonprofit, private school teachers and administrators.

1. **Use of Funds**
   
   *(ESEA section 2101(d)(2)(A) and (D)): Describe how the State educational agency will use Title II, Part A funds received under Title II, Part A for State-level activities described in section 2101(c), including how the activities are expected to improve student achievement.*
Kentucky’s plan for the use of Title II, Part A funds underscores the agency’s belief that the best way to improve student achievement is to increase the effectiveness of educators who are closest to students. The KDE administers a working conditions survey in schools every other year to gather teacher and principal input. The results are used to determine and address the professional learning needs of teachers, principals and other school leaders.

The KDE employs professional learning coordinators who provide professional learning support for educator effectiveness and improved student achievement through the implementation of the Kentucky Academic Standards; Kentucky’s Multi-tiered System of Supports Framework; and Model Curriculum Framework, including the local curriculum development process, professional learning communities, a balanced assessment system, and evidence-based instructional practices for content-area standards-aligned instruction. Statewide professional learning supports via kystandards.org and KyMTSS.org provide a strong investment in teachers, principals and other school leaders who must also be well-prepared and supported to lead the professional learning of other educators at the local level.

The KDE High-Quality Instructional Resources (HQIRs) project is further in place to communicate the KDE definitions of HQIRs and high-quality professional learning and build the rationale for use and implementation. Providing access to high quality, standards-aligned instructional resources is another important deliberate action in ensuring equitable access to learning, yet access to high-quality instructional resources varies drastically from district to district and school to school. This results in a wide variance in the quality of instructional content used to support grade-level appropriate student learning experiences across Kentucky. The goal of this project is to equip and empower local schools in giving educators access to high-quality instructional resources and professional learning so they are better prepared to support all students with engaging, relevant, standards-aligned grade-level assignments. A consumer guide for HQIRs for reading and writing will be published in July 2022. The professional learning coordinators lead PL around this important work and will collaborate on a pilot project related to the local curriculum development process, including the evaluation and selection of HQIRs and the need for HQPL as part of implementation.

The KDE also employs discipline specific consultants who provide professional learning related to effective instructional practices and implementation and alignment of Kentucky Academic Standards to instruction and assessment. A report by The New Teacher Project, (The Opportunity Myth), identified four key resources that all students need access to in order to be successful. According to the report, under achieving students benefit even more than their peers when provided access to these four key resources. The KDE is committed to provide professional learning for teachers and principals to ensure that all students have access to these critical resources: high teacher expectations, grade-appropriate standards-aligned instruction and assignments, strong engagement with the curriculum, and effective instruction.
Professional learning for principals is focused on the four performance measures of the Kentucky Framework for Personnel Evaluation that include planning, environment, instruction and professionalism. The training emphasizes effective feedback and conferencing techniques that lead to teacher growth and effectiveness. This professional learning also includes personalized support, regional learning labs, statewide networking opportunities and Plus One thought partnering. The intended outcome of this professional learning is to ensure that educators are supported through meaningful, formative feedback cycles that promote peer-to-peer learning and distributed leadership models through authentic learning experiences.

2. Use of Funds to Improve Equitable Access to Teachers in Title I, Part A Schools (ESEA section 2101(d)(2)(E)): If an SEA plans to use Title II, Part A funds to improve equitable access to effective teachers, consistent with ESEA section 1111(g)(1)(B), describe how such funds will be used for this purpose.

The Kentucky Department of Education (KDE) will utilize Title II, Part A funds to support equitable access to effective educators through a variety of activities in all Kentucky schools.

Kentucky provides professional learning opportunities for principals so that they may recognize, support, and advance the effectiveness of educators and for teachers so they may continuously improve their efforts in the classroom. The KDE will support equitable access to effective educators through investment in a statewide professional learning network of principals who are primarily responsible for student-teacher assignments, community partnerships, coordinating the work of the school with education councils and boards of education, allocating resources, school scheduling, professional learning plans, and the growth and evaluation of certified educators.

In addition, Kentucky will continue the administration of a working conditions survey among public school teachers and principals in Kentucky’s schools. The survey yields valuable information related to teacher preparation and induction, professional learning and working conditions that speak directly to retention of educators, all of which contribute to the overall effectiveness of educators. This is a valuable tool for both state and local planning efforts with regard to educator effectiveness.

3. System of Certification and Licensing (ESEA section 2101(d)(2)(B)): Describe the State’s system of certification and licensing of teachers, principals, or other school leaders.

As a result of Former Governor Bevin’s November 2018 executive order, the Kentucky Department of Education was reorganized and the Office of Educator Licensure and Effectiveness (OELE) was created. The staff and work of the Education Professional Standards Board (the agency) now falls within the OELE. The EPSB (the board) is still in place and continues to oversee program approval, accreditation, licensure, and educator ethics. The Kentucky Department of Education’s OELE oversees the state’s system of certification and licensing of teachers, principals and other school leaders. Under the authority of state law, OELE, in full collaboration and cooperation with its education partners, promotes high levels of student achievement by establishing and enforcing
professional standards for preparation, certification, and responsible and ethical behavior of all professional educators in Kentucky. The OELE is responsible for issuing and renewing certificates for all Kentucky teachers, administrators and other school professionals. OELE has worked closely with Western Kentucky University and the Green River Regional Educational Cooperative, with the KDE serving in an advisory role, to redesign principal certification through the University Principal Preparation Initiative. OELE staff work closely with local school districts in the hiring process to ensure a properly credentialed educator in every professional position in Kentucky schools. OELE staff also works with Kentucky colleges and universities, out-of-state institutions, and national evaluation and accrediting agencies. The commissioner of education serves as the Executive Secretary of the EPSB.

Kentucky certification is based upon the completion of an EPSB-approved educator preparation certification program that includes student teaching and testing, when applicable. Kentucky requires a recommendation from the certification official at the college/university where the applicant completed his/her initial teacher preparation program and student teaching regarding the specific teacher preparation program completed, grade level, type of degree/program and completion date. The EPSB ensures that preparation programs for Kentucky educators meet established standards of quality. It facilitates the accreditation process, reviews and approves programs and continuous assessment materials, and provides technical assistance for program improvement. It also coordinates the review of university-based alternative routes to certification programs and is responsible for emergency program review.

Base Teaching Certificates
The Kentucky base teaching certificates are as follows:

- Interdisciplinary Early Childhood Education (Birth to Primary) - Preparation outlined in 16 KAR 2:040
- Elementary School (Primary through Grade 5) - Preparation includes the academic disciplines taught in the elementary school
- Middle School (Grades 5 through 9) - Preparation includes either one or two teaching fields selected from English and communications, mathematics, science, or social studies; candidates who choose to simultaneously prepare for teaching in the middle school and for teaching exceptional children are required to complete only one middle school teaching field
- Secondary School (Grades 8 through 12) - Preparation includes one or more of the following specializations: English, mathematics, social studies, chemistry, physics, biology or earth science
- Middle/Secondary School (Grades 5 through 12) - Preparation includes one or more of the following specializations: agriculture, business and marketing education, family and consumer science, industrial education or engineering and technology
- Elementary/Middle/Secondary School (Primary through Grade 12) - Preparation includes one or more of the following specializations: art, foreign language, health, physical education, integrated music, vocal music, instrumental music or school media librarian
• Exceptional Children (Primary through Grade 12 and for collaborating with teachers to design and deliver programs) - Preparation includes one or more of the following specializations: learning and behavior disorders, moderate and severe disabilities, hearing impaired, hearing impaired with sign proficiency, visually impaired, or communication disorders

Restricted Base Certificates
• Psychology (Grades 8 through 12)
• Sociology (Grades 8 through 12)
• Journalism (Grades 8 through 12)
• Speech/Media Communication (Grades 8 through 12)
• Theatre (Primary through Grade 12)
• Dance (Primary through Grade 12)
• Computer Information Systems (Primary through Grade 12) English as a Second Language (Primary through Grade 12)

Endorsements to Certificates
• Computer Science (Grades 8 through 12)
• English as a Second Language (Primary through Grade 12)
• Gifted Education (Primary through Grade 12)
• Literacy Specialist/Reading (Primary through Grade 12)
• Instructional Computer Technology (Primary through Grades 12)
• Endorsement for Mathematics Specialist (Restricted-Primary through Grade 5)
• Endorsement for Environmental Education (Primary through Grade 12)
• Driver Education (Grade 8 through Grade 12)

Other School and District Certifications
• Learning and Behavior Disorders (Grades 8-12)
• School Counselor
• School Psychologist
• School Social Worker
• Principal (Primary through Grade 12)
• Supervisor of Instruction (Primary through Grade 12)
• Director of Pupil Personnel
• Director of Special Education
• Superintendent
• Occupation-based
• Consultant
• Junior Reserve Officer Training Corps

Alternative Routes to Certification
The Kentucky General Assembly, under KRS 161.048, enacted alternative routes to teacher and administrator certification for persons who have demonstrated exceptional work and/or educational experiences. EPSB is the state agency that establishes standards and procedures for the alternative route options. The EPSB provides technical assistance to qualifying individuals who have potential as educators in Kentucky schools, to local
boards of education, and to institutions of higher education in implementing these options. There are currently eight alternative routes.

- Option 1: Exceptional Work Experience Certification
- Option 2: Local District Training Program Certification
- Option 3: College Faculty Certification
- Option 4: Adjunct Instructor Certification
- Option 5: Veterans of the Armed Forces
- Option 6: University-Based Alternative Route to Certification
- Option 7: Institute Alternative Route to Certification
- Option 8: Teach for America (TFA) Alternative Route to Certification

### 4. Improving Skills of Educators

*(ESEA section 2101(d)(2)(J))*: Describe how the SEA will improve the skills of teachers, principals, or other school leaders in order to enable them to identify students with specific learning needs, particularly children with disabilities, English learners, students who are gifted and talented, and students with low literacy levels, and provide instruction based on the needs of such students.

The Kentucky Department of Education (KDE) will continue to provide schools and districts access to consultants with expertise related to students with specific disabilities, English learners, students who are gifted and talented, and students with low literacy levels; culturally responsive instruction; a multi-tiered system of supports and all disciplinary content areas. Regional education cooperatives also will continue to provide training and support specific to these areas, especially the Special Education Cooperatives that provide on-site and regional support for educators.

To support the vision of each and every student being empowered and equipped to pursue a successful future, the KDE prioritizes the implementation of high quality, rigorous academic standards and the support of local schools and districts in ensuring that each and every student has access to quality curriculum, effective instruction (at grade level), and educators who have high expectations for learning.

KRS 158.6453(2)(j) directs that the KDE shall provide or facilitate statewide training sessions for existing teachers and administrators on how to:

1. Integrate the revised content standards into classroom instruction;
2. Better integrate performance assessment of students within their instructional practices; and
3. Help all students use higher-order thinking and communication skills.

In providing statewide professional learning opportunities for the Kentucky Academic Standards (KAS), the KDE is focused on four key commitments in order to confront “The Opportunity Myth” (2018, TNTP) for student success. The four commitments are high expectations for all students, grade-appropriate assignments, strong instruction and deep student engagement. These commitments are the foundation for all professional learning opportunities and resources. By design, all professional learning opportunities link to the four key commitments for building educator capacity, closing achievement gaps and boosting student success.

### Phases of Systematic Implementation
In phase one of standards implementation, the KDE offered 31 sessions in 16 different regional locations throughout March 2019 in order to meet with district and school leaders. During these meetings, over 1,350 leaders from 156 districts received links to the newly revised KAS, virtual professional learning modules, curriculum assessment toolkits and guidance on the development of district and school teams to facilitate the implementation of the new standards. Modules and other standards-based resources were made available on the KYstandards.org webpage. Weekly webcasts also occurred in April and May 2019 to provide continued support for school and district facilitators. The topic schedule and archived webcasts are available on the Standards Webcasts webpage under the heading “Spring 2019 Standards Rollout Webcasts.” These webcasts had nearly 5,300 hits, or viewers, as of August 2019.

Phase two commenced with regional conferences in Carter, Fayette, Jefferson and Christian Counties in June 2019 to support the roll-out and implementation of new standards for teachers, school/district leaders and post-secondary educators. National partners, content experts and subject area consultants provided professional learning to school and district leaders, teachers and post-secondary faculty to support the implementation of the new standards. Over 2,000 educators participated in these professional learning opportunities. Online content area modules and instructional tools and resources as well as general system support resources for school and district leaders were also made available on the Standards Resources page of KYstandards.org.

September 2019 began phase three for operationalizing standards implementation. The KDE provided a variety of professional learning opportunities, including bi-monthly webcasts and monthly virtual workshops around standards implementation and the four key commitments for student success. A topic schedule and archived webcasts are available on the Standards Webcasts webpage. Each semester, the KDE also facilitated a self-paced book or topic study. This provided opportunities for educators to investigate evidence-based practices and discuss implementation strategies. Educators participated as individuals, grade-level teams, content departments or full school faculties. Professional Learning Mini-Grants also were awarded to 49 schools who applied and submitted professional learning plans for the implementation of the academic standards.

Phase four launched in March 2020 and was impacted by the COVID-19 emergency. Regional leadership meetings were recorded and uploaded on KYstandards.org. Web-based professional learning supports for implementation, including modules, book studies, and webinars, have been ongoing during the 2020-2021 academic year. The KDE also provided re-entry and distance-learning and hybrid instructional guidance. Upcoming March 2021 Leadership meetings will focus on the revision of the Model Curriculum Framework (MCF) (per 158.6451(2)). While the KDE is responsible for the development of standards, state law assigns each local School-Based Decision Making (SBDM) council the authority to adopt policy on the determination of the school’s curriculum and appropriate instructional resources based on language found in KRS 160.345. As a result, the MCF provides guidance for schools and districts on the process of curriculum development and the adoption of high-quality instructional resources. Based on research and feedback from a task force of Kentucky educators, the revised MCF focuses on developing a system-wide process for designing curriculum aligned to the KAS at the school level, implementation of curriculum at the school and classroom level and the role of assessment in curricular decisions. The revised MCF also emphasizes the importance of teacher collaboration through the professional learning community (PLC) process as well as looking at current research around balanced
assessment and instructional best practice. The development of an effective curriculum is an extensive process, and the MCF provides guidance to schools as they begin and continually revisit this work.

Kentucky’s school districts require leadership, support and services to enable them to effectively implement standards for student achievement in all academic areas. Thus, the KDE will continue to provide necessary information, resources and guidance to assist districts as they design standards-based curricula that promotes highly effective teaching, learning and balanced assessment practices. Greater, more equitable access to high-quality curriculum, effective grade-level instruction, and high expectations for learning can and does lead to improved student achievement – for all students, but particularly for those students who are behind grade-level.

Additionally, the KDE has a federal State Personnel Development Grant (SPDG) with two goals for building the skills of Kentucky teachers of students with disabilities.

Goal 1: To improve the capacity of transformation zone (TZ) teams (LEAs, regional partners and schools) to implement and sustain multi-tiered systems of support (MTSS), by aligning related initiatives at each level; and through ongoing professional learning for LEAs and school administrators.

Goal 2: To improve student achievement in TZ LEAs, through multiple, sustained professional learning strategies that supports a MTSS that impacts teachers, school administrators, students and families.

The integration of SPDG activities with Kentucky’s Every Student Succeeds Act (ESSA) plan, State Systemic Improvement Plan (SSIP), Collaboration for Effective Educator Development, Accountability and Reform (CEEDAR) Center and the State Implementation and Scaling-up of Evidence-based Practices (SESEP) Center are the cornerstones of the SPDG which then leverage the implementation of research-based practices that use classroom-based techniques to assist children prior to referral for special education.

The KDE has developed greater capacity to support the use of implementation science to provide professional learning to LEAs and schools to better support and sustain initiatives. Similar tools are used in the SSIP, such as capacity assessments and the Observation Tool for Instructional Support and Systems (OTISS).

Finally, through the State Systemic Improvement Plan (SSIP), LEAs receive training and coaching to effectively use implementation science principles to support teachers on evidence-based practices to improve educational outcomes for students with disabilities in mathematics. Based on feedback from LEAs, the KDE has incorporated Positive Behavioral Intervention and Supports (PBIS) into the SSIP to support mathematics outcomes. Stakeholders indicated that challenging behaviors are increasing, leading to students with disabilities being removed from the classroom. This results in missed instructional time, thus making it difficult for students with disabilities to be successful academically.
Kentucky has worked to develop a cascade of linked implementation teams at the state, region, district and building level focused on identification and addressing problems of practice through improvement cycles. The establishment of the building-level teams provides the direct supports needed to grow the capacity of teachers to use evidence-based practices in the classroom. LEAs receive monthly coaching on implementation science, training effectiveness and fidelity measures. Through theSSIP, districts have developed training plans that include growth measures, operationalized teacher practices, follow-up supports and coaching plans. Continued growth in capacity and understanding of the state, region and district to support and sustain effective implementation of evidence-based practices in the classroom can be applied to any content area in the future.

5. **Data and Consultation**  
* (ESEA section 2101(d)(2)(K))*: Describe how the State will use data and ongoing consultation as described in ESEA section 2101(d)(3) to continually update and improve the activities supported under Title II, Part A.  

The Kentucky Department of Education (KDE) will continue to provide an electronic platform for posting certified vacancies and hiring information through the Kentucky Educator Placement Service (KEPS). This system provides the KDE with valuable data about the educator workforce and informs critical shortage and minority educator reporting. The system provides a mechanism to ensure that educators are appropriately certified to teach in areas to which they are assigned. This assists KDE planning for recruitment, preparation and retention support provided to schools and districts.

The working conditions survey provide data to be analyzed for trends related to professional learning, working conditions and other constructs. These results are provided at the state, district and school level. The data inform KDE planning related to the type, format and frequency of professional learning as indicated by educator input.

The KDE also created a database system that collects data on all new occupation-based industry certified teachers. The system will track admission, attendance, assessments, credentials earned, completion of tasks and completion of the professional learning program.

The KDE Division of Program Standards (DPS) also includes surveys at the end of the professional learning modules accessible on kystandards.org. DPS staff review the feedback and use the survey data to inform revisions and updates to existing modules and create new professional learning supports that are needed.

6. **Teacher Preparation**  
* (ESEA section 2101(d)(2)(M))*: Describe the actions the State may take to improve preparation programs and strengthen support for teachers, principals, or other school leaders based on the needs of the State, as identified by the SEA.

The KDE partners with faculty from institutions of higher education in consortia related to educating students with disabilities, understanding and implementing Kentucky Academic Standards (KAS), integrating Kentucky’s Framework for Personnel Evaluation system, and cooperating around Kentucky’s educational priorities in order to prepare future educators to be classroom- and school-ready on their first day in a Kentucky classroom or school. Specifically, the OTL Division of Program Standards professional
learning coordinators conduct a statutorily required standards implementation update each year for Educator Preparation Program faculty. The DPS also partners with the EPP Advisory Council regarding PL for KAS implementation and professional learning around the Model Curriculum Framework, including the local curriculum development process and the evaluation and selection of high-quality instructional resources (HQIRs).

Section E. Title III, Part A, Subpart 1: English Language Acquisition and Language Enhancement

1. Entrance and Exit Procedures

(ESEA section 3113(b)(2)): Describe how the SEA will establish and implement, with timely and meaningful consultation with LEAs representing the geographic diversity of the State, standardized, statewide entrance and exit procedures, including an assurance that all students who may be English learners are assessed for such status within 30 days of enrollment in a school in the State.

The Kentucky Department of Education (KDE) already had standardized entrance and exit procedures in place prior to the passage of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA). At the December 2016 All Federal Programs meeting, Kentucky requested guidance concerning the need to develop new entrance and exit criteria under ESSA since the state was already meeting this requirement. In a response dated January 19, 2017, the U.S. Office of State Support (OSS) stated that Kentucky could continue to use the same procedures if they met all of the requirements in the statute and final regulations. As a result, the KDE will continue those procedures.

As part of 703 KAR 5:070, all local school districts are required to administer a Home Language Survey (HLS) to all students in grades K-12 upon their initial enrollment in the district as the first step in the screening process to identify English learner (EL) students. The HLS shall be based on four questions, at a minimum, derived from the Office for Civil Rights (OCR) and Department of Justice (DOJ) approved HLS questions.

- What is the language most frequently spoken at home?
- Which language did your child learn when he/she first began to talk?
- What language does your child most frequently speak at home?
- What language do you most frequently speak to your child?

A student who is identified potentially as EL based on the HLS is administered the WIDA Access Placement Test (W-APT) in kindergarten. Starting with the 2017-18 school year, potential EL students in grades 1-12 will be assessed using the WIDA Screen Online. If a student in grades 1-12 scores a 4.5 overall composite, the student will be identified as Initially Fully English Proficient (IFEP).

If the WIDA Screener Online indicates that a student is not English proficient, the local school district must develop a Program Service Plan (PSP) for the student.

The PSP document must meet the federal notification requirements. The district is required to complete the screening and the PSP notification to the parents within 30
calendar days if the student was enrolled at the beginning of the school year and within two weeks if the student enrolled after the start of the school year.

Additionally, school superintendents must approve and submit District Assurances in the Grant Management Application and Planning (GMAP) system each year. Included is an assurance that the parents/legal guardians of all EL students in the district will be notified within 30 calendar days after the beginning of the school year of: (a) the reason for the child’s identification as EL; (b) the child’s level of English proficiency; (c) the child’s program of instructional services; (d) the specific exit requirements for the program and (e) parental rights to opt out of services or to seek alternative services as outlined in ESEA Section 1112(e)(3), and in the case of a child with a disability, how such a program meets the objectives of the Individualized Education Program of the child, as described in Section 614(d) of the Individuals with Disabilities Education Act. For a child who has not been identified for participation in a language instruction education program prior to the beginning of the school year, the eligible entity (LEA/school district/consortium) assures that it will carry out subsections a-e within two weeks of the child being placed in such a program. Fulfillment of the parent notification requirement is documented on the PSP and a copy of the letter is saved in the student’s EL folder.

Districts are required to enroll a kindergarten student who has taken the W-APT test as an EL student regardless of the score. A PSP must be developed, services provided, and the student will take the ACCESS (formerly known as the Assessing Comprehension and Communication in English State-to-State) for ELs in January. The student cannot exit the EL program until taking the ACCESS for ELLs in the first grade and meeting the exit criteria. The student’s exit date would be June 30 of the year the student met the exit criteria.

In order to exit from an EL program in the state of Kentucky, a student must achieve a score of 4.5 or higher Overall Composite Proficiency Level on a Tier B or a Tier C ACCESS for ELLs as a student in the 1st grade or above. As a result of new cut scores on the ACCESS for ELLs and the transition to the new WIDA Online Screener, the KDE’s Office of Standards, Assessment, and Accountability (OSAA) conducted a standards setting process led by Dr. Gary Cook of WIDA on August 1, 2017. The OSAA invited a diverse group of participants from LEAs across the state to be involved in the process to determine if the entrance and exit criteria would remain the same or need revision. The group was not only geographically diverse, including those from both urban and rural areas, but consisted of EL coordinators, EL teachers, a district Director of Exceptional Children, a consortium of EL consultants, a Director of Secondary Instruction and a District Assessment Coordinator from both large districts and small independent districts. Based on the review of Kentucky’s ACCESS for ELLs data, the group consensus was to recommend an exit score of 4.5 with the ACCESS for ELLs.

2. SEA Support for English Learner Progress
   
   (ESEA section 3113(b)(6)): Describe how the SEA will assist eligible entities in meeting:
   
   (i) The State-designed long-term goals established under ESEA section 1111(c)(4)(A)(ii), including measurements of interim progress towards meeting such goals, based on the State’s English language proficiency assessments under ESEA section 1111(b)(2)(G); and
(ii) The challenging State academic standards.

Kentucky school districts choose the type of Language Instruction Educational Program (LIEP) used to provide services for ELs. The Kentucky Department of Education (KDE) conducts annual training at the beginning of the year for new district EL coordinators on district obligations for providing EL services along with regional trainings and online resources such as newsletters and webinars. This includes providing guidance on the types of programs considered effective based on the Office for Civil Rights (OCR) and Department of Justice (DOJ) January 7, 2015 Dear Colleague Letter and Chapter 2 of the Office of English Language Acquisition (OELA) Toolkit. The KDE continues to provide technical support to districts and consortiums throughout the year.

As a member of the WIDA consortium, the KDE works with the WIDA Professional Learning Coordinator to schedule workshops, webinars and resources that will maximize the training opportunities for Kentucky teachers serving ELs.

The KDE continues to partner each year with the Kentucky Teachers of English to Speakers of Other Languages (KYTESOL) to support the organization’s annual conference for Kentucky educators. The KDE also partners with the Kentucky Coalition for English Learners (KyCEL) whose annual conference promotes collaboration, networking, and professional learning opportunities to strengthen the learning experiences of ELs across the Commonwealth.

3. Monitoring and Technical Assistance

(\textit{ESEA section 3113(b)(8)}): Describe:

i. How the SEA will monitor the progress of each eligible entity receiving a Title III, Part A subgrant in helping English learners achieve English proficiency; and

ii. The steps the SEA will take to further assist eligible entities if the strategies funded under Title III, Part A are not effective, such as providing technical assistance and modifying such strategies.

The Kentucky Department of Education (KDE) implements an online consolidated Grant Management Application and Planning (GMAP) system to help districts maximize the use of their grant dollars from federal non-competitive programs. Title III, Part A has been part of this system since the system’s 2016 pilot year. School districts use the system to apply for and manage grant applications. Title III uses the system to monitor, review and approve plans, along with administering reports.

The KDE uses a Statewide Consolidated Monitoring Process in an effort to reduce the impact on districts’ time and services when monitoring visits occur. Title III joined this process in the 2013-14 school year. The process coordinates the monitoring of state and federal programs with a group of school districts identified annually through a risk-based assessment. Districts are provided a Title III/English learners report outlining both the local programs’ strengths and areas of improvement. If there are compliance issues, districts are required to submit documentation in accordance with an actions needed form. Title III has the option to monitor additional districts if information provided through GMAP data or other indicators warrant a review.

Title III contributes to the overall consolidated monitoring report to the district that notes effective practices identified during the monitoring visit as well as providing
recommendations for addressing common concerns. The consolidated report provides opportunities for the district programs to collaborate, streamline implementation and increase success within each program.

Section F. Title IV, Part A: Student Support and Academic Enrichment Grants

1. Use of Funds
   *(ESEA section 4103(c)(2)(A))*: Describe how the SEA will use funds received under Title IV, Part A, Subpart 1 for State-level activities.

   The KDE will use state-level funds under this section to:
   1) Provide monitoring of as well as training, technical assistance, and capacity building to LEAs to support the effective implementation of local initiatives;
   2) Identify and eliminate State barriers to the coordination and integration of programs, initiatives, and funding streams that meet the purposes of this subpart, so that local educational agencies can better coordinate with other agencies, schools, and community-based services and programs;
   3) Support LEAs in providing programs activities in the following areas:
      o Well-rounded educational opportunities;
      o Safe, healthy, supportive, and drug-free environments that support student academic achievement; and,
      o Effective use of technology.

   Part of KDE’s strategy to identify training, technical assistance and capacity building needs will be to analyze the results for the LEA needs assessments submitted as part of the LEA application to determine how to allocate resources to best meet the needs of LEAs across the state. Some areas of consideration for state level activities include but are not limited to supporting work around the missing children database, chronic absenteeism tools for districts, dropout prevention and reengagement, expansion of Positive Behavior Interventions and Supports (PBIS), and social-emotional learning (SEL) and school mental health initiatives. Additionally, in the future, the KDE will analyze data gleaned through LEA monitoring to better inform effective allocation of resources. All expenditures for state-level activities will adhere to federal cost principles.

2. Awarding Subgrants
   *(ESEA section 4103(c)(2)(B))*: Describe how the SEA will ensure that awards made to LEAs under Title IV, Part A, Subpart 1 are in amounts that are consistent with ESEA section 4105(a)(2).

   As prescribed by ESEA Section 4105(a)(2), the KDE will ensure that no LEA will receive less than $10,000. Each LEA will receive its proportional share based on the prior year Title I, Part A allocation. If an LEA does not reach the $10,000 threshold, then all LEAs will be ratably reduced using the methodology outlined in Title I, Part A Guidance for Adjusting Allocations.
Section G. Title IV, Part B: 21st Century Community Learning Centers

1. Use of Funds

(*ESEA section 4203(a)(2)*): Describe how the SEA will use funds received under the 21st Century Community Learning Centers program, including funds reserved for State-level activities.

Under Title IV, Part B funds will be used to support community learning centers that provide academic, artistic and cultural enrichment opportunities for children, particularly students who attend high-poverty and low-performing schools, to meet state and local standards in core academic subjects, such as reading, math and science.

**Administrative funds** will support the costs of carrying out the responsibilities under Title IV, Part B to administer the program at the state level.

Additional collaboration to meet state and federal guidelines is provided through Eastern Kentucky University and the Center for Education and Evaluation Policy (CEEP) at Indiana University.

**Administrative 2%**

*Eastern Kentucky University (year-round)* -

Eastern Kentucky University/Center for Career & Workforce Development supports planning, registration and logistics of all training, conferences and technical assistance, assists with the facilitation of monitors and outreach coordinators, and disseminates information and guidance to schools and districts for the 21st Century Community Learning Centers program.

*Grant Reviewer/Scorer training (fall)* –

The peer review process for applications includes training on the Request for Application (RFA), along with scoring criteria, writing comments and a monetary stipend paid to reviewers. This is a three-day training with the overview provided on the first day and review of applications beginning on the evening of the first day and occurring over the following two days.

*Statewide Advisory Council (spring, summer, fall)* -

The statewide advisory council meets three times per year (two-days each meeting) to review state and federal guidance. The council collaborates with members from other state agencies to best utilize in-state resources to support grantees. The council is comprised of 21st CCLC program directors, outreach coordinators, monitors, other state agency representatives and state staff.

*Professional Development/statewide trainings (year-round)*

Professional development supports learning centers in designing and implementing effective out-of-school time programs (before school, after school and summer) that will result in improved student achievement, and be sustained through community partnerships at the conclusion of the grant funds. Trainings are based on grantee needs, best practices and required state and federal guidance.

- **Statewide training** 2 days (spring)
Spring trainings are based on grantee surveys and a portion covers summer programming requirements. All grantees are required to attend.

- **Cayen APlus Data Training** three days (spring) three days (fall) The Aplus Data Training is a one-day training that is offered three different days. This is a mandatory training to be completed by the program individual(s) responsible for data entry. The training covers extensive detail on data entry for 21st Century reporting in the Aplus Data System that is unique to Kentucky’s 21st CCLC.

- **Level I Orientation** two days (summer)
  Level I Orientation Training is a one-time mandatory training for new Project Directors, Site Coordinators and Co-applicant Representatives. Content includes essential grant components, including information on record keeping, reporting, monitoring and implementation. A secondary, two-day training is provided if required in October for any new staff.

- **Multi-State Conference** three days (fall)
  The 21st Century Community Learning Centers (CCLC) Multi-State Conference brings together State Education Departments and youth development experts from Kentucky, West Virginia, Tennessee, and Indiana. This conference provides opportunities to share best practices and innovations in afterschool and summer programming for low-performing students in high poverty areas. Last year more than 750 educators, afterschool and summer learning leaders gathered to inspire, connect and learn from each other. The conference features keynote speakers, more than 70 workshops, special events and many networking opportunities. Conference strands will include STEM (Science, Technology, Engineering and Mathematics), youth development, global learning, literacy, social/emotional learning, health and fitness, summer learning, program design, sustainability, and arts and early learning. Support of the multi-state website for registration and participant information is also included for the conference.

- **Directors meeting** one day (fall)
  State staff provide program directors state and federal guidance updates, RFA release information, training timeline, program resources and networking opportunities. Directors are required to attend.

- **Webinars** six (fall)
  Sessions are provided based on tabulated needs identified through grantee training surveys. Sessions most recently included STEM and parent engagement.

- **Compliance Monitoring** (Year-round)
  Monitoring visits cover state and federal requirements of the 21st CCLC program and verify compliance with items included within the approved application such as assurances and expenditures. Monitoring not only serves to ensure compliance, but also provides a means to identify areas that require additional support and technical assistance. 21st CCLC programs are monitored on-site and include interviews with program staff, school leadership, teachers, parents, students, community partners and the co-applicant.

*Progress Self-Assessment -*
Each fiscal year in accordance with state and federal guidance and legislation, the KDE will complete a risk assessment for all 21st CCLC grantees to be completed each year of the award. This will be an annual assessment for all grantees and will be conducted the last week of each May. Per federal guidance, the KDE will thoroughly review the Progress Self-Assessment and schedule an on-site visit that will also include a program observation.

Should the grantee be found lacking in any area, as determined by the Progress Self-Assessment, the KDE may institute numerous strategies to assist the grantee with compliance, which may include, but not be limited to the following:

- additional technical assistance;
- additional monitoring, conducted by the KDE;
- establishment of a probationary period outlined and detailed by the KDE; and
- reduction of funding.

**Technical Assistance (TA) Visit** –
A technical assistance visit takes place at the grantee’s six-month mark. New grantees receive an on-site visit that includes interviews, documentation review, and program observations. The technical assistance visit covers attendance, fiscal, partnerships/collaborations, parents/families, student ratio, staff development, program design, program hours, data entry, snacks, activities and summer programming. Progress towards goals and objectives, highlights, biggest challenges, and any training needs are assessed.

**Continuation Progress Report** -
The Continuation Progress Report is a mandatory form that must be completed during the third year of the grant cycle at least six months prior to accessing fourth year funds. Failure to complete the report within the time frame listed will result in a delay and possible forfeiture of fourth year funding. The report shall include the following to receive funding in the fourth and fifth years of the grant cycle:

- the ability to demonstrate substantial progress has been made toward meeting the stated goals and objectives, in measurable terms, as stated in the original grant application within the first three years;
- maintenance of the scope of the original level of programs and services to the same number of students at reduced grant allocation in the fourth year;
- maintenance of the scope of the original level of programs and service to the same number of students at reduced grant allocation in the fifth year or beyond. (The minimum grant award during any one year will be $95,000);
- documentation of completed state reports as required; and,
- a sustainability plan.

**Financial Reimbursement Requests for Services Rendered (quarterly)** -
Submitted quarterly, the requests include financial spending on salary, travel, supplies, equipment, contractual, professional development, field trip, and transportation. Reports are reviewed for correct spending codes, allowable expenditures, and required approvals.

**Data Reports (quarterly)** -
Program attendance and parent/family involvement activities are monitored on a quarterly basis. The form provides grantees a method for continuously tracking program attendance in order to meet proposed number of regular attendees to be served in the grant application and parent involvement. The state reviews DRRs (Data Review Reports) through comparing attendance that is reported in Cayen.

**KDE Travel –**

**Supplies -**

**Request for Application (RFA) Technical Assistance (fall) -**
To assist districts and other partners in preparing a quality application, the KDE provides technical assistance sessions for the purpose of application preparation. Sessions address essential grant requirements, budget preparation, review of scoring criteria and state and federal guidance. One-day sessions are provided around the state on four separate dates.

**Indirect Cost (10.9%) – Agency Indirect -**

**Technical Assistance 3%**

**Annual Comprehensive Statewide Evaluation -**
The Center for Evaluation and Education Policy (CEEP) at Indiana University provides external evaluation services and technical assistance to support the implementation and development of the Kentucky 21st Century Community Learning Center Federal Initiative. The evaluation includes formative and summative evaluation techniques, frequent data monitoring and quality monitoring activities, website maintenance, and data collection to complete federal required APR (Annual Performance Report) data. The comprehensive process includes:

- **Assess the extent to which 21st CCLC programs in Kentucky are implementing high quality, academically focused program practices.**
  - Measure quality and identify ways to increase program effectiveness.
  - Provide a written summary of the strengths and weaknesses of each site visit as related to selected characteristics of high-quality after school programs.
  - Present webinars that provide site visit results and the results of other data sources in order to assist sites in learning how to identify areas of strength and weaknesses to improve and strengthen program quality.

- **Ensure the complete, accurate, and timely submission of required program data (based on state and federal guidelines) and to communicate with out-of-school time grantees through the KY 21st CCLC website.**
  - Provide data collection and reporting services for all Kentucky 21st CCLC programs.
  - Facilitate two in-person and two web-based trainings on meeting local, state and federal data requirements.
  - Create a written timeline that outlines data deadlines and a list of required data sources to remain compliant under state and federal guidelines.
  - Provide staff to attend the 21st CCLC Summer Institute to obtain information from ED regarding updates to federal data reporting.
requirements, performance metrics, deadlines, and policies and procedures related to grant implementation.

- Conduct queries of Kentucky statewide data in summer, fall, and spring to ensure accurate entry of program data. This includes communicating with grantees when data are entered incompletely or inaccurately.
- Facilitate completion of final data verification focused on federal APR and state outcome data and program-level characteristics.
- Maintain and update the KY 21st CCLC website to provide programs up-to-date information from the KDE and CEEP.

- Analyze program data to create annual, individual data profiles and an annual statewide 21st CCLC aggregate report.
  - Prepare site-level profiles for programs including data on student attendance, demographic characteristics, academic and behavioral outcomes, and activity descriptions.
  - Share statewide data at the annual director’s meeting.
  - Provide a written summary report of statewide data.

- Quality Site Visits
  Protocol for the site visits is based on review of after school research and what the research tells us are indicators of high-quality after school programs. Site visits include a site coordinator interview lasting about an hour and includes questions about activities, links to the school day, and partnerships with parents, the school, and the community. Visits also include a brief interview with a school day teacher to get his or her perspective on the program’s communication efforts and its impact on students. Finally, visits include an observational component in which we observe homework help and all other activities that are offered that day. We note things like the number of staff and students present, the quality of the interactions between students and staff, and the nature of the activities.

- Federal Annual Progress Report (APR)
  For students who attend 30 days or more, applicants are required to report on the following elements for the Annual Progress Report:
  - Grades
  - Annual Assessment Scores
  - Program operations
  - Attendance (including summer programs)
  - Activities and sessions
  - Events (parent/family event attendance)
  - Staff/personnel
  - Feeder school
  - Community partners
  - Funding sources
  - Student surveys
  - Participant demographics
  - Teacher Surveys
  - Grades (fall and spring math and reading/ELA)
  - Annual Assessment scores (K-PREP for grades 3-8)
2. Awarding Subgrants

*(ESEA section 4203(a)(4))*: Describe the procedures and criteria the SEA will use for reviewing applications and awarding 21st Century Community Learning Centers funds to eligible entities on a competitive basis, which shall include procedures and criteria that take into consideration the likelihood that a proposed community learning center will help participating students meet the challenging State academic standards and any local academic standards.

Kentucky complies with the legislative requirements to award subgrants to eligible entities on a competitive basis as authorized under Title IV, Part B. The RFA includes specific criteria requiring applicants must complete a thorough needs assessment that includes input from a variety of stakeholders within the school, community and families served by the proposed application. The assessment should describe the academic needs of the students by subgroup using current and specific data (including non-cognitive and social/emotional), needs of the parents and families, and gaps in community services.

**Purpose**

The 21st Century Community Learning Centers (CCLC) program provides students with homework assistance and a broad array of activities that can complement the regular academic programs while also promoting youth development and offer literacy and other educational services to the families of participating children. Programs must ensure the academic services provided are aligned with the school’s curriculum in the core subject areas. Based on this guidance, applicants must address, but are not limited to, the following goals:

- Increase academic achievement of regularly participating students;
- Improve non-cognitive indicators of success in regularly participating students;
- Increase the number of students attending the program 30 days or more during the academic year;
- Increase access to high-quality programming;
- Increase access to college/career preparation activities for middle and high school students; and
- Increase educational opportunities for parents and families that support academic achievement.

Programs serving students in grades K-3 must provide reading intervention, with a research-based program, targeting students performing significantly below grade level. Applicants must address providing a safe and accessible facility, transportation needs of the students to be served, dissemination of information to the community, recruiting and retaining students, summer programming, how funds will supplement not supplant, how applicant will consult with private schools about grant opportunities, and ensure fidelity of the program.
The program design portion of the RFA requires that applicants create a schedule and describe offerings that include a minimum amount of program time toward providing direct academic-based enrichments, tutoring, and homework help. All participants must have access to a minimum of 12 hours of programming on four or more school days per week in order to maximize the impact of the program on student achievement and behavior. In addition to providing academic support in the core content areas, Kentucky’s programs also provide high quality enrichments including STEM, art, music, drama, service learning, character education, global learning, youth development, health and nutrition, fitness, truancy prevention, mentoring, drug and violence prevention, and career exploration. Kentucky’s sub-recipients serve all students, including English learners and children with disabilities.

**Eligible Entities**

- Local education agencies (LEA)
- Community-based organizations (CBO);
- Faith-based organizations (FBO);
- Institutions of higher education;
- City or county government agencies; and
- For-profit corporations, and other public or private entities.

A **community-based organization** is defined as a public or private for-profit or non-profit organization 501 (c) (3) that is representative of the community and that has demonstrated experience or promise of success in providing educational and related activities that will complement and enhance academic performance and positive youth development. Community/faith-based organizations and other local government and private institutions that do apply for funds are expected to meet all statutory and regulatory requirements of the program and are required to partner with a school. All targeted schools served by grants must be eligible for Title I school-wide programs or have at least 40% free and/or reduced lunch. Private/non-public school students are eligible to participate in 21st CCLC activities carried out in public schools. Students, teachers, and other educational personnel are eligible to participate in 21st CCLC programs on an equitable basis. A 21st CCLC grantee – whether a public school or other public or private organization – must provide equitable services to private school students and their families if the students are part of the area to be served by the award.

Applicants must consult with private school officials during the design and development of the 21st CCLC program on issues such as how the children’s needs will be identified and what services will be offered. Proof of this consultation must be described in the application under the partnerships.

Whereas the program may be open to participants who meet criteria for participation (including those from private, and home schools), priority is given to participants from the school(s) identified for service within the application. Title I funds, in concert with 21st CCLC program funds, can provide extended/expanded learning programs in schools to integrate enrichment and recreational opportunities with academic services.

An applicant is eligible to apply if it has no prior afterschool experience. An Organizational Capacity Statement Form provided in the RFA must be completed by all non-governmental agencies. Organizations do not have to demonstrate prior experience.
in providing afterschool programs to be eligible to apply for an award. However, an organization that does not have such experience must demonstrate promise of success in providing educational and related activities that will complement and enhance the academic performance, achievement, and positive youth development of the students. An applicant is eligible to apply if already implementing before and/or afterschool activities. Grant funds may be used to expand and/or enhance current activities in the before and/or afterschool programs, whether supported by public or private funds. The applicant must demonstrate both the addition of services and increase the number of students to be served. Simply increasing the number of students to be served does not fulfill this requirement. For example, a grantee may use funds to align activities to help students meet local and state academic standards if those services are not part of the current afterschool program. Again, awardees must bear in mind that 21st CCLC funds can be used only to supplement and not supplant any federal or non-federal funds used to support current programs.

**Funding Priorities**

**Absolute and Competitive** are the two types of priorities for the awards. The absolute priority is an eligibility requirement to be met by all applicants, while applications that address competitive priorities will receive preference over applications that do not. Competitive Priority for funding will be reflected in additional points awarded for the funding priorities. Proposals will target students and family members of those students who attend schools that are eligible for Title I school-wide programs or that serve a high percentage of students from low-income families (at least 40% of the students qualified to receive free or reduced-priced meals). For proposals involving one or two school buildings, the school buildings to be served must have a Title I school-wide program or at least 40% of the students from each participating building must be qualified to receive free and/or reduced-priced meals. Additional competitive points may include the following:

- **Targeted Support and Improvement**
  
  In the fall of 2018, schools were not identified for Targeted Support and Improvement; however, a school was identified for Additional Targeted Support and Improvement (ATSI) if it had one or more subgroups performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) based on school performance.

  Beginning in the fall of 2022 and annually thereafter, a school will be identified for Targeted Support and Improvement (TSI) if it has one or more of the same subgroups performing as poorly as all students in any of the lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) based on school performance, for three consecutive years.

  Beginning in the fall of 2022 and every three years thereafter, a school will be identified for ATSI if it was identified for TSI in the immediately preceding year and has one or more subgroups performing as poorly as all students in any lowest performing 5% of Title I schools or non-Title I schools (by level – elementary, middle or high school) based on school performance.

- **Comprehensive Support and Improvement**
Schools were identified for Comprehensive Support and Improvement (CSI) annually in 2018 and 2019. Kentucky will not identify new CSI schools in 2020; however, beginning in 2022 and every three years thereafter, a school will be identified for CSI if it meets any one of the following categories:

- CSI I: Bottom 5% of Title I or non-Title I schools (by level – elementary, middle or high school, beginning 2018-2019); OR
- CSI II: Less than 80% graduation rate for Title I or non-Title I high schools (beginning 2018-2019); OR
- CSI III: Title I or non-Title I schools previously identified for Additional Targeted Support and Improvement for at least 3 years and have not exited (beginning 2022-2023).

**Continuation Grants Competitive Priority** is defined as additional points earned for items not explicitly required. The KDE will give priority to 21st CCLC Continuation Grant applicants who have shown significant improvement in student achievement in math and reading scores as demonstrated by their most recent Annual Performance Report (APR) Center Profile data indicating that 50% or more of regular center participants improved and/or earned the highest grade possible in reading combined and 50% or more of regular center participants improved or earned the highest grade possible in math combined.

**Principles of Effectiveness**

Applicants must indicate how each program activity satisfies the Principles of Effectiveness described in the law (See Section 4205(b) of ESSA). According to statute, programs must be based upon:

- An assessment of objective data regarding the need for before and after school programs (including summer school programs) and activities in schools and communities;
- An established set of performance measures aimed at ensuring quality academic enrichment opportunities; and,
- Where appropriate, scientifically-based research that provides evidence that the program will help students meet the district academic achievement standards. It is expected that community learning centers will employ strategies based on scientific research when providing services where such research has been conducted and is available.

**Services for Parents/Families**

Literacy and other educational opportunities must be provided to the parents and families of participating students. Programs must include 1% of grant funds per year dedicated to providing parent skill building activities. These may include classes that support and strengthen reading and writing skills of parents, English language literacy classes, strategies parents can use to assist their children with homework, how to use technology, financial planning, communicating with teachers and Adult Education and/or GED classes.

**Sustainability**

Applicants must include a preliminary plan describing how to sustain the program beyond the award period. Applicants must demonstrate how other sources of funding will be leveraged to supplement grant services and support sustainability (i.e., Title I, Adult
Ed, and Migrant). Plans must address the roles of specified partners beyond the award period. Descriptions should include plans for maintaining the main components such as transportation (if provided), staff retention including volunteer participation, resources and academic enrichment activities.

**Co-Applicant**

Applications must include both a fiscal agent and a co-applicant. The purpose of the co-applicant is to provide support to enhance delivery of program services and activities, not to share jointly in grant funds. The co-applicant is the key partner who provides the greatest amount of in-kind or actual financial support to the program.

**Federal Annual Progress Report (APR)**

Applicants are required to report on the following elements for the Annual Progress Report: grades and annual assessment scores for students who attend 30 days or more; program operation; attendance (including summer); activities and sessions offered; events (advisory council, parent/family, Lights On Afterschool); staff/personnel; feeder school; community partners; funding sources; status of goals/objectives; teacher and student surveys; and participant demographics.

**Release of RFA**

A public announcement is disseminated about the RFA through a variety of outlets, including, but not limited to, posting on the Kentucky Department of Education (KDE) website, Commissioner’s Monday emails, Kentucky Teacher (an online publication) and inclusion in weekly newsletters, communications to all school districts, public notices, and to entities that provide training and services to youth. Other listservs utilized to distribute information include the Kentucky Out-of-School Alliance (members include YMCA, Boys and Girls Clubs, United Way, faith-based organizations, private child care providers, Juvenile Justice, Cabinet for Health and Family Services, universities and community colleges, UK Extension Office, Public Health and Kentucky School-Age Child Care Coalition, Family Resource/Youth Services Centers and Community Education Directors), informing individuals interested in the out-of-school field and 21st Century programs. This ensures equitable access for entities that traditionally provide educational and community services to increase student achievement.

**RFA Technical Assistance**

To assist districts and other partners in preparing a quality application, The KDE provides technical assistance sessions for the purpose of application preparation. Sessions address essential grant requirements, budget preparation, review of scoring criteria and state and federal guidance.

**Receipt of Applications**

Receipt of all grant applications is led by the KDE Division of Budget and Financial Management (DBFM), Procurement Branch that process the applications and prepares them for review. Applications are reviewed by the Procurement Branch to determine technical responsiveness. Each application is reviewed and scored independently by three experienced and knowledgeable professionals. DBFM seeks reviewers from: (1) an open Call for Reviewers on the KDE website and (2) a list of experienced reviewers maintained by the DBFM. Reviewers are chosen for their experience and knowledge in the programs as well as qualifications and availability. The date and time for reviewer
training, facilitated by the program office in coordination with the DBFM, is listed on the Call for Reviewers. Most reviewers are active or retired Kentucky teachers, administrators, and higher education staff. During training, reviewers are provided with a copy of the RFA, including a scoring rubric, general guidance for evaluating applications, and specific instructions for the current RFA.

**Awards**
The highest scoring applications receive funding unless there are other factors (e.g., geographical/demographic balance, targeted priority areas, etc.) that must be considered. The program office also may include a minimum score in the RFA that must be met in order for an application to be considered for funding. Applications are awarded with those receiving the highest scores first until availability of funding is gone. Awards range from $100,000 - $150,000 per year for three years. The number of awards and the award size will depend on the type of application selected and availability of funds to award. The grant awards are released publicly on the Kentucky Department of Education’s website and recipients are notified directly. Non-awarded applications may request a copy of the reviewer score sheets.

**Section H. Title V, Part B, Subpart 2: Rural and Low-Income School Program**

1. **Outcomes and Objectives**

   *(ESEA section 5223(b)(1))*: Provide information on program objectives and outcomes for activities under Title V, Part B, Subpart 2, including how the SEA will use funds to help all students meet the challenging State academic standards.

The Rural and Low-Income School (RLIS) program is designed to help rural districts use federal resources more effectively to improve instruction and academic achievement of students. These funds are intended to support activities allowable under Title I, II, and III programs to assist rural districts in meeting the state’s interim and long term-goals identified in Kentucky’s accountability system. The Kentucky Department of Education will award formula grants to qualifying districts that meet federal eligibility requirements. The specific measurable program objectives and outcomes for each participating district related to the RLIS program will be driven by each district’s comprehensive needs assessment in its plan for educating its students, as well as requirements (as applicable) of Kentucky’s accountability system. Districts receiving RLIS funds will identify needs from their comprehensive needs assessment based on state and local data to determine priorities and where resources are needed. Districts will then choose appropriate strategies based on their needs assessment and leverage resources appropriately, including RLIS funds, to improve student outcomes, specifically with regard to mastery of state standards. The KDE will work with districts receiving RLIS funds to administer this funding to align with and enhance other federal, state, and local programs. The KDE will conduct routine monitoring of recipient districts and provide ongoing technical assistance to ensure districts maximize the effectiveness of the grants to increase student outcomes. Specifically, the KDE will track proficiency rates of students who are enrolled in districts receiving RLIS funds. Based on the data collected, technical assistance will be provided as needed.
The KDE will use funds to support districts in ensuring students engage in enriched and equitable opportunities and that district and school staff are equipped to support those needs. The KDE’s limited administrative funds are used to support transportation costs for providing professional development and monitoring for technical assistance. The KDE also is an active participant and sponsor of the National Rural Education Forum. This forum provides additional resources and networking to enhance opportunities available under the RLIS program.

The KDE recently joined the State Support Network and several other states in a Rural Education Community of Practice. The State Support Network is a network in partnership with the United States Department of Education’s (ED’s) Office of State Support to intensively support state school improvement efforts and meet the state academic standards, as well as assisting in a well-rounded education to improve the rural community. The Community of Practice will focus on how to effectively differentiate support for rural districts and communities particularly related to the implementation of state ESSA plans. This Community of Practice (CoP) will strengthen the State Education Agency (SEA) and the district capacity to design and implement coherent local Every Student Succeeds Act (ESA) planning and action in rural districts. Beginning in early October, the CoP will host webinars and launch a virtual community space to share resources and discussions around rural education. The state Community of Practice team will consist of four to six SEA and district representatives; the KDE will involve districts throughout the year in these activities.

2. Technical Assistance

*(ESEA section 5223(b)(3)): Describe how the SEA will provide technical assistance to eligible LEAs to help such agencies implement the activities described in ESEA section 5222.*

The Kentucky Department of Education will build the capacity of LEAs by providing technical assistance through phone, email and face-to-face assistance to grantees. Face-to-face assistance will occur at trainings and meetings, such as summer Title I training, cooperative trainings and regional trainings throughout the state. Technical assistance also will be offered as needed at one-on-one meetings. The KDE will work with LEAs through the consolidated application to administer this funding to align with and enhance other federal, state, and local programs. The RLIS section of the consolidated application will be reviewed, approved, and monitored by the KDE. On-site monitoring of the RLIS program also will occur during the annual state consolidated monitoring process. Additional on-site monitoring will occur on an as-needed basis.

Section I. Education for Homeless Children and Youth program, McKinney- Vento Homeless Assistance Act, Title VII, Subtitle B

1. Student Identification

*(722(g)(1)(B) of the McKinney-Vento Act): Describe the procedures the SEA will use to identify homeless children and youth in the State and to assess their needs.*

Every LEA in Kentucky is required to appoint a local liaison to help assist in the identification of homeless children and youth. The liaisons gather information from enrollment applications and collaborate with state, local, and external service providers to help them properly identify homeless children and youth. The LEA also uses a
McKinney-Vento student intake form to properly identify those who are experiencing homelessness. The LEA enters McKinney-Vento data into the student information system, Infinite Campus, as directed in the homeless data standard. The data standard describes the steps for entering homeless data into the system so that children who are identified as homeless are marked accordingly, including nighttime residence, whether or not they are an unaccompanied youth, etc. Also, specific directions are included for district liaisons to work with their food service coordinators to ensure that every homeless student is also marked for free/reduced lunch. Homeless children and youth in Kentucky are provided the opportunity to meet the same challenging state academic achievement standards that all students are expected to meet. Kentucky’s comprehensive district and school improvement planning process is a means to determine the needs of all students and provides a roadmap for improving student achievement and ensures that each student progresses toward meeting student capacities and school goals. The focus is on utilizing resources to meet the needs of all students, not on specific programs.

1. Dispute Resolution

(722(g)(1)(C) of the McKinney-Vento Act): Describe procedures for the prompt resolution of disputes regarding the educational placement of homeless children and youth.

The McKinney-Vento Homeless Assistance Act acknowledges that disputes may arise between the school district and homeless students and their parents/guardians. The KDE has established a state dispute resolution process.

The local district homeless child education liaison shall ensure immediate enrollment and the provision of services to the homeless child or unaccompanied youth throughout the dispute resolution process.

The Office of the State Coordinator will monitor and provide support for the dispute resolution process. First, the KDE has developed a dispute resolution form for LEA district liaisons and the state homeless coordinator to document the area of disagreement, evidence, the determinations made, and dates of resolution in each step of the process. This form is made available to the LEAs. Use of this form will help ensure that the process is followed by providing a consistent statewide form. It also requires the documentation of evidence, determinations, and dates, which will help the state coordinator make the best, most informed decisions possible if the dispute cannot be resolved at the LEA level. LEA local liaisons will receive guidance about implementing the dispute resolution process and form, including the timeline for completing all components of the dispute resolution process, through training and recorded webinars.

Following are the steps in the dispute resolution process at the LEA level. The timeline within which all components of the dispute must occur at the LEA level is 30 school days.

First, every effort must be made to resolve disputes at the local level.

- All concerns regarding the education of a homeless child should be referred to the local district liaison. If a complaint arises about services or placement of a homeless student, the local district liaison shall inform the representative of the homeless student or the unaccompanied youth of their rights under this process and the McKinney-Vento Act. The child shall remain enrolled throughout.
- The local district liaison shall make a determination and will document this and all subsequent communications, determinations, and evidence in the dispute
resolution form provided by the KDE. A copy of the determination will be provided to the complainant. If the complaint is not resolved, the complainant will be advised to present a written request for mediation. The local district liaison shall assist the representative in completing this request, including an indication of the specific point at issue.

- The mediation shall be scheduled on a day and time convenient to the representative of the homeless student. Documentation regarding those proceedings must be provided with any appeal to the state homeless coordinator. If an agreement cannot be reached among all involved parties, either party may request review by the state homeless coordinator.
- When a written request for assistance is received, the following steps in the dispute resolution process will be followed by the Office of the State Coordinator. This process will be completed within 20 school days after receipt of the written request.
- Upon written request, the state coordinator shall collect and review the evidence and make a determination.
- Parties may request that the state coordinator’s decision be reviewed by a three-member panel convened by the state coordinator within the Department of Education. Any person involved in the dispute resolution process at the state level will receive training on the McKinney-Vento Act prior to participating in the process. The three-member panel shall review the state coordinator’s decision and either adopt the decision or reject it. If rejected, the panel will provide an alternative finding with appropriate reasoning. The panel’s decision is a final decision and not appealable. The placement and services for the homeless student shall be continued pending the resolution of the dispute by the Department of Education.

In addition to working with LEAs, the Office of the State Coordinator will include the dispute resolution process in the SEA monitoring process. For both on-site and desk monitoring, LEAs will be asked to submit documentation of their implementation of the dispute resolution process. This evidence will include documentation of written notice to parents, guardians, or unaccompanied youth.

The state homeless coordinator will regularly review all McKinney-Vento disputes resolved at the state level, including the timelines documented on the dispute resolution form. This review will help ensure the process is being followed and disputes are resolved in a timely manner. It will also help identify opportunities to improve the process.

3. Support for School Personnel

(722(g)(1)(D) of the McKinney-Vento Act): Describe programs for school personnel (including the LEA liaisons for homeless children and youth, principals and other school leaders, attendance officers, teachers, enrollment personnel, and specialized instructional support personnel) to heighten the awareness of such school personnel of the specific needs of homeless children and youth, including runaway and homeless children and youth.

The state coordinator organizes opportunities for annual professional development in an effort to provide local liaisons with strategies to heighten the awareness of the specific needs of homeless children and youth, including runaway and homeless children and
youth. The state coordinator is a member of interagency workgroups geared toward, generally, improving outcomes for at-risk students. Ongoing communications to local liaisons focus on the need to effectively raise awareness and coordinate services. Kentucky used an online learning management system to provide professional learning opportunities this will allow local liaisons to have access to training materials to support the training of their districts’ principals, school leaders, enrollment personnel and specialized instructional support personnel. Additionally, the state’s homeless coordinator emphasizes runaway and homeless youth at annual professional development trainings, disseminates information via webcast, and supports school personnel on how to handle crises associated with homeless children and youth, including runaways and the support these students would require to be successful. The Kentucky Department of Education provides year-round training for school personnel:

- The Kentucky Student Information System (KSIS) provides three trainings throughout the school year. Beginning, mid-year, and end-of-year trainings provide opportunities to communicate policy updates, reminders, and instructions to fulfill what may be needed during those times of the year. Infinite Campus, the provider of the KSIS, and the Kentucky Department of Education also provide in-depth training on the use of the KSIS.
- Kentucky-specific training also is available within the Infinite Campus training portal at Campus Community and Infinite Campus University.

The KDE approves funding for professional development for LEAs and school employees to heighten awareness of homeless children and youth, including runaway homeless children and youth such as the required annual training by the SEA for liaisons to the homeless, the KSIS trainings throughout the year, and the National Association for the Education of Homeless Children and Youth Conference. Additionally, much of the work to support homeless children and youth, including runaway homeless children and youth, is centered around collaborative efforts with other agencies, including the following examples:

- Community partners and interagency councils are invited to improve the awareness of the McKinney-Vento definition of homelessness and to increase collaboration to effectively address challenges of homelessness in Kentucky.
- Another focus in the training pertains to building relationships with reliable communication systems and relief agencies, such as the Red Cross and FEMA, prior to disasters occurring.
- Kentucky collaborates with the Homeless Education and Literacy Program (H.E.L.P.), a program that provides free back packs and supplies to the school districts with a higher need.
- Kentucky participates in the Kentucky Early Intervention Services (KEIS) Interagency Coordination Council (ICC), which addresses matters concerning the Kentucky Early Intervention System. The council shall be attached to the Early Childhood Advisory Council and it shall advise and assist the cabinet in areas including by not limited to assisting children and youth of all early care and education programs that receive public funding including child care centers, Head Start programs and preschool programs that are eligible for McKinney-Vento services.
Kentucky collaborates with the Homeless & Housing Coalition of Kentucky in an effort to better assist those who are experiencing chronic homelessness. The State Coordinator for homeless education has provided a point of contact (POC) for each district in an effort to disseminate information on the services that can be provided to families and children.

4. Access to Services

(722(g)(1)(F) of the McKinney-Vento Act): Describe procedures that ensure that:

i. Homeless children have access to public preschool programs, administered by the SEA or LEA, as provided to other children in the State;

   (i) The preschool coordinator, Family Resource/Youth Services Center and liaison to the homeless collaborate quarterly to discuss strategies, the needs of the children and the number of children identified. KRS 157.3175 establishes Kentucky’s preschool education program to serve four-year-old children at-risk of educational failure (defined as eligible for free lunch) and three- and four-year-old children with disabilities, regardless of income. Head Start promotes the school readiness of young children from low-income families through agencies in their local community. Also, Kentucky’s homeless children are eligible to participate in local before-and after-school care programs such as School Age Child Care (SACC) and Head Start.

   Kentucky Department of Education regulation 707 KAR 1:300, Section 1 states that Child Find requires that an LEA shall have in effect policies and procedures that plan and implement a child find system to locate, identify, and evaluate each child. Preschool coordinators post flyers, conduct home visits, collaborate with health and family services, and partner with the division of community based services that generates a local list of children who are on the First Step list and are transitioning to Head Start. Additionally, the preschool program review process (P2R) is a system used to monitor LEAs’ outreach services. 707 KAR 1:300 can be found online.

   Additionally, Family Resource/Youth Services Centers (FRYSCs) may provide before- and after-school care for homeless children and youth. These centers are designed to meet the needs of economically disadvantaged children and their families. The FRYSCs make it possible for homeless children and their families to receive referrals to health counseling, after-school care, full-time preschool childcare for children two to three years of age, and parent and child education.

   Parent, student and staff needs assessments are shared as a tool to help ensure that the programs are meeting the needs of homeless children and youth.

   Homeless youth and youth separated from public schools are identified and accorded equal access to appropriate secondary education and support services, including by identifying and removing barriers that prevent youth described in this clause from receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with State, local, and school policies; and

   (ii) Kentucky uses diverse strategies for identifying children and youth separated from public schools and is asking local liaisons to develop a process chart. Once the SEA
has received multiple examples from the LEAs, the Kentucky Department of Education (KDE) will use the information to develop a process chart for the state.

Kentucky requires LEAs to adopt policies and practices that will eliminate any barriers that homeless children and youth may face. The state coordinator works with other educational programs and with service providers to improve comprehensive services for homeless youth. The state coordinator works with other KDE staff, including the Office of Career and Technical Education, to ensure that students experiencing homelessness do not face barriers to accessing career and technical education [42 U.S.C. §11432(g)(1)(F)(iii)] and ensure that homeless students are included in Perkins planning at the local level. Kentucky developed its state Perkins CTE plan in consultation with the homeless education state coordinator (20 U.S.C. § 2342). Programs applying for Perkins CTE funding must consult with representatives from local agencies that serve youth experiencing homelessness when developing the local application and the required local needs assessment (20 U.S.C. § 2354). Under the Perkins Act (effective July 1, 2019) youth experiencing homelessness according to the McKinney-Vento definition are included in the definition of special populations (20 U.S.C. § 2302). The “special population” designation is given to groups of people who may face unique barriers to accessing and succeeding in CTE programs; as a result, special populations are entitled to receive a variety of supplemental supports to ensure that they have equal access to and opportunity to succeed in CTE programs.

Kentucky educators can also utilize data from the Kentucky Center for Statistics which collects and integrates education and workforce data so that policymakers, practitioners and the public can make the best-informed decisions possible. The youth and young adult population dashboard shows populations, including homeless, for those aged 14-24 as of 2017 who are in the Kentucky Longitudinal Data System. The dashboard can be filtered by regions and outcomes for the population such as college/career ready, CTE certification, etc.

LEAs are encouraged to run a homeless benchmark data report in the statewide student information system (Infinite Campus) in an effort to identify percentages of absentees, withdrawals, the number of days enrolled, dropouts, and content area course work credits in conjunction with follow-up of the needed support services.

i. Homeless children and youth who meet the relevant eligibility criteria do not face barriers to accessing academic and extracurricular activities, including magnet school, summer school, career and technical education, advanced placement, online learning, and charter school programs, if such programs are available at the State and local levels.

(iii) Once a student is enrolled in school, she or he has immediate access to participate fully in all school activities and services, including academic and extracurricular activities, magnet schools, summer schools, career and technical education, advanced placement, online learning, and charter school programs. The LEA is required to provide homeless children and youth with transportation to and from extracurricular activities. Kentucky’s Consolidated Monitoring process includes a review of district policies to ensure that homeless children and youth and their families receive the education services for which they are eligible.
Kentucky will soon be amending the appropriate administrative regulation to reflect changes that will address and reemphasize the need for LEA policies to reflect breaking down barriers. Should a charter school open in Kentucky, the SEA will be advising other staff as they develop regulations to ensure that there are no barriers for homeless students in that setting. LEAs will be advised that they should anticipate and accommodate the needs of McKinney-Vento-eligible students to enter charter schools, magnet schools, and other schools, programs, and activities in spite of missing application and enrollment deadlines due to a period of homelessness. In addition, LEAs will be advised to consider giving homeless children and youth priority if there is a waitlist for these schools, programs, and activities.

KRS 160.345 provides each school council the authority to develop the school's curriculum. Therefore, variations exist in the course offerings and timing of coursework between schools and transfer of credits occurs at the local level. KDE updated the homeless education program regulation to include explicit language regarding credit accrual and flexibility requirements.

KDE staff will continue to provide guidance to school and district staff about transfer of records and ensuring students accrue full or partial credits for any coursework satisfactorily completed while attending a prior school. In addressing and eliminating these barriers, homeless liaisons will be encouraged to work closely with a school’s leadership to develop a process for ensuring a student’s credits are transferred appropriately.

5. Strategies to Address Other Problems

*(722(g)(1)(H) of the McKinney-Vento Act)*: Provide strategies to address other problems with respect to the education of homeless children and youth, including problems resulting from enrollment delays that are caused by—

i. requirements of immunization and other required health records;

ii. residency requirements;

iii. lack of birth certificates, school records, or other documentation;

iv. guardianship issues; or

v. uniform or dress code requirements.

In each LEA, the liaison to the homeless assists homeless children and youth in obtaining essential records, including an immunization certificate. If the homeless child or youth wishes to enroll and does not have a record of immunization but has been immunized, the district liaison to the homeless obtains verbal or written confirmation of immunization from the previous school. If the homeless child has not begun an immunization series, the liaison makes the necessary arrangements with the local public health department for the immunization, all while granting immediate enrollment for the child. When the personnel have verified that the student has been immunized, a new health record can be completed. This will ensure availability of health records for the receiving district if the homeless child or youth student transfers.

Regarding residency requirements per the McKinney-Vento federal requirements, the LEA shall ensure that residency for the homeless child or youth’s education is continued.
in the school of origin for the duration of homelessness in any case where the family becomes homeless between academic years or during an academic year, or for the remainder of the academic year even if the child or youth becomes permanently housed during an academic year. The LEA shall enroll the child or youth in any public school in the attendance area in which the child or youth actually resides and is eligible to attend, deferring to what is in the best interest of the homeless student. The LEA will immediately enroll the child or youth while also working with community agencies to obtain original copies of state vital records. LEAs are required to provide assurances that barriers resulting in enrollment delays have been removed.

A homeless student is not to be denied enrollment in the school of residence due to the absence of a parent or a court-appointed guardian or custodian. School districts are not permitted to delay or deny the timely provision of educational placement and appropriate services for a homeless child or youth. Under ESSA, guardianship is not a requirement. LEAs will be allowed to use McKinney-Vento and Title I set aside funding to buy uniforms and any other appropriate attire that keeps homeless children and youth aligned with the local school dress code. Any delay in acquiring these items is not to result in delay of enrollment.

6. Policies to Remove Barriers

(722(g)(1)(I) of the McKinney-Vento Act): Demonstrate that the SEA and LEAs in the State have developed, and shall review and revise, policies to remove barriers to the identification of homeless children and youth, and the enrollment and retention of homeless children and youth in schools in the State, including barriers to enrollment and retention due to outstanding fees or fines, or absences.

The KDE has developed policies to remove barriers to the identification, enrollment and retention of homeless children and youth. These policies are being revised and will be posted to the agency’s website and accessible for the start of the school year. During annual monitoring visit, local liaisons submit their current policies for review. The policies are examined to determine if these are legal, and clear. If needed, policies are revised to be ready for local board approval.

The Kentucky Department of Education is completing a needs assessment to determine the status of SEA services to homeless children and youth and to determine where to focus efforts. The results of this evaluation will be used to create an annual action plan for implementation. The action plan will afford opportunities to address the areas of concern provided by review of the needs assessment. Progress will be monitored quarterly; this will include submission of proposed methods and programs to address the identified needs. The monitoring process will include review from other departments within the SEA, such as transportation, finance, preschool, etc., which may affect services to these students. The KDE also will advise the LEAs in conducting a needs assessment at the local level.

The Kentucky Department of Education recommends that LEAs annually review policies as a best practice. Many school districts are working with the Kentucky School Boards Association on writing and revising policies. School districts are required to have policies and procedures which eliminate attendance and enrollment barriers. The schools implement these policies. The Consolidated Monitoring Process includes a review of district policies to ensure that homeless students and their families receive education services for which they are eligible.
LEAs are obligated to adopt and revise policies to meet the needs of homeless students. A homeless child or youth is granted immediate enrollment allowing access to all services; fines or fees are to be waived if they exist. The LEAs are required to provide transportation for the student to prevent recurring absences.

7. Assistance from Counselors

(722(g)(1)(K)): A description of how youths described in section 725(2) will receive assistance from counselors to advise such youths and prepare and improve the readiness of such youths for college.

The Kentucky Department of Education will coordinate McKinney-Vento training through the annual state conference and professional development through online web training modules. These opportunities will be open to all education professionals that work with homeless students including counselors. The KDE has a new counselor consultant who will assist with disseminating training opportunities for school counselors, ensuring that counselors advise youth and focusing on improving their readiness for college. Counselors will be responsible for scheduling a time to meet with individual students, prepare for the meeting by identifying the key points to be discussed, explain their role as counselor, share what is needed to enroll into college, ask the individual student for postsecondary goals, offer concrete suggestions for actions that can be taken by the counselor and plan to leave the session with a specific commitment to support the student.

Kentucky counselors will continue to remain dedicated to promoting educational success for all students, including those who are experiencing homelessness. Counselors will work with students to provide supportive services that address the academic, personal and career readiness needs of all students. To achieve this, counselors will:

- Build relationships with students experiencing homelessness in their schools in an effort to emphasize the importance of school stability.
- Work with local liaisons for homeless youth and Family Resource/Youth Services Center (FRYSC) directors to coordinate additional community support, which may include opportunities for housing, food, transportation and/or social and emotional counseling.
- Provide transition guidance in the areas of dual credit, advanced course work, career and technical training, and preparation for college and/or career readiness opportunities. Career counselors in Kentucky will work through the KDE Office of Career and Technical Education to provide career advising to middle and high school students, including those described in section 725(2). The counselors will serve as liaisons between business and industry and students. They will provide guidance based on labor market data to ensure opportunities for Kentucky students.
- Coordinate tutoring and mentoring programs for homeless youth.

Kentucky also remains dedicated to improving school stability and responding to the needs of homeless children by providing services to students at young ages. Kentucky’s preschool education programs represent an area in which services are available for all 4-year-old children whose family income is no more than 160% of poverty and all 3- and 4-year-old children with developmental delays and disabilities, regardless of income. Furthermore, Kentucky has developed a
Preschool Partnership Grant to expand its availability of program offerings by incentivizing cooperative public/private partnerships between public school districts and childcare providers to develop full-day, high-quality preschool programs for at-risk children. By beginning these services at an early age, Kentucky confirms its commitment to ensuring all students achieve greater educational outcomes overall. Additionally, throughout P-12, Kentucky counselors will assist students in securing McKinney-Vento funds for college applications, tests and exams, clothing, tutoring, supplemental services, enrichment services, evaluation of strengths and needs of homeless children, professional development, provision of referral services for medical, dental, mental, and other health services, transportation costs (access to academic and extra-curricular), programs to retain homeless children in public schools, mentoring, homework assistance, and costs for obtaining records, education and training to parents about rights and resources.

Appendix B: GEPA 427 Assurance Language

The Kentucky Department of Education (KDE) adheres to Section 427 of the General Education Provisions Act (GEPA). Section 427 of the General Education Provisions Act (GEPA) of 1994 requires that each applicant for funds ensures steps are taken to ensure equitable access to, and participation in, federally-funded projects for program beneficiaries (all students, teachers and others) with special needs. The Kentucky Department of Education does not discriminate on the basis of race, color, national origin, sex, sexual orientation, religion, age, or disability in employment or the provision of services.

The mission of the KDE is to partner with districts, schools, and stakeholders to provide service, support and leadership to ensure success for each and every student. Its core values are equity, achievement, collaboration, and integrity. Thus, the agency will enforce all federal and state laws and regulations requiring equitable access to program beneficiaries and address overcoming barriers to equitable participation. Local school districts will be held accountable for ensuring equal access and providing reasonable and appropriate accommodations to meet the needs of all their constituencies.
Steps to ensure equitable access may include, but are not limited to:

- Every educator, paraeducator, school administrator, related service provider, community member, student with disabilities and family enrolled in any proposed professional learning activity will have an equal opportunity to be engaged in the training that is provided by KDE staff.
- The KDE will ensure that the Consolidated State Plan and its activities address inclusion and equitable access to at-risk students, students with disabilities and other diverse learners.
- The KDE will utilize multiple modalities of communication to ensure that diverse stakeholders maintain awareness about the Consolidated State Plan and other activities. All materials and resources disseminated by the KDE to program beneficiaries will be in an accessible format; all facilities that house activities will be fully accessible; and interpreters will be available as requested.
- To effectively and fairly resolve conflicts, the agency will maintain grievance procedures related to equal access for program beneficiaries, employees and/or youth and their families alleging discrimination. These procedures are accessible for use by youth, employees, and the general public.
- The agency offers and will continue to offer its staff access to training opportunities for the purpose of increasing effectiveness in recognizing and correcting biased attitudes.
- The KDE will identify barriers that may exist in state-level programs that impede equitable access or participation on the basis of disability, gender, race, national origin, color or age. Barriers will be identified by convening a state-level task force representing stakeholders from diverse racial, ethnic, gender and disability status.
- The KDE will ensure that the special needs of students, teachers and other program beneficiaries will be addressed to overcome barriers based on gender, racial, ethnic and disability status.
