Writing Across Disciplines:
An Expansion of Composition in the Classroom

Writing to Learn in Visual Performing Arts Instruction

Fall 2022
What is Writing Across Disciplines?

What does “Writing Across Disciplines” mean?

Defining “Writing Across Disciplines,” requires clarity around the terms “Writing” and “Across Disciplines.” Most simply, writing is communicating. Student writers communicate with themselves, peers, teachers and others. Writing in the classroom can have many purposes and audiences and may be formal or informal. In the academic setting, writing can serve as a tool to promote student learning, to allow students to demonstrate their thinking and understanding of the content and/or concepts taught, and/or to share with others in a real-world setting. These types of writing are called Writing to Learn, Writing to Demonstrate Learning and Writing for Publication. “Across Disciplines” refers to using the types of writing—as defined here—in English/language arts as well as other disciplines, such as social studies, science, math and visual and performing arts.

What is Writing Across Disciplines, and what is its purpose?

Writing Across Disciplines is an expansion of Composition in the Classroom, a resource developed by reading and writing teachers to help Kentucky educators provide students with opportunities to develop into confident, independent and proficient writers. Composition in the Classroom and its expansions support teachers implementing existing High-Quality Instructional Resources (HQIRs) adopted by school districts as well as educators teaching in districts that have not yet adopted a primary HQIR in reading and writing. The tips, suggestions and tasks in Composition in the Classroom and its expansions should not replace adopted HQIR but should serve to supplement instruction towards the full depth and rigor of the Kentucky Academic Standards. For more information regarding high-quality literacy curricula, districts and school leaders may access The Reading and Writing Instructional Resources Consumer Guide, a tool for evaluating and selecting instructional resources for alignment to the Kentucky Academic Standards (KAS) for Reading and Writing.

Composition in the Classroom is organized around three modes of writing in the Kentucky Academic Standards (KAS) for Reading and Writing, including information regarding standards instruction through Writing to Learn, Writing to Demonstrate Learning and Writing for Publication. Writing Across Disciplines, however, contains sample discipline-specific writing tasks, organized by each of the three types of writing mentioned above. This resource is grounded in the KAS for Reading and Writing, which includes the Interdisciplinary Literacy Practices as well as each discipline’s content specific standards. The ten Interdisciplinary Literacy Practices are part of the KAS for Reading and Writing, appearing on every page of the standards document but should not be confused as additional standards. They should guide teachers in providing intentional opportunities for students to engage in deeper learning by practicing the behaviors of a literate citizen. The student practices serve as the overarching goals for literacy instruction for each student across the state. These practices are further clarified by possible teacher and student actions. These actions do not define curriculum, but rather they demonstrate how teachers can provide opportunities for students to experience the literacy practices and how students will apply these practices, so they may become an innate part of life across the disciplines and beyond school. This resource aims to bring more clarity around what these practices look like in action.
While *Composition in the Classroom* primarily serves English/language arts teachers and their students, *Writing Across Disciplines* attends to the needs of all teachers and their students. Because of its widespread classroom use already, the developers chose to begin the expansion with a focus on Writing to Learn, a professional learning space that will hopefully both affirm and stretch educators' practices. Subsequent releases will focus on Writing to Demonstrate Learning and Writing for Publication.

Writing Across Disciplines is created to provide what *Composition in the Classroom*, alone, does not. While *Composition in the Classroom* provides general characteristics of each type of writing (Writing to Learn, Writing to Demonstrate Learning and Writing for Publication) and examples of strategies teachers can implement to engage students in each of the types of writing, this expansion includes a more disciplinary, or specialized, look at writing. *Writing Across Disciplines* intends to show more precisely how to ensure opportunities for students to engage in discipline-specific literacies or learning that uses reading and writing skills specific to each field to teach or demonstrate content knowledge and for publication purposes as well. The sample tasks in *Writing Across Disciplines* represent some of the types of reading and writing experts in each field (e.g., economists, biologists, literary scholars, mathematicians, etc.) might authentically engage in to deepen their own expertise.

**Writing TO LEARN Across Disciplines**

*Writing to Learn*, as previously described, is an instructional strategy used to promote student learning. Teachers utilize this instructional strategy to help deepen students' understanding of the subjects they are studying, to engage students in thinking, to provide opportunities for applying, extending and developing skills, and to help students reflect on their learning. Typically, Writing to Learn is informal writing with the student as the primary audience. Rather than emphasizing formal composition skills, Writing to Learn helps students obtain content knowledge and build capacity to analyze, synthesize, comprehend and express their thinking in writing. Most simply stated, Writing to Learn is any writing students engage in that promotes learning. Therefore, Writing to Learn Across Disciplines refers to using Writing to Learn in English/language arts as well as other disciplines, such as social studies, science, art, math and visual and performing Arts. The first section of this expansion, Writing to Learn Across Disciplines, provides samples of Writing to Learn tasks for each discipline. Explicit reading-writing connections are intentionally present throughout the sample tasks, requiring students to read and think deeply about text, or “anything that communicates a message,” as defined by the *KAS for Reading and Writing*. Throughout the sample tasks, readers engage in passages, videos, graphs, data sets, experiments or other forms of communication while processing and documenting their learning through writing.
How to Read the Writing to Learn Templates

Each content area template begins broadly with a compilation of possible Writing to Learn strategies that experts in the field deem especially applicable to learning that discipline's content. The remainder of each template provides authentic content-specific Writing to Learn samples, organized into elementary and secondary levels. These samples can help educators recognize the presence or absence of Writing to Learn instructional strategies within their curricula, equipping them with the knowledge to identify when the curriculum does not include adequate opportunities for students to engage in Writing to Learn. Because the types of texts involved in reading and writing vary across disciplines, each sample contains discipline-specific approaches to Writing to Learn.

About the Writing to Learn Tasks provides background for the sample Writing to Learn tasks. The sequence of the tasks within the larger context is described.

Content Specific Standards Alignment lists the discipline-specific standards alignment. Because each content area’s standards are organized differently, some templates include more boxes for standards alignment than others. In this example, there are two standards boxes because Social Studies standards include Disciplinary Strand Standards and Inquiry Practices Standards.

Implementing Writing to Learn is a springboard of ideas intended to launch further knowledge building of Writing to Learn strategies. Disciplinary experts offer several Writing to Learn strategies educators can consider implementing in their content-specific classrooms.

Reading and Writing Standards Alignment shows how the tasks align with at least one reading and one composition standard in the Kentucky Academic Standards for Reading and Writing.

Interdisciplinary Practices Connections identifies two to three Interdisciplinary Literacy Practices that are intentionally embedded in the tasks to provide opportunities for students to practice the behaviors of literate citizens across disciplines.

Teacher Notes is a section for additional information the teacher may need to know regarding the Writing to Learn tasks. This space coaches teachers as they make sense of and think through implementation of the Writing to Learn tasks and/or the writing experiences within their curricula. “Extra” details they may need to know in order to fully understand how the tasks align with standards, how to access and/or utilize accompanying resources as well as explicit explanations for how the tasks utilize Writing to Learn in the sequence of a larger unit are located here.
Writing to Learn in Visual and Performing Arts Instruction

Implementing Writing to Learn in Visual and Performing Arts Instruction

The KAS for Visual and Performing Arts emphasizes four arts processes universal across all five disciplines: Creating, Performing/Producing/Presenting, Responding and Connecting. Writing to Learn happens most often in the arts process of Creating, as this is a continuous process when students conceive and develop artistic ideas and work, which may require space for thinking and reflecting throughout the artistic process. Writing to Learn when Creating may include:

- Outlining the elements of a specific arts discipline
- Documenting the development of a piece of artistic work
- Detailing how history influenced art or vice versa

The arts process of Performing is limited to the performing arts of music, dance and theatre. Producing is the process of sharing work in the area of media arts and will often utilize “product” as its final form. Presenting is often associated with sharing in more formal settings such as exhibitions in the visual arts. Writing to Learn can be an important aid to students as they plan their performances, products or presentations. Using Writing to Learn as a vehicle to drive these processes may mean students:

- Maintaining planning journals
- Recording notes about details they want to include in performances, products or presentations

Writing to Learn is an effective strategy for engaging Visual and Performing Arts students in Connecting, or relating artistic ideas and work with personal meaning and external context. Some Writing to Learn ideas for Connecting include, but are not limited to:

- Comparing and contrasting two or more arts disciplines
- Quick writing about how an artistic piece relates to the student

Responding as an artistic process of Visual and Performing Arts addresses students as audience members. This provides authentic opportunities for students to respond to their own art and the art of others. Writing to Learn may also serve as students reflect or respond on their work as artists as well as audience members. Writing to Learn for this purpose may look like:

- Responding to their own work or the work of others at any point in the artistic process
- Critiquing their own work or the work of others to set goals for improvement of their future work

About the Writing to Learn in Visual and Performing Arts Tasks in This Resource

The Kentucky Academic Standards (KAS) for Visual and Performing Arts include five contrasting arts disciplines connected through Anchor Standards. The elementary and secondary sample Writing to Learn tasks below both work towards mastery of Anchor Standard 2: Organize and develop artistic ideas and work. Students also interact with Performing, Responding and Connecting (relating artistic ideas and work with personal meaning and external context) in these tasks, allowing for connection to multiple areas outside of the discipline presented. Some connections to other content areas are included, but educators may make connections to other disciplines and contexts when possible.

</tr>
</tbody>
</table>
The Task

In preparation for students to respond to a whole-class read aloud, students will be divided into two groups: “Character 1” note-takers and “Character 2” note-takers. The teacher will read the text at least one time without interruptions to ensure comprehension of the overall story prior to a deeper analysis of the characters. On subsequent reads, each group will be told to focus on key details that will help them make sense of their assigned character’s feelings. The teacher will pause at predetermined points to allow time for students to identify Character 1 and Character 2’s feelings as the story develops and to Write to Learn, or record their character’s feelings on a graphic organizer.

More Writing to Learn takes place when the teacher allows time for students to also think about and record what is happening in the story when the character experiences that feeling. After recording the character’s feelings and documenting how they know the character is feeling that way, Character 1 and Character 2 note-takers will be paired up to choreograph, or translate, their character's feelings into movements. They will use their graphic organizer to help them plan the order of the choreography they design and later perform. After choreographing and rehearsing their movements, students will perform the dance for each contrasting character, allowing the audience of classmates to compare the movements of each character. Audience members should be able to recognize the feelings, experiences or adventures of the characters in the text from the choreography presented.

Teacher Notes

For this task, the teacher will select a text with at least two characters who exhibit contrasting or changing feelings at various points in the text. Depending on student familiarity with the text, the teacher may need to review the story sequence (beginning/middle/end) to assist students in remembering the story well enough to choreograph their character’s feelings throughout the entire story. Teachers may choose to focus each character’s movement on either locomotor or non-locomotor to emphasize contrasting movements. Example: character 1 uses only locomotor movement (i.e. jumping or skipping when excited) while character 2 uses only non-locomotor movement (i.e. bouncing or twisting when excited). Students may also require instruction on locomotor and non-locomotor movements and time to practice designing choreography prior to engaging in this task.

Questioning Opportunities:
• How do you know your character was experiencing that feeling?
• What does that movement communicate about your character?
• When you perform that movement, what are you hoping the audience will understand about your character?
• How can your partner’s character help you understand your character and their movement?

Potential Classroom Settings for this Task:
• General elementary music
• Physical education
• Elementary dance or theatre
• As an expansion of reading & writing instruction in a self-contained classroom

### The Task

While reading an excerpt from a drama or dialogue students will make notes about the characters’ changing emotions or moods throughout the text on a T-chart. Students should identify at least 3 moods from the scene and cite page numbers to support their ideas.

Using their notes, students will develop voicing for each character to match their personalities and changing moods throughout the story.

Students will then record the voice over for the scene and share the final product as an opportunity to Respond to the arts.

### Teacher Notes

Rather than providing Performance Standards for grades 9-12 within each arts discipline, the *KAS for Visual and Performing Arts* includes high school proficiency levels—Proficient, Accomplished and Advanced—to illustrate what mastery might look like for students at various stages of learning. These proficiency levels address the reality that secondary VPA courses often have students of varying grade levels within one class. Additionally, within those mixed-grade level courses, students may have a variety of ability levels or experiences with the arts inside or outside of their school arts programs. The expectation for the proficiency level obtained by each student is dependent upon their current mastery of each standard.

For this task, the teacher will choose a text that contains dialogue between multiple characters. Teachers can select a scene from a play, a narrative poem or fiction that includes dialogue. Teachers may also choose to partner with an elementary school requesting recordings of books read aloud and select a children’s book with substantial dialogue. While students are developing their character voice, circulate the room and allow students to brainstorm openly, listening to the voice they are trying for their character. Give feedback on their voicing and encourage students to continue developing their artistic ideas based on their story notes. This sample may be used as an opportunity to partner with a local elementary school to record read aloud materials for their classrooms.

**Questioning Opportunities:**
- What does vocal inflection communicate about your character?
- How does the vocal inflection you’re using point to the excerpt’s theme that you wrote down?
- When you add that emphasis to the text, what are you hoping the audience will understand about your character?
- When you record your lines, how can you use cadence to convey character?

**Potential Classroom Settings for This Task:**
- Media Arts
- Theatre
- Visual and Performing Arts (Survey Course)
- English/language arts
