

2010 Regular Session Senate Bill 132

**"Standardize Process for Evaluating Overall Quality &
Condition of School Buildings Across the State"**

Facilities Inventory & Classification System

Kentucky School Score Report

Submitted by:
Kentucky Department of Education
with Parsons & MGT of America

Official Release Date: November 29, 2011

State Report - School List by District School LEGEND

<p>Budget Costs to Repair & Comply with Ky Standards</p>	<p>Budget Costs to Repair & Comply with Ky Standards is a sum of the assigned costs for the identified condition, educational suitability, and technology readiness issues. The assigned costs are based on national average costs to bring a building, system, component, or program into compliance with state standards, guidelines, or best practices. It is not a detailed estimate.</p>			
<p>Projected Budget to Replace Current GSF (Current Replacement Value)</p>	<p>Projected Budget to Replace Current GSF, also known as the Current Replacement Value, represents the total cost of rebuilding or replacing an existing facility with the same gross square footage. It uses national averages, including RSMMeans, to rebuild the same functional type of facility with an optimal state-of-the-art condition under current codes and construction standards and techniques.</p>	<p>Formula</p>	<p>Range Low High</p>	
<p>Condition Score</p>	<p>Condition Score reflects the physical condition of the building, including all building systems and outside components, based on national criteria. It is calculated by subtracting the FCI from 1. It ranges from 0 (very poor condition) to 100 (new or best condition).</p> <p>Facility Condition Index (FCI) is an industry-standard measurement of facility condition calculated as the ratio of the costs to correct a facility's deficiencies to the facility's Current Replacement Value: (deficiency \$) / (current replacement value \$). It ranges from 100% (very poor) to 0% (new).</p>	<p>$(1 - FCI\%) * 100$</p>	<p>0</p>	<p>100</p>
<p>Suitability Score</p>	<p>Suitability Score is a sum of the values for each educational suitability criteria question addressed. It is then divided by the total possible points (100). Educational suitability criteria questions were based on the function of the facility assessed: elementary, middle, high, K-8, K-12, or vocational. It ranges from 0 (least suitable) to 100 (most suitable).</p>	<p>$(\text{Criteria Based Points}) / \text{Possible Points}$</p>	<p>0</p>	<p>100</p>
<p>Technology Score</p>	<p>Technology Score, also known as Technology Readiness Score, is a sum of the values for each technology readiness criteria question addressed. Technology readiness criteria questions were based on the function of the facility assessed: elementary or secondary. It ranges from 0 (least technology ready) to 100 (most technology ready).</p>	<p>Sum of Points for Technology Criteria</p>	<p>0</p>	<p>100</p>
<p>Kentucky School Score</p>	<p>Kentucky School Score is a combination score that reflects the physical condition, educational suitability, and technology readiness of the building. It is a weighted value. It ranges from 0 (worst) to 100 (best).</p>	<p>(Condition Score * 75%) + (Suitability Score * 20%) + (Technology Score * 5%)</p>	<p>0</p>	<p>100</p>
