Subject: KSIS Notification: Release of Campus.2215 Scheduled for tonight May 11

KSIS Contacts:

Reminder – Infinite Campus release Campus.2215 will go into production tonight (5/11). Details for the release were provided in the previous notification below and in the attached release notes.

KDE report changes

- [QA Student Counts](#) aggregate report has been updated to include a Graduate Counts column. School and District personnel can use this report to verify the number of graduates reported on School Report Card for the first time in 2021-2022.
- [Teacher Turnover Details report](#) has been updated to include data for 2021-2022.
- Teacher Course Check report will be removed because Median Student Growth Percentile is no longer calculated.
- Text4College Project report will be removed. The data will be pulled by KDE due to a change in the Memorandum of Understanding (MOU) with AIR.

Fees issues that have been resolved (SIS-155348, SIS-155382, SIS-154777 and SIS-155358)

- Districts can now select which years they want to include on a printed Fee Billing Statement. As part of this change, a new field called "Years to Print" was added to the top of the Fees tool. In that field, users can select which years they want to include.
- Users were able to refund and mark fees as exempt after online payment(s) had been made. This issue was corrected. Now, users must first use the Payments Reporter to refund online payment(s) before a fee can be marked void or exempt in the Fees tool.
- When paying multiple fees with one payment from Surplus, only one withdrawal record was recorded in the Surplus causing the balance to calculate incorrectly. This issue was corrected.
- The option to print a student's fee statement was optimized for improved performance.
