**Sent:** Wednesday, October 2, 2024 3:01 PM  
**To:** All State KSIS Contacts  
**Subject:** KSIS Notification: Release of Campus.2439 Scheduled for October 9

KSIS Contact,

Please be advised that KDE has confirmed the release of **Campus.2439** to start **Wednesday, October 9, at 7:00 p.m., (Central)/ 8:00 p.m. (Eastern)**. Infinite Campus will be temporarily unavailable during the update process. Please contact Lisa Keeter or DeDe Conner if you have any questions or concerns about the update schedule.

See the [Kentucky release notes](#) for state specific items and [Campus.2439](#) for the full manifest of changes.

Please share this information with individuals in your district or office as appropriate.

*Thank you!*

### Infinite Campus Release Highlights – Campus.2439

#### Kentucky Specific

Item	Description
<b>Cross-Site Enrollment</b>	The Schedule tool in <a href="#">Campus Parent</a> or <a href="#">Campus Student</a> has been updated to improve how Cross-Site courses are displayed when the Home school and Serving school don't have the same Instructional Days. Improvements have also been made to how attendance is displayed for Cross-Site courses for Kentucky.
<b>Custom Forms</b>	The KY Reading Improvement Plan settings have been updated so that the form will be shown on the Campus Parent App. Multiple updates have been made to the Program Services Plan for English Learners form for the 2024-2025 school year, and the previous form has been end-dated.
<b>Dual Credit Roster Indicator</b>	Existing data from the Roster Batch Edit tool was converted to the Section Student Detail tool.
<b>Special Education</b>	The logic for the Enrollment editor of the Individual Education Plan was updated to require the Primary Disability field be pulled in from a locked Evaluation.

#### Core Product

Item	Description
<b>Academic Planning</b>	The Academic Program Detail editor now has a “Include in Automatic Assignment” checkbox. This option automatically assigns students enrolled in a qualifying course as a participant in the aligned Academic Program. An automated process has been added to the Batch Program Assignment Wizard that automatically assigns students enrolled in a qualifying course as participants in the aligned Academic Program(s).
<b>Ad hoc Reporting</b>	The Ad Hoc <a href="#">Pass-Through SQL Query</a> functionality was updated to increase security and improve user experience: <ul style="list-style-type: none"> <li>FROM and WHERE sections now accept and save subqueries.</li> </ul> Semicolons are no longer allowed.
<b>Calendar – School Months</b>	The Days column on the School Months tool was allowing the entry and display of three digits but would not correctly save that entry. This has been corrected. Note that the Days column is only a two-digit field.
<b>Campus Learning – Quizzes</b>	Teachers can allow reattempts on quizzes via the Quiz Settings screen. With reattempts, they can also indicate which score should be used in the Grade Book: the highest score among all attempts or the most recent.

Item	Description
	Teachers can now edit quizzes after students have viewed them, making it possible to correct typos and change answers. Be aware that changing the scoring setup of a quiz may alter student scores if they've already taken the quiz.
<b>Campus Student &amp; Parent</b>	Several minor updates have been made to the <a href="#">Manage Districts</a> tool, including adding a link to additional help information. This tool allows users with Campus Student/Parent accounts in multiple districts to link their accounts together.
<b>Data Extract Utility</b>	Server field character limit expanded from 50 to 100 characters. Users received a "Password authorization failed" error message when attempting to configure the Data Extract Utility with a password longer than 50 characters because the tool truncated the password. This issue was resolved, and the tool (as well as the Data Extract Zip Tool) now accepts passwords up to 100 characters in length.
<b>FRAM</b>	An error occasionally caused the Eligibility start and end dates to display a day off. This has been corrected. Added a message to the first step of the Amend Application process which states: "When amending or copying a Meal or Educational Benefits Application, the Application Type cannot be changed. If the Application Type must be changed, a new application must be processed."
<b>FRAM</b>	Users could not log into Infinite Campus if their system had two or more active SSO configurations. This issue was corrected. Within Classic Campus, users with proper Read tool rights to Student Information were prevented from searching for students. This issue was corrected.
<b>Grade Reporting</b>	The name of the Serving School displays on the Report Card under the Course Name when a student takes a cross-site enrollment course.
<b>Infrastructure</b>	Server field character limit expanded from 50 to 100 characters. Users received a "Password authorization failed" error message when attempting to configure the Data Extract Utility with a password longer than 50 characters because the tool truncated the password. This issue was resolved, and the tool (as well as the Data Extract Zip Tool) now accepts passwords up to 100 characters in length.
<b>Messenger</b>	If a district has never saved Prompt Preferences, upon using Messenger to send email, the word "null" erroneously displayed in the Message Body. This has been corrected.
<b>Messenger</b>	When users accessed Message Builder, they did not see a list of their saved templates. This has been corrected. In response to recent email sender guidelines established by Google and Yahoo, a footer was added at the bottom of email communications, directing users why they are receiving the message, and to contact their school district for more information on the types of communications they receive.
<b>Scheduling – Requests &amp; Rosters</b>	<ul style="list-style-type: none"> <li>• A warning message displays when the entered Start Date or End Date falls between the dates of the terms. This applies to the Course's Section dates and Batch Edit Student Roster. This is an informational message; users can still enter and save those dates when necessary.</li> <li>• An Expand/Collapse button has been added to the Course View.</li> <li>• Miscellaneous issues related to error messages clearing when the user takes another action when clicking X to clear a modal and when hovering over text that was not clickable. Also corrected were text wrapping with a longer team name and other minor text updates for accuracy and consistency.</li> <li>• The Max Seat Count Overload modal no longer displays when the Max Seat Count is not defined for the section and/or the course.</li> <li>• Several accessibility issues related to the behavior (display, acceptance, clearing, etc.) of modals.</li> </ul>

Item	Description
	<ul style="list-style-type: none"> <li>• Confirmation messages throughout the Requests &amp; Rosters tool have been updated to clarify which students now have or no longer have a request for a course, and which students were added to or removed from a course roster. Updates to start/end dates or the repeat/no credit checkboxes are also included. The messages also note the total number of students or courses affected by the update.</li> <li>• Strict student constraints are now validated in the student grid of the Batch Edit Course Roster side panel and the Roster Builder. When a selected student has a strict student constraint with another selected student, those student rows are highlighted in red, along with an alert symbol next to the students' names. Users who have the appropriate tool rights can override the restriction.</li> <li>• Students enrolled in Cross-Site courses are now excluded from the Roster Builder. They are displayed in the Roster list for the Course Section with Cross-Site Enrollment icon next to their name.</li> <li>• An error was returned when using the Batch Edit Course Rosters option that indicated no values were selected. This has been corrected.</li> </ul> <p>When the Max Students value was not populated, adding students through the Roster Builder returned an error. This has been corrected.</p>
<b>Scheduling – Walk-In Scheduler</b>	<ul style="list-style-type: none"> <li>• The Term and Period dropdowns on the Requests: Search section were not always included in the Add Option list of fields. This has been corrected.</li> <li>• Course requests were found to not be loading (error received) when the course did not have other Terms, Schedules, or Periods fields populated, but Sections were placed for the course. This has been corrected.</li> </ul>
<b>Security</b>	<p>SecurityStaff users were encountering an error stating “Security: User does not have rights to selected Calendar” when logging in via SSO. They were also seeing a message of “undefined” where the Classic Campus index should exist. These issues were corrected.</p>
<b>Student Locator</b>	<p>When using the <a href="#">Student Locator Wizard</a> tool to check for a local match during enrollment, users encountered an error if they did not have calendar rights to the person's prior enrollment calendar. The error was generated even when a user had full tool rights to Census and the unfiltered search functionality. This issue has been resolved, and the Student Locator tool redirects to Enrollments as expected.</p>
