Subject: KSIS Notification: Release of Campus.2443 Scheduled for November 13

KSIS Contact,

Please be advised that KDE has confirmed the release of **Campus.2443** to start **Wednesday, November 13, at 7:00 p.m., (Central)/ 8:00 p.m. (Eastern)**. Infinite Campus will be temporarily unavailable during the update process. Please contact Lisa Keeter or DeDe Conner if you have any questions or concerns about the update schedule.

See the Kentucky release notes for state specific items and Campus.2443 for the full manifest of changes.

Please share this information with individuals in your district or office as appropriate.

Thank you!

Infinite Campus Release Highlights – Campus.2443
Kentucky Specific

Item	Description
Section Student Detail	With the release of Campus.2435 (August 2024), the Roster Batch Edit tool was removed. Existing data from the Roster Batch Edit tool was converted to the Section Student Detail tool for Kentucky. Section Student Detail records are converted when the student has values in the Dual Credit, Repeat Course, or No Credit fields.
SSN Diet	People's Social Security Numbers no longer sync to the state of Kentucky.
Testing Roster Extract	Previously, the Testing Roster Extract only considered the student's latest Enrollment record in the calendar to determine the report population. The report was updated to show all students with Enrollment records during the extract dates.
Special Ed Evaluation	An issue was fixed in which the List Current Disability Area(s) field on the RR-Review of Existing Data editor of the Kentucky Evaluation did not populate correctly when Specific Learning Disability, Developmental Delay, or Speech/Language Impairment was the primary disability.

Core Product

Item	Description
Campus Instruction	Previously, an error occurred in the Teaching Center if the Period Schedule included periods with a Sequence of 63 or higher. The Teaching Center has been updated so that if a period has a Sequence of 63 or higher, the Teaching Center loads properly but there is no indicator of whether section attendance has been taken. For these sections, an indication of attendance taken also does not display in the Attendance tool. Previously, some users encountered an error in Reports if they were not already in the context of a Term/Section. This has been corrected.
Combine Person	Previously, if a user with a user account created a Messenger template and their record was later discovered to be a duplicate, their record could not be merged with the original record using the Combine Person tool if the original record did not have a user account. This has been corrected.
Scheduling	An error message displayed when selecting a course on the student's Schedule in the Calendar or Term views and choosing Grades from the side panel. This has been corrected.
Assessment	The Assessment Center's Import Data functionality (step 5) did not display multiple sets of child records when more than one row existed for a student. This issue has been resolved. When a source file has multiple rows of score data for a single student, and each row has a

Item	Description
	different score date, all score data for all tests (parent, child, etc.) is imported and displayed for each test score date.
DIS – Staff Who Were Previously Students	Previously, if a district created a separate person record for a staff member who was previously a student, the new record did not sync properly. While this is not the recommended way to manage Census records, DIS logic has been updated to sync these records to the state, where they can be cleaned up as needed..

Core Product Enhancements

Item	Description
Campus Digital Repository - Removing Support for On-Premise Repository Hosting	In the July 2025 release of Campus, access to the Campus Digital Repository will be disabled for districts who are still using the on-premise object repository. In preparation for this change, a series of notifications will be sent to Campus administrators of districts who need to migrate their CDR accounts off-premise. A Process Inbox message is sent to all users with the SIS Product Security role or who have tool rights to the Digital Repository Preferences tool. The message instructs users to visit the Digital Repository Preferences tool and switch their CDR account to off-premise. An additional message is sent every two weeks until the CDR hosting model for their account is updated.
Campus Instruction	The Teaching Center has been updated so that if a teacher's schedule changes and they have not customized that section in the Teaching Center, such as entering a new name or selecting an icon or color, the name for that section is updated based on the schedule change. If the teacher has customized the section, no changes are made to the Teaching Center.
Campus Learning	Assignments and submissions have been updated so that when a teacher or student pastes an image into a WYSIWYG editor, the image is uploaded to the Campus Digital Repository. Users can also upload images by clicking the image icon and selecting an image file on their device. As with other CDR files, users must acknowledge the Acceptable Use Policy. Users who do not have access to the CDR can include images by clicking the image icon, then the link icon, and pasting in a URL for the image.
Cross-Site Enrollment	A Max Students field has been added to the School Connections tool. This field limits seats at a Serving School for Cross-Site Enrolled students. The limit applies to every section that is offered to a Home School. Additional logic has been added to the process around Cross-Site Enrollment Course and Section Deletion, Roster Deletion and Student Schedule Deletion. • A Cross-Site Course Section cannot be deleted from the Serving School when Cross-Site students are still scheduled into that section. • A Cross-Site Course cannot be deleted from the Serving School when Cross-Site students are scheduled into any of the course's sections. • A mapped Cross-Site Course Section cannot be deleted from the Home School when Cross-Site students are scheduled in the section. A mapped Cross-Site Course cannot be deleted from the Home School when Cross-Site students are scheduled into any of that course's sections.
FRAM	Updated the Household Application and Online Application print format. A No Income column has been added to Household Details to indicate if No Income was selected for a household member in an online application.
Grades	The Grades Report was updated to report course sections, including those without 'in-progress' grades, when generated in the Missing Grades/Scores mode.
Graduation	A new Student Post Grad Confirmation field has been added to the General Graduation editor. This field populates with the date the student last confirmed their post-graduation plans.

Item	Description
Learner Planning	The logic for searching for students using the advanced Special Ed Status, Setting, and Disability fields was updated. See the Searching in Campus article for additional information.
