Subject: Tableau Behavior Visualizations Updates

Good morning,

This message is being sent to District Safe Schools Administrators, please share with relevant staff in your district.

KDE has been working with the vendor to make updates to the Tableau Behavior Visualizations to align with referral tracking options in other tools used by districts.

The following the new views are now available in the production site:

- *Annual Percentage of Students Referred* – this view provides the percent of students with any behavior referral based on the parameters selected.
- *Event Analysis Percent* – this view provides event analysis of referrals per 100 students per location; per day; per month; per time based on the parameters selected.
- *Resolution Analysis Percent* – this view provides resolution analysis of referrals per 100 students based on the parameters selected.

Additional, updates include a fix to the download format of *Data* option to output the correct numerator and denominator in all behavior views. Please let me know if you have any questions, thanks!
