School Report Card (SRC) Reminders

Schools and districts should continue to review, raise flags and approve all open domains in the School Report Card (SRC) Suite Collection and Approval Portal. The Overview, Career and Technical Education (CTE), Education Opportunity, Transition to Adult Life and School Safety domains are all open in the Preview tool for review. The Collection tool remains open to allow schools to update Access to Technology, Career Studies, Health Education and Physical Education, Ineffective Teachers, Parental Involvement, Precautionary Measures, Visual and Performing Arts, and/or World Language data. Districts can also continue to update or add superintendent messages into the Collection tool.

As a reminder, the data display defaults to the suppressed view; however, the toggle can be used to see unsuppressed data. On the table view, hover over the right side of the table to see the bar to scroll down and the bottom of the table to see the bar to scroll right. To help ensure quality of data, districts should monitor collection data and school approvals. The Quality Assurance Worksheet includes links to reports that can help with verification. Once all data is reviewed and verified, the domain should be approved at the district level. KDE monitors district approvals to gauge readiness for public deployment.

Kentucky Department of Education (KDE) points of contact respond to flags within the tool. Responses can be seen in the Approval-Review Flags Report. Select Flag Status "Lowered" and "Raised" to see all responses. If there are additional questions regarding an item after a flag has been lowered, email the KDE responder directly.

KDE is continuing to test prior years (2021-2022 and 2022-2023) data and the assessment and accountability for district review. This data should be available soon. Prior year data should be consistent; however, there will be some variances due to the way small cell counts are suppressed. The current School Report Card Suite dashboard tool will sunset mid-December so there is limited time available to compare data previously reported in the dashboard view to the new School Report Card dashboard data.

Outstanding issues with the views, functionality of the system or questions about the training or Quick Reference Guides on the SRC Resource webpage should be reported to the AnLar help desk. The issues listed below do not need to be reported or flagged.

- Teacher Working Conditions data is being updated and will be available soon.
- Aggregation of ineffective teachers' equity calculations to district level are not available. The calculation will aggregate data entered by schools in the collection tool to calculate district values.
- Teacher Certification Data: Emergency Provisional Teacher Counts have not yet been loaded; National Board-Certified teacher data is available but the source has changed for 2024 reporting, only those reflected in the Professional Staff Data (PSD) Report as receiving extra service pay are reflected. Those without National Board-Certified teachers reflected appear blank.

Recorded training and other resources are available on the SRC Resource webpage.

CONTACTS

- For questions related to AnLar's access and functionality, contact the AnLar Helpdesk email or call (502) 509-0041 between 8 a.m. and 6 p.m. ET.
- Email KDE Data Services for general questions.
- Contact applicable KDE data point of contact for questions on data in Preview tool
- Email KDE CTE Contacts for questions regarding CTE data
- Collection contacts include:
    - Windy Spalding for precautionary measures and parental involvement.

- - Caryn Davidson for School Profile Report and Advanced Coursework.
  - Ben Maynard for access to technology.
  - Tessa Harris for ineffective teacher.
- Email KDE DAC Information for assessment and accountability questions.
