Kentucky Department of Education (KDE) – Accessing Archived Continuous Improvement Platform (CIP) Diagnostics

Improvement planning diagnostics for the 2017-2018, 2018-2019, 2019-2020, 2020-2021 and 2021-2022 planning cycles were recently archived in the Continuous Improvement Platform (formerly eProve) and are now accessible on the Diagnostics dashboard using the *archived* filter. Diagnostics for the past two years (2022-2023 and 2023-2024) were **not** archived and remain accessible on the main Diagnostics dashboard with the 2024-2025 diagnostics.

To access archived diagnostics, follow the below steps:

- 1. Open Diagnostics from your institution's myJourney dashboard. This opens the institution's Diagnostics dashboard.
- 2. Select **Status** from the **Filter by** drop-down.
- 3. Select **Archived ()** from the second drop-down.

This updates the list of diagnostics to show only the diagnostics that are archived.

State admin: This updates the list of diagnostics to show the diagnostics that are archived for the state *and* for all districts and schools under the KDE state hierarchy.

District admin: This updates the list of diagnostics to show the diagnostics that are archived for the district *and* for all schools under the district's hierarchy.

The actions drop-down for archived diagnostics include the options to open (view) the diagnostic, download the PDF report and view the history log. For administered diagnostics, the status monitoring report CSV can be downloaded. Any associated attachments can also be downloaded by opening the diagnostic.

Archived diagnostics cannot be edited, locked or unlocked, sent to workspace, deleted or restored. Additionally, the status report CSV can be downloaded for the list of diagnostics by institution admins using the download button.
